

Immunisation Services - Authority for Registered Nurses

Document Number PD2008_033

Publication date 18-Jun-2008

Functional Sub group Clinical/ Patient Services - Infectious diseases
Clinical/ Patient Services - Nursing and Midwifery
Population Health - Communicable Diseases

Summary This Policy Directive details the Authority that applies to registered nurses with specialist training to carry out vaccination programs, which are complementary to those provided by medical practitioners. It applies to a class of registered nurses who have completed defined training in immunisation. It is not applicable to registered nurses who have not completed such defined training but who may administer vaccines under the direction and authorisation of a medical officer. This Policy Directive lists specific vaccines and definitive conditions, to which specially trained registered nurses must conform.

This Policy Directive may be varied, withdrawn or replaced at any time. Compliance with this directive is **mandatory** for NSW Health and is a condition of subsidy for public health organisations.

IMMUNISATION SERVICES – AUTHORITY FOR REGISTERED NURSES

This Policy Directive supersedes:

- Policy Directive PD2006_057 Immunisation Services – Authority for Registered Nurses

NSW Health is fully committed to improving immunisation coverage rates and achieving national goals and targets. The immunisation status of members of the community is seen to be greatly improved if registered nurses, who have specialised training, are able to carry out vaccination programs that are complementary to those performed by medical practitioners.

This policy directive applies to a class of registered nurses who have completed defined training in immunisation.

It is not applicable to registered nurses who have not completed such defined training but who may administer vaccines under the direction and authorisation of a medical officer.

Authority for certain registered nurses to provide immunisation services without direct medical authorisation has been issued under the Poisons and Therapeutic Goods Act 1966 and was published in the New South Wales Government Gazette No. 66, on 6 June 2008.

This Authority applies to the following medications:

adrenaline	pertussis vaccine
diphtheria vaccine	pneumococcal vaccine
<i>Haemophilus influenzae</i> type b (Hib) vaccine	poliomyelitis vaccine
hepatitis A vaccine	rotavirus vaccine
hepatitis B vaccine	rubella vaccine
human papillomavirus vaccine	tetanus vaccine
influenza vaccine	tuberculin purified protein derivative
measles-mumps-rubella vaccine	tuberculosis vaccine
meningococcal vaccine	varicella vaccine

and is subject to all of the following conditions:

1. the nurse is employed in connection with a vaccination program in a health service or a place of work; and
2. the nurse administers a vaccine only in connection with that vaccination program; and
3. the nurse has successfully completed:
 - i. The New South Wales Health Department Immunisation Accreditation Program for Registered Nurses (prior to 2001); and/or

- ii. The Immunisation Course for Registered Nurses administered by The College of Nursing (from 2001); and/or
 - iii. An interstate or overseas immunisation education program that conforms to the National Guidelines for Immunisation Education for Registered Nurses and as approved by The College of Nursing; and
4. the storage, pre-vaccination assessment and administration of each vaccine is at all times undertaken in accordance with the procedures specified in the National Health and Medical Research Council's *current edition* of the Australian Immunisation Handbook; and
 5. an emergency kit containing adrenaline injection 1:1000, and, a written protocol for the treatment of anaphylaxis, including adrenaline use is available for each vaccination occasion of service. Administration of adrenaline is at all times undertaken in accordance with the procedures specified in the National Health and Medical Research Council's *current edition* of the Australian Immunisation Handbook; and
 6. the nurse administers tuberculin purified protein derivative for tuberculosis skin testing and tuberculosis vaccine only if they have completed additional education in the use of these substances and only if the nurse's record of education states that this additional education has been completed; and
 7. as required, under the *NSW Public Health Act 1991*, the nurse reports an Adverse Event Following Immunisation (AEFI) to the local Public Health Unit. The AEFI to be notified are listed in the current edition of *The Australian Immunisation Handbook*; and
 8. the nurse ensures that a medical practitioner is contactable for medical advice at all times during the vaccination program; and
 9. to maintain authority to immunise, a registered nurse must annually:
 - review best practice policy for immunisation. This may be, but is not limited to, attendance at updates or seminars on current practices, and
 - obtain a statement of proficiency in cardio-pulmonary resuscitation.

The following conditions also apply to immunisation services provided by registered nurses:

- (a) Employers are responsible for ensuring that before a registered nurse is authorised to administer vaccines without medical supervision that the nurse:
 - i. is currently registered in NSW; and
 - ii. fulfils the above conditions 1 – 9; and

- iii. has completed a cardio-pulmonary resuscitation (CPR) course or update course in the previous 12 months.
- (b) Registered nurses, who completed the NSW Health Department Immunisation Accreditation Course for Registered Nurses prior to 2001 and, who undertook additional specialist training in the administration of Tuberculin Skin Test (TST) or Bacille Calmette-Guèrin (BCG), may continue to administer these vaccines, if they are employed by an Area Health Service.

Registered nurses, who completed the NSW Health Department Immunisation Course for Registered Nurses prior to 2001 and who now wish to undertake additional specialist training in the administration of TST or BCG, and who are employed by an Area Health Service, must undertake the **complete** Immunisation Course for Registered Nurses administered by The College of Nursing, that is Themes 1, 2 and 3 as described below in (c). (See additional conditions for Theme 3 below.)

- (c) The Immunisation Course for Registered Nurses administered by The College of Nursing contains three Themes.

- Theme 1:** Theoretical Foundations of Immunisation
- Theme 2:** Clinical theory and practice of immunisation
- Theme 3:** Tuberculosis, tuberculin skin testing and Bacille Calmette-Guèrin vaccination
 - Topic 1 – TB & TST
 - Topic 2 – BCG

Registered nurses, who wish to be authorised to provide immunisation services, must complete Themes 1 & 2 of the Course.

ONLY registered nurses employed by an Area Health Service can undertake Theme 3.

Theme 3: Topic 1 – TB and TST

To undertake **Theme 3, Topic 1**, the registered nurse must:

- be employed by an Area Health Service.
- have written approval from the Area TB Coordinator and be approved by NSW Health.
- have completed Themes 1 & 2 of the Immunisation Course for Registered Nurses administered by The College of Nursing.

Theme 3: Topic 2 – BCG

To undertake **Theme 3, Topic 2**, the registered nurse must:

- be employed by an Area Health Service and work in a Chest Clinic.
 - have written approval from the Area TB Coordinator and be approved by NSW Health.
 - have completed Themes 1 & 2 of the Immunisation Course for Registered Nurses administered by The College of Nursing since 2001.
 - have completed Topic 1 – TB and TST
- (d)** Registered nurses who work under the direction of a medical practitioner.
- i. registered nurses, in the normal course of their work who work under the written direction of a medical practitioner, can administer all vaccines including TST. However, BCG vaccine is excluded from this list due to its restricted distribution to Area Health Service Chest Clinics.
 - ii. registered nurses, can undertake ‘competency based’ training in the administration and interpretation of TST, as coordinated by Area Health Service Chest Clinic staff, however are not authorised to administer TST without a doctor’s written order.
