The Future in NSW - Workforce Planning to 2030

Workforce projections are provided for a low and high demand scenario. Where requirements for both scenarios are met without the need for additional fellows, the projected "No Growth" scenario workforce data is provided.

Estimated Demand
Growth
Between 1.5% (low
demand scenario) to
2.8% (high demand
scenario).

Estimated Additional Fellows
All demand scenarios require
additional fellows. Trainee
numbers need to increase by
approximately 1 per annum to
meet projected 2030
requirements.

Estimated Workforce
Size
In 2030, 169 to 181
Headcount (assuming all additional fellows will enter the workforce).

Estimated Workforce
Average Age
In 2030,
53.2 to 53.9 years.

Estimated percentage
over 60 years
In 2030, 28.8% to
30.8% of workforce
over 60 years.

Workforce Modelling Considerations

- Workforce modelling is based on current models of care. Any change in the models may impact on requirements.
- Any changes to current training programs will affect the workforce modelling outcome.
- Workforce modelling is based on current workforce hours profile by age co-hours. Any changes to hours worked by future clinicians will affect the model.
- · There is an accepted error rate of plus or minus two per cent within workforce modelling
- The model does not address any mal-distribution either by location (rural or regional) or sector (public or private)
