Rheumatology (Physician) Small	

Notes:

Workforce Modelling to meet 2030 requirements: Additional trainees required from outcome of workforce modelling divided by existing training numbers

Adequate Career Opportunities: No increase in the total number of trainees required in NSW. The model does not capture any mal-distribution by sector or location

Reasonable Career Opportunities: Between 1% and 25% increase over total number of trainees required

Substantial Career Opportunities: Between 25% to 150% increase over total number of trainees required

Significant Career Opportunities: Greater than 150% increase over total number of trainees required

Small: When more than 50% of either Sydney LHDs or Regional/Rural LHDs have a fellow workforce based on principal main location of less than 3 fellows. Of note: services might be provided by other arrangements, e.g. fly-in or tele health

Non Metro Sydney: All LHDs that are not in the greater Sydney / Metropolitan Sydney area $\,$

Metropolitan Sydney: South Eastern Sydney, South Western Sydney, Western Sydney, Northern Sydney, Nepean Blue Mountains, Sydney LHD, Children's Hospital Network
