MEDICAL experts and industry players have urged prime minister-elect Tony Abbott to rectify the national e-health record system's "significant mistakes and missed opportunities" and ensure transparency is a key plank in its delivery.

In the lead-up to the election, Mr Abbott vowed to overhaul the cumbersome personally controlled e-health record (PCEHR) program, calling for a review.

PHARMACY GUILD TAKES A WAIT AND SEE APPROACH TO PCEHR

WRITTEN BY KATE MCDONALD ON 12 SEPTEMBER 2013.

The Pharmacy Guild of Australia has clarified its position on community pharmacy involvement in the PCEHR, saying that while a concern over legal risks to pharmacists using the system had largely been overcome, it would wait to review its position until the outcome of the new government's audit of the system was known.

In a scorecard on PCEHR and eHealth uptake released last week, NEHTA reported that it understood that the Pharmacy Guild had advised members not to sign the PCEHR participation agreement until systems were in place to allow individual users to be identified.

NEHTA said uptake amongst pharmacists outside the lead eHealth sites was being hampered by difficulties in identifying individual users of common pharmacy terminals, which is a requirement of the PCEHR.

NEHTA's figures show that as of July 10, 271 community pharmacies were registered in the PCEHR system, but most of those were in Tasmania, Victoria or Queensland and were involved in the trial that established the National Prescription and Dispense Repository (NPDR).

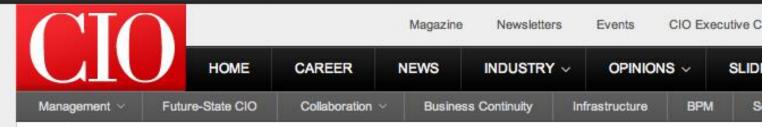

In a statement to *Pulse+IT*, a spokesperson for the Guild said the legal risks had been "largely overcome", but the organisation would not review its recommendation against signing the agreement until the new government announced what it planned to do.

"The Pharmacy Guild of Australia supports the concept of an electronic health record and has invested significant

Why clinicians don't like national e-health

And what needs to be done to change their minds

3. Integrated Care?

Where do we take this? Why?

The HealtheNet program enables:

- "Better" Discharge summaries direct to GP desktops using National Identifiers
- NSW Provider access to <u>cross-LHD</u> alerts, allergies, clinical documents, medical imaging studies and other information (one click from their EMR)
- 3. Sharing of information with the National eHealth Record (PCEHR) starts from October 22, and
- 4. NSW Provider access to National eHealth Record (PCEHR) information MBS, PBS, ACIR, Shared Health Summaries

On September 9 NSW Connected our HealtheNet platform with the PCEHR

Local HealtheNet Statistics

National (PCEHR) Integration

- 4 LHDs, Kids Network in close collaboration with WS, NBM, ES, SE Medicare Locals
- 960,000 NSW Clinical Documents stored (2/3 from Community)
- 1.7M NSW hospital visit histories
- Enterprise Patient Registry that links all NSW
 identifiers currently contains 6.6M patients
- **1.02M Diagnostic Imaging Studies** (which includes 74M images)
- NSW Portal accessed 18,000 times by clinicians in lead sites since August 2012
- Full eBlue Book integration

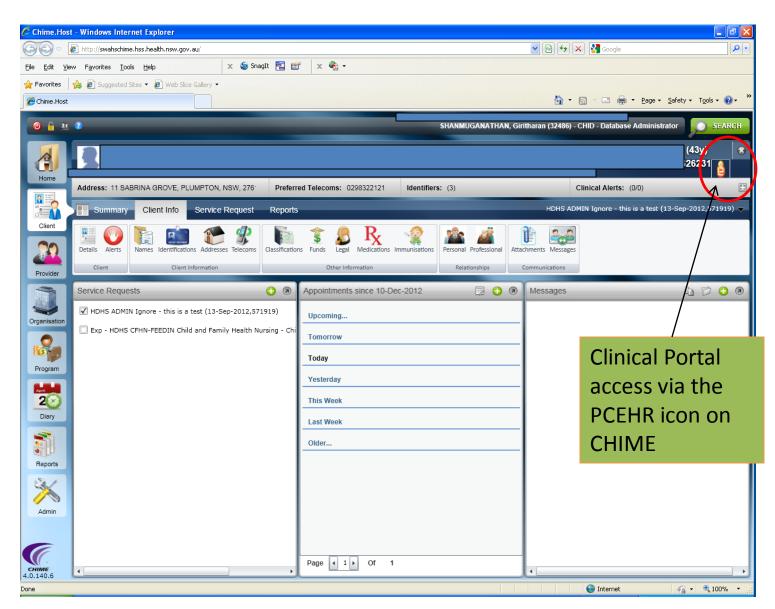

Access to all PCEHR documents now available in lead sites. NSW to contribute up to 2000 D/C summaries per week to PCEHR from October

2M NSW patients now have IHIs (Another 5M by end 2013). 6816 Patients enrolled in PCEHR by HealtheNet team

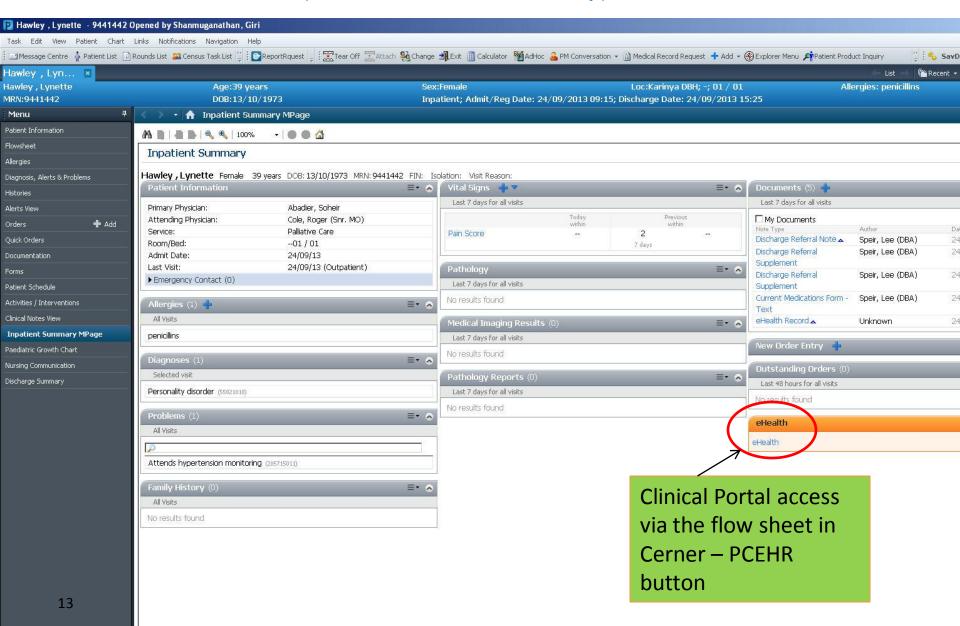

PCEHR accessed 480 times since 9
September 13 – documents accessed
most being Medicare, PBS & ACIR

Consumer only National CeHR available through HealtheNet

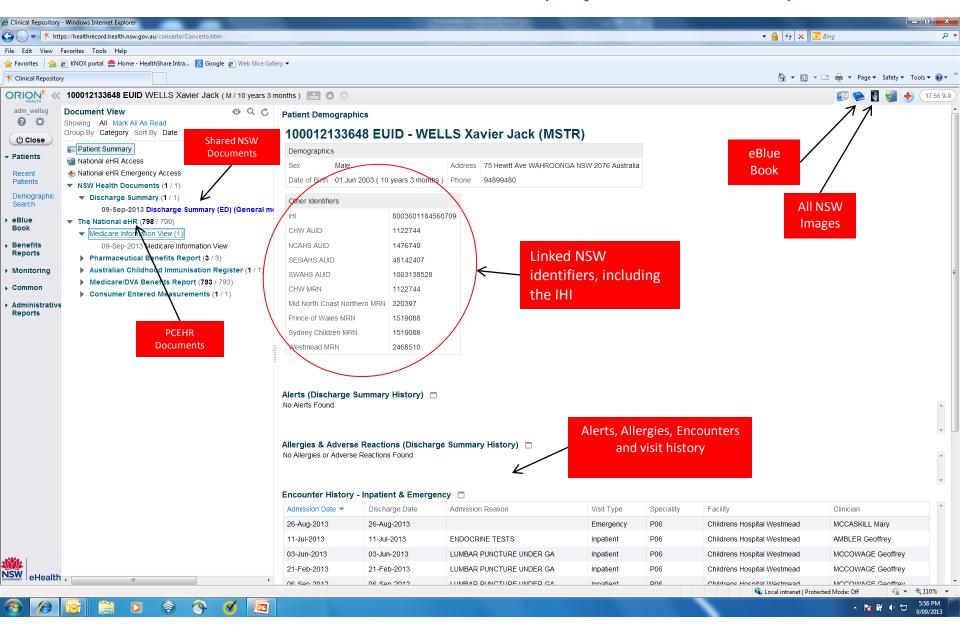

The NSW Clinical Portal is accessed Directly from the (Acute and Community) EMR

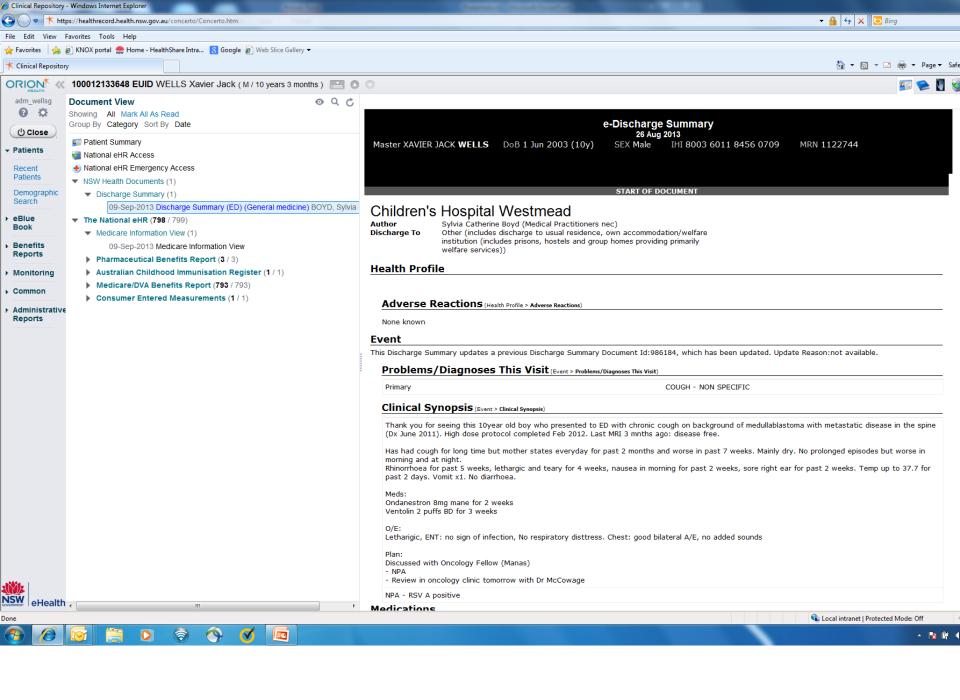

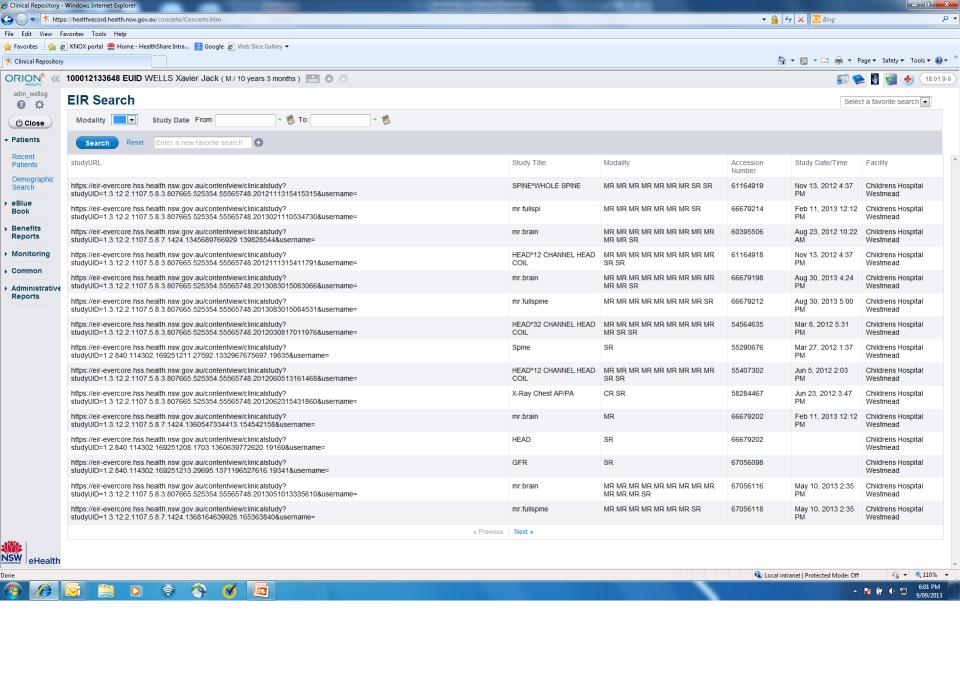

The NSW Clinical Portal is accessed Directly from the (Acute and Community) EMR

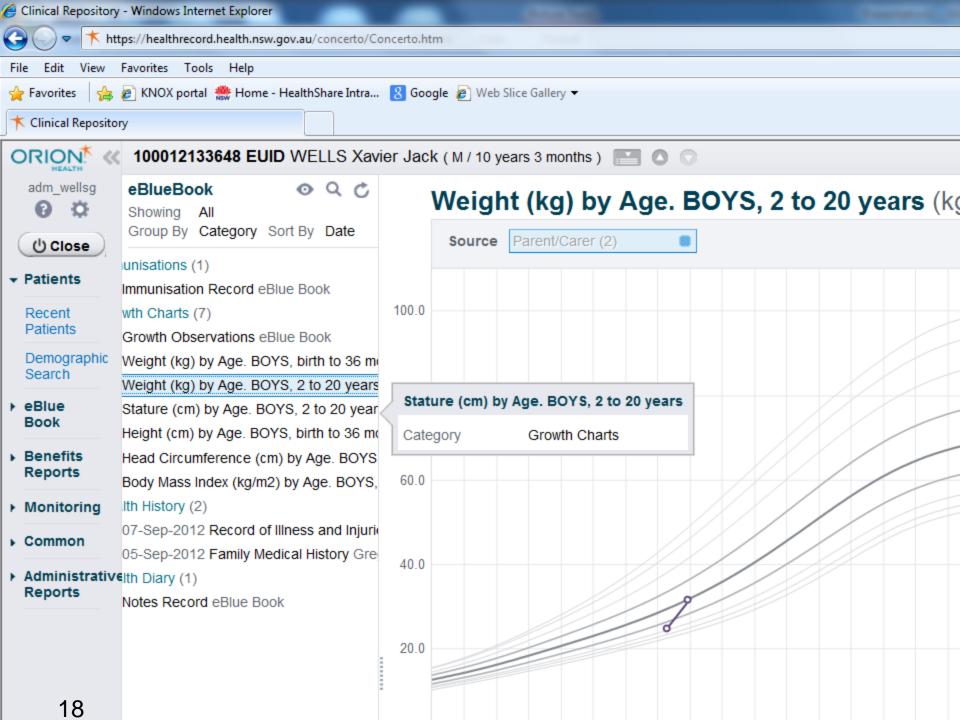

The Clinical Portal is launched (in patient context)

Application Connectivity / Integration

(Clinical Conversations)

- 'Closed Loop' collaboration on clinical workflow
- Driving outcomes
- Automated sharing of key clinical information (Images, Allergies, Discharge Summaries)
- Can be referenced for collaboration
- Influencing, but not driving outcome
- Sharing of basic transactions (e.g. Lab result or D/C letter)
- Unable to be leveraged for collaboration

Child Health Growth and Development

Personal Health Record involving all carers / settings

25

- Key focus is on empowering consumers, however providers in each setting derive benefit via access to information not previously available
- Benefits flow via 2-way communication / collaboration between consumers and providers
 - More provider input (more of the loop closed) = > value
