

# Paediatrics - Cardiology

#### The Workforce

Paediatrics is a specialty which provides expert diagnosis, treatment and care for infants, children and young people. Paediatricians may have specific fields of practice e.g. endocrinology, general, neonatal & perinatal medicine, medical oncology or rehabilitation medicine. The Royal Australasian College of Physicians (RACP) is accredited by the Australian Medical Council (AMC) to deliver paediatrics and child health training.

#### **Workforce Characteristics in 2015**

Headcount

16.7% **Female** 

50.0 hours

**52.3** vears average age

50.0% Workforce aged over 50

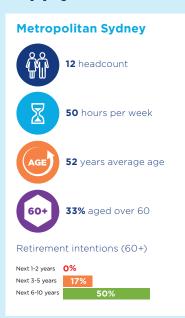

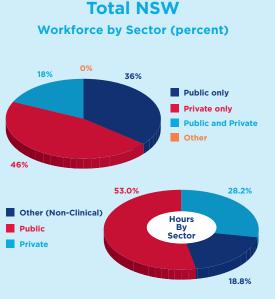

33.3% Workforce aged over 60

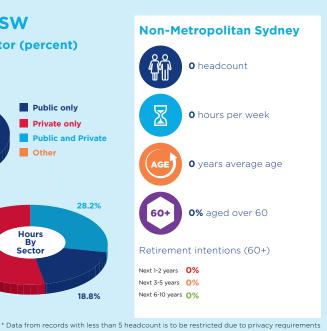

2 New Fellows in Australia in 2016

## **Supply and Distribution**

### **Trainees**

#### Advanced Trainees in NSW:

2015	2016	2017
2	3	3

**Proportion** female trainees in Australia 2017

## The Future in NSW - Workforce Planning to 2030

Workforce projections are provided for a low and high demand scenario. Where requirements for both scenarios are met without the need for additional fellows, the projected "No Growth" scenario workforce data is provided.

Estimated Demand
Growth
Between 2.5%
(low demand scenario)
to 3.3% (high demand
scenario).

Estimated Additional Fellows
All demand scenarios require
additional fellows. Trainee
numbers need to increase by
approximately 0.7 per annum
to meet projected 2030
requirements.

Estimated Workforce
Size
In 2030, 19 to 21
Headcount (assuming all additional fellows will enter the workforce).

Estimated Workforce
Average Age
In 2030,
48.4 to 53.0 years.

Estimated percentage
over 60 years
In 2030,
17.5% to 18.8%
of workforce
over 60 years.

## **Workforce Planning Priority and Assessment Framework**

Rating Key: Minimal Factor < Minor Factor < Moderate Factor < Major Factor

## **Workforce Modelling Considerations**

- Workforce modelling is based on current models of care. Any change in the models may impact on requirements.
- Any changes to current training programs will affect the workforce modelling outcome.
- Workforce modelling is based on current workforce hours profile by age co-hours. Any changes to hours worked by future clinicians will affect the model.
- · There is an accepted error rate of plus or minus two per cent within workforce modelling
- The model does not address any mal-distribution either by location (rural or regional) or sector (public or private)
