

Bed Types Categories for Inpatient Units from 1 March 2008

Document Number PD2008_034

Publication date 20-Jun-2008

Functional Sub group Corporate Administration - Information and data
Clinical/ Patient Services - Information and data

Summary This Policy Directive authorises reporting of an additional nine Bed Type codes for inpatient units, for implementation on 1 March 2008.

Author Branch Demand and Performance Evaluation Branch

Branch contact Eui-Soo Choi 9391 9856

Applies to Area Health Services/Chief Executive Governed Statutory Health Corporation, NSW Dept of Health, Public Health Units, Public Hospitals

Audience PAS, Medical Records Staff

Distributed to Public Health System, NSW Ambulance Service, NSW Department of Health, Public Health Units, Public Hospitals

Review date 20-Jun-2013

Policy Manual Not applicable

File No.

Status Active

Director-General

This Policy Directive may be varied, withdrawn or replaced at any time. Compliance with this directive is **mandatory** for NSW Health and is a condition of subsidy for public health organisations.

NEW BED TYPE CATEGORIES FOR REPORTING PURPOSES FROM MARCH 2008

1. Introduction:

This Policy Directive should be read in conjunction with the Bed Type - NSW Health State-wide Data Standards Version 5 of the Admitted Patient Data Collection Dictionary.

The purpose of this policy is to direct those involved with the maintenance of inpatient Patient Administration Services (PAS) to correctly allocate Bed Type categories for reporting purposes.

This Policy Directive should be distributed to all staff involved in the maintenance of inpatient Patient Administration Systems (PAS). This includes those who manage and develop PAS statewide systems and those who manage the PAS at the hospital level (eg. PAS managers and Medical Record Staff).

The Area Health Service and Hospital executive, and the intensive care clinical management staff, are to be advised and consulted on implementation of this Policy Directive to ensure there is a correct Bed Type allocation.

2. Purpose:

This change will assist in identifying bed types in health facilities that until March 2008 have not been stored in the HIE and only reported via the Sustainable Access Program (SAP) reporting. The additional bed types have now been implemented in the HIE as part of the Release 4.3.5.

In the instance of Bed Type 87 there is a requirement from Health Systems Performance Improvement Branch to identify the patients of the newly established Medical Assessment Units (MAU).

The additional bed types are as follows:

Code	Description
79	Gynaecology
80	Same Day Medical
81	Same Day Surgical
82	Extended Short Stay Surgical (<24hrs)
83	Residential Aged Care, Not Further Defined
86	Respite, Not Further Defined
87	Medical Assessment Unit
99	Lodger / Boarder

3. Concepts:

3.1 Definition

The designation of each bed, in terms of type of care or group of patients, which the patient is accommodated in during his/her stay in hospital. For detailed description of each bed type category, refer to the attachment to this Policy Directive.

3.2 Coverage

Each bed created on the patient administration system must be assigned a Bed Type, even if it is not being used for admitted patient care.

4. Further Information

4.1 Detailed information on the Bed Type, NSW Health State-wide Data Standards Version 5 of the Admitted Patient Data Collection Dictionary is available on the NSW Health Intranet. See the URL below:

<http://internal.health.nsw.gov.au/im/ims/ap/ap-data-dictionary-current-public.html>

Bed Type

Defining Attributes

Definition: The designation of each bed, in terms of type of care or group of patients, which the patient is accommodated in during his/her stay in hospital.

Coverage: Each bed created on the patient administration system must be assigned a Bed Type, even if it is not being used for admitted patient care.

Guide for Use

Data Domain: The table below shows the data domain for this element.
Admitted Patient Beds – Overnight

Code	Domain Description
08	Brain Injury Rehabilitation
53	Brain Injury Transitional Living
33	Coronary Care
61	Detoxification
07	Drug and Alcohol
59	Emergency Medical
15	General Intensive Care
01	General – Mixed
79	Gynaecology
34	High Dependency Care
46	Medical
87	Medical Assessment Unit
48	Medical Oncology
18	Mother Craft
37	Neonatal Intensive Care
16	Neonate Special Care Nursery
49	Obstetrics
43	Paediatric
03	Palliative
02	Rehabilitation
69	Stroke
47	Surgical

Admitted Patient Beds - Same Day

Code	Domain Description
82	Extended Short Stay Surgical (< 24 hrs)
68	Mobile Service
71	Same Day Chemotherapy
74	Same Day Drug and Alcohol
73	Same Day Mental Health
75	Same Day Not Elsewhere Classified
39	Same Day Renal Dialysis
72	Sleep Disorder (< 24 hour care)
80	Same Day Medical
81	Same Day Surgical

Other Hospital Beds

Code	Domain Description
60	Bassinet
66	Delivery Suite
67	Operating Theatre / Recovery
76	Transit Lounge

Admitted Patient Beds – State-wide Specialist Units

Code	Domain Description
42	Dental Service
40	Specialist Spinal Injury
41	Severe Burns
38	Transplant

Admitted Patient Beds – Designated Psychiatric

Code	Domain Description
62	CAMHSNET Supported Paediatric
63	CAMHSNET Supported Psychiatric
64	CAMHSNET Acute
65	CAMHSNET Non-Acute
24	Confused and Disturbed Elderly (CADE) – Psychiatric *** THIS BED TYPE HAS BEEN EXPIRED AS FROM 1 JULY - REFER TO POLICY DIRECTIVE PD2007_064 ***
22	Dual Diagnosis
21	Neuro-Psychiatry
13	Post Natal Depression
04	Psychiatric Acute Care
85	Psychiatric Emergency
20	Psychiatric Extended Care
12	Psychiatric Intensive Care
50	Psychiatric Medium Secure
05	Psychiatric Rehabilitation
06	Psychiatric Secure

Admitted Patient Beds – Virtual

Code	Domain Description
17	Emergency Department – Level 3 and Above
58	Emergency Department – Level 1 and 2
29	Collaborative Care Service Provider – General
30	Collaborative Care Service Provider – Drug and Alcohol
32	Collaborative Care Service Provider – Mental Health
25	Hospital in the Home – General
26	Hospital in the Home – Drug and Alcohol
28	Hospital in the Home – Mental Health

Non-Admitted Patient Beds – Community Residential

Code	Domain Description
09	Confused and Disturbed Elderly – Non-Psychiatric *** THIS BED TYPE HAS BEEN EXPIRED AS FROM 1 JULY - REFER TO POLICY DIRECTIVE PD2007_064 ***
70	Drug and Alcohol Community Residential
54	Mental Health Community Residential (24 hour staff)
55	Mental Health Community Residential (< 24 hour staff)

Non-Admitted Patient Beds – Residential Aged Care

Code	Domain Description
14	Residential Aged Care – High (Nursing Home)
23	Residential Aged Care – Low (Hostel)
51	Respite – High: Federal Govt. Block Funded
52	Respite – Low: Federal Govt. Block Funded
77	Intermittent Transitional Care – In Hospital – Federal & State Mix Funding
78	Intermittent Transitional Care – In the Community – Federal & State Mix Funding
83	Residential Aged Care - Not Further Defined
86	Respite – Not Further Defined

Non-Admitted Patient Beds – Virtual

Code	Domain Description
56	Mental Health Social Day Program
57	Aged & Disability Social Day Program
84	ComPacks – Approved Patient Packages *** THIS BED TYPE IS NOT CURRENTLY IN USE ***

Other

Code	Domain Description
99	Lodger/Boarder Beds

Domain Definitions:

The table below shows the domain definitions for this element.

Code	Domain Definition
01	<p>Mixed Purpose:</p> <p>A bed staffed 24 hours a day and designated by the facility for the accommodation of medical, surgical and/or obstetric patients of a non-specific age.</p> <p>Beds in this category are typically located in small and rural hospitals (such as Multi Purpose Services) where medical, surgical, and obstetric patients are accommodated in the same ward as standard practice.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>
02	<p>Rehabilitation:</p> <p>A bed staffed 24 hours a day and designated by the facility for the accommodation of patients primarily requiring rehabilitation care.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>
03	<p>Palliative:</p> <p>A bed staffed 24 hours a day and designated by the facility for the accommodation of patients primarily requiring palliative care.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is patients who would usually be accommodated in another Bed Type if those beds were available).</p>
04	<p>Psychiatric Acute:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients who present with acute episodes of mental illness.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
05	<p>Psychiatric Rehabilitation:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients requiring care which has a primary focus on intervention to reduce functional impairments resulting from psychiatric disorders that limit the independence of patients.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>
06	<p>Psychiatric Secure:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate of forensic patients (or other patients) requiring a higher level of care and containment than other mental health patients. Forensic patients are people with a mental disorder that has led them to commit criminal offences, or makes it likely that they will offend in the future if not adequately treated or contained.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>
07	<p>Drug and Alcohol:</p> <p>A bed staffed 24 hours a day that is officially recognised by NSW Health for the accommodation of patients requiring treatment for substance use/abuse on an admitted patient basis; excluding detoxification.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are NOT counted as "Days in a Designated Psychiatric Unit", despite the fact they can be co-located with designated psychiatric beds.</p>
08	<p>Brain Injury Rehabilitation Program Rehabilitation:</p> <p>A bed staffed 24 hours a day and officially designated by NSW Health Department circular for the accommodation of admitted patients receiving care in a rehabilitation unit for a brain injury under the Brain Injury Rehabilitation Program.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'.</p>

Code	Domain Definition
09	<p>Confused and Disturbed Elderly (CADE) – Non-Psychiatric</p> <p>THIS BED TYPE HAS BEEN EXPIRED AS FROM 1 JULY 2007 – REFER TO POLICY DIRECTIVE PD2007_064</p>
12	<p>Psychiatric Intensive Care:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients requiring a higher intensity of management than can be readily provided in a general acute psychiatric bed.</p> <p>These beds are staffed and designed for the accommodation of patients who:</p> <ul style="list-style-type: none"> • are severely disturbed and represent a high risk of being a danger to themselves, others or the environment • present with threatening or violent behaviours and cannot be safely managed in a less restrictive environment • require higher levels of nursing observation. <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit", but NOT as "Hours in Intensive Care".</p>
13	<p>Post Natal Depression:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients with post natal depression.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>

Code	Domain Definition
14	<p>Residential Aged Care – High (Nursing Home):</p> <p>A residential aged care place operated in a residential aged care facility to frail older people with high levels of functional dependence, 24 hours per day, 7 days per week for the long term, either by registered nurses or under the supervision of registered nurses.</p> <p>Residential aged care places are operated under the terms of the Aged Care Act 1997 and funded and regulated under the Act by the Australian Government.</p> <p>In order to access high-level residential aged care, people must have been assessed by an Aged Care Assessment Team as requiring care within levels 1-4 of the Resident Classification Scale, 1 level 1 being the highest care level.</p>
15	<p>General Intensive Care:</p> <p>A bed staffed 24 hours a day that meets the Intensive Care role delineation of level 4 or higher, and used to accommodate patients requiring intensive care. Beds classified as Intensive Care beds must be specially staffed and equipped to provide observation, care and treatment to patients with actual or potential life-threatening illnesses, injuries or complications, from which recovery is possible. The bed is serviced by special expertise and facilities for the support of vital functions and utilises the skills of medical, nursing and other staff trained and experienced in the management of these problems.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for ‘overflow patients’. Time in this Bed Type count towards “Hours in Intensive Care”. This category excludes “Neonatal Intensive Care Units” and “Psychiatric Intensive Care Units”.</p>
16	<p>Neonate Special Care Nursery:</p> <p>A bed staffed 24 hours a day that is approved by the federal Government for the purpose of the provision of neonatal special care.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for ‘overflow patients’. Time in this type of unit does not qualify for “Hours in Intensive Care”. Newborns admitted to this Bed Type are considered to be “Qualified Newborns”. Special Care Nurseries that do not have federal Government approval are excluded from this Bed Type.</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
17	<p>Emergency Department – Level 3 and Above:</p> <p>A bed, stretcher, trolley or chair in an area within the hospital staffed 24 hours a day and designated as an Emergency Department of Level 3 or above.</p> <p>Note: Beds in this category may not be used for 'overflow patients'. Beds classified as 'Emergency Medical Units' are excluded from this category.</p>
18	<p>Mother Craft:</p> <p>A bed staffed 24 hours a day that is designated by the Department for accommodating patients who require mothercraft services only.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'.</p>
20	<p>Psychiatric Extended Care:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients who require care over an indefinite period because they have a stable but severe level of functional impairment and an inability to function independently and thus require extensive care and support.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>
21	<p>Neuro-Psychiatry:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients who require neuro-psychiatric care. These beds are attended by specialists in Neurology or Neuropsychiatry.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>
22	<p>Dual Diagnosis:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients who require specialist care for co-existing mental health and substance use disorders.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
23	<p>Residential Aged Care – Low (Hostel):</p> <p>A residential aged care place operated in a low-care residential aged care facility to people with low levels of functional dependence, 24 hours per day, 7 days per week for the long term.</p> <p>Residential aged care places are operated under the terms of the Aged Care Act 1997 and funded and regulated under the Act by the Australian Government.</p> <p>In order to access high-level residential aged care, people must have been assessed by an Aged Care Assessment Team as requiring care within levels 8-5 of the Resident Classification Scale, 1 level 8 being the lowest care level.</p>
24	<p>Confused and Disturbed Elderly (CADE) - Psychiatric:</p> <p>THIS BED TYPE HAS BEEN EXPIRED AS FROM 1 JULY 2007 – REFER TO POLICY DIRECTIVE PD2007_064</p>
25	<p>Hospital in the Home – General:</p> <p>A “virtual” bed established on the patient administration system to record general admitted patient activity provided under a recognised “Hospital in the Home” program to patients in their private place of residence.</p>
26	<p>Hospital in the Home – Drug and Alcohol:</p> <p>A “virtual” bed established on the patient administration system to record drug and alcohol admitted patient activity provided under a recognised “Hospital in the Home” program to patients in their private place of residence.</p>
28	<p>Hospital in the Home – Mental Health:</p> <p>A “virtual” bed established on the patient administration system to record mental health admitted patient activity provided under a recognised “Hospital in the Home” program to patients in their private place of residence.</p>
29	<p>Collaborative Care Service Provider – General:</p> <p>A “virtual” bed established on the patient administration system to record general admitted patient activity provided by another public or private hospital under a collaborative (or contract) care arrangement.</p> <p>Note: The days the patient is accommodated in these beds counts towards the patient days for both the purchasing facility and the facility providing the collaborative care service.</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
30	<p>Collaborative Care Service Provider – Drug and Alcohol:</p> <p>A “virtual” bed established on the patient administration system to record drug and alcohol admitted patient activity provided by another public or private hospital under a collaborative (or contract) care arrangement.</p> <p>Note: The days the patient is accommodated in these beds counts towards the patient days for both the purchasing facility and the facility providing the collaborative care service.</p>
32	<p>Collaborative Care Service Provider – Mental Health:</p> <p>A “virtual” bed established on the patient administration system to record mental health admitted patient activity provided by another public or private hospital under a collaborative (or contract) care arrangement.</p> <p>Note: The days the patient is accommodated in these beds counts towards the patient days for both the purchasing facility and the facility providing the collaborative care service.</p>
33	<p>Coronary Care:</p> <p>A bed staffed 24 hours a day that is designated by the facility to accommodate patients who require cardiac monitoring (both bedside and central), but which otherwise does not meet the criteria of ‘15 - Intensive Care’.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for ‘overflow patients’. Time in beds with this Bed Type do NOT count towards “Hours in Intensive Care”.</p>
34	<p>High Dependency Care:</p> <p>A bed staffed 24 hours a day that is designated by the facility to accommodate patients who require critical care expertise that is less resources intensive than would be allocated if accommodated in an Intensive Care Bed but more resource intensive than the care provided in a general bed.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for ‘overflow patients’. Time in beds with this Bed Type do NOT count towards “Hours in Intensive Care”.</p>

Code	Domain Definition
37	<p>Neonatal Intensive Care:</p> <p>A bed staffed 24 hours a day that meets the Intensive Care role delineation of level 3 or higher, and used to accommodate neonates requiring intensive care. These beds must be capable of providing complex, multi-system life support for neonates for an indefinite period. They must be located in an area capable of providing mechanical ventilation and invasive cardiovascular monitoring; or care of a similar nature.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Time in this Bed Type count towards "Hours in Intensive Care". This category excludes "General Intensive Care Units" and "Psychiatric Intensive Care Units". Newborns admitted to this Bed Type are considered to be "Qualified Newborns".</p>
38	<p>Transplant:</p> <p>A bed staffed 24 hours a day that is designated as a special unit dedicated to care of transplant recipients. This category includes beds in units dedicated for bone marrow (haemopoietic stem cell), renal, heart, heart-lung, liver, and pancreas transplants.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'.</p>
39	<p>Same Day Renal Dialysis:</p> <p>A chair/bed in a designated specialised day stay unit that is dedicated to the provision of renal dialysis services.</p> <p>Note: Renal Dialysis units generally have regular business hours and open and close each day at set times, however in some facilities these units may be open at midnight. Beds in this category may not be used for 'overflow patients'.</p>
40	<p>Specialist Spinal Injury:</p> <p>A bed staffed 24 hours a day that is designated as a special State unit dedicated to the initial treatment and subsequent ongoing management and rehabilitation of patients with acute spinal cord injury.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Time in this Bed Type do NOT count towards "Hours in Intensive Care".</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
41	<p>Severe Burns:</p> <p>A bed staffed 24 hours a day that is designated as a special State unit dedicated to the initial treatment and subsequent rehabilitation of severely injured burns patients. Patients accommodated in these beds usually have greater than 10 per cent of body surface affected for adults, and greater than 5 per cent of body surface affected for children.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Time in this Bed Type do NOT count towards "Hours in Intensive Care".</p>
42	<p>Dental Service:</p> <p>A bed in a specialised unit designated for the treatment of the patients receiving dental services.</p> <p>Note: Dental Service units generally have regular business hours and open and close each day at set times, however in some facilities these units may be open at midnight. Beds in this category may not be used for 'overflow patients'.</p>
43	<p>Paediatric:</p> <p>A bed staffed 24 hours a day that is designated by the facility for accommodation and treatment of patient's aged older than 29 days and less than 16 years.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available). This category may only be used by general hospitals and is NOT to be used by the specialist children's hospitals – "The Children's Hospital at Westmead", or "Sydney Children's Hospital".</p>
46	<p>Medical:</p> <p>A bed staffed 24 hours a day and designated by the facility to primarily accommodate medical patients of a non-specific age.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
47	<p>Surgical:</p> <p>A bed staffed 24 hours a day and designated by the facility to primarily accommodate surgical patients of a non-specific age.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>
48	<p>Medical Oncology:</p> <p>A bed staffed 24 hours a day in a unit designated by the facility to accommodate overnight patients who require medical oncology services.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>
49	<p>Obstetrics:</p> <p>A bed staffed 24 hours a day and designated by the facility to primarily accommodate obstetric/maternity patients of a non-specific age.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>
50	<p>Psychiatric Medium Secure:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients who mental health care in a unit with a medium security level.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may NOT be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
51	<p>Respite – High: Federal Govt. Block Funded:</p> <p>A residential aged care place operated in a high care residential aged care facility (nursing home) that is designated and funded by the Australian Government for the provision of respite care to allow a carer or care recipient a short term break from their usual care arrangement.</p> <p>In order to access respite care in a residential aged care facility, people must have been assessed by an Aged Care Assessment Team. Residential respite care places must not be used as a waiting facility for people seeking a permanent bed. The maximum period for the provision of respite care in a residential aged care facility is 63 days. Extensions can be granted for further 21-day periods.</p>
52	<p>Respite – Low: Federal Govt. Block Funded:</p> <p>A residential aged care place operated in a low care residential aged care facility (hostel) that is designated and funded by the Australian Government for the provision of respite care to allow a carer or care recipient a short term break from their usual care arrangement.</p> <p>In order to access respite care in a residential aged care facility, people must have been assessed by an Aged Care Assessment Team. Residential respite care places must not be used as a waiting facility for people seeking a permanent bed. The maximum period for the provision of respite care in a residential aged care facility is 63 days. Extensions can be granted for further 21-day periods.</p>
53	<p>Transitional Living Unit Beds - Brain Injury Rehabilitation Program:</p> <p>A bed staffed 24 hours a day that is officially approved by NSW Health Department Circular under the Brain Injury Rehabilitation Program, for the accommodation of clients requiring transitional living care services following a brain injury.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Transitional Living Units may be closed on certain days of the week, such as weekends. Beds in this category may NOT be used for 'overflow patients'.</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
54	<p>Mental Health Community Residential (24 Hour Staffing):</p> <p>A bed designated to accommodate mental health community residential care clients in a unit staffed 24 hours a day.</p> <p>Note: It is not a requirement for community residential activity to be recorded on a patient administration system, however where it is the activity must be clearly identified by a community residential care bed type so that it is not counted as admitted patient activity. Beds in this category may not be used for 'overflow patients'. Ward transfers transactions to this Bed Type are not permitted, rather a formal discharge and formal admission transaction must be performed. All activity reported under this Bed Type must have a "Service Category" of either "6 – Other Care" or "0 - Boarder".</p>
55	<p>Mental Health Community Residential (< 24 hour staffing):</p> <p>A bed designated to accommodate mental health community residential care clients in a unit that is <u>not</u> staffed 24 hours a day.</p> <p>Note: It is not a requirement for community residential activity to be recorded on a patient administration system, however where it is the activity must be clearly identified by a community residential care bed type so that it is not counted as admitted patient activity. Beds in this category may not be used for 'overflow patients'. Ward transfers transactions to this Bed Type are not permitted, rather a formal discharge and formal admission transaction must be performed. All activity reported under this Bed Type must have a "Service Category" of either "6 – Other Care" or "0 - Boarder".</p>
56	<p>Mental Health Social Day Program</p> <p>A 'virtual' bed established for the purpose of recording mental health social day program activity on a patient administration system.</p> <p>Note: Beds in this category may not be used for 'overflow patients'. Generally, mental health social day program activity should be classified as non-admitted patient care and thus should not be recorded on a patient administration system. However, in a few circumstances this activity is performed on an admitted patient basis under a special arrangement, for example for DVA clients at Concord.</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
57	<p>Aged & Disability Social Day Program</p> <p>A 'virtual' bed established for the purpose of recording non-admitted aged and disability social day program activity on a patient administration system.</p> <p>Note: Aged and Disability social day program activity should be classified as non-admitted patient care, and thus recorded on an ambulatory care system, rather than a patient administration system. However if a site chooses to record this activity on a patient administration system, the activity must be clearly identified using this bed type and a "Service Category" of "0 - Boarder". Beds in this category may not be used for 'overflow patients'. Ward transfers transactions to and from this category are not permitted between - rather a formal discharge and formal admission transaction must be performed. An example of a service that would fall into this category is an aged client community program where elderly residents living in the community are invited to attend social days at a Multi Purpose Services where they meet with other elderly clients to play cards, converse, have lunch, etc. This activity should be counted as an ambulatory group activity and reported via Web-DOHRS or ambulatory system unit record feed.</p>
58	<p>Emergency Department – Level 1 or 2</p> <p>A bed, stretcher, trolley or chair in an area within the hospital staffed 24 hours a day and designated as an Emergency Department of Level 1 or Level 2.</p> <p>Note: Beds in this category may NOT be used for 'overflow patients'. Beds in units classified as 'Emergency Medical Units' are excluded from this category.</p>
59	<p>Emergency Medical Unit</p> <p>A bed staffed 24 hours a day that is designated for the accommodation of patients requiring emergency medical care who would otherwise have remained in the Emergency Department until a bed in an alternative ward was made available.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
60	<p>Bassinets:</p> <p>A bed staffed 24 hours a day that is designated for the care of newborns, other than a Federal Government approved neonate special care nursery, or a designated neonate intensive care unit.</p> <p>Beds in this category may either be located next to the mother's bed, or in a separate nursery that does not meet the criteria of a neonate special care nursery.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may NOT be used for 'overflow patients'.</p>
61	<p>Detoxification:</p> <p>A bed staffed 24 hours a day that is designated by the facility for the accommodation of patients requiring drug detoxification care.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are NOT counted as "Days in a Designated Psychiatric Unit", despite the fact they can be co-located with designated psychiatric beds.</p>
62	<p>CAMHSNET Supported Paediatric:</p> <p>A bed that is staffed 24 hours a day, designated by the facility to be a paediatric bed, that is currently being used to accommodate a child or adolescent mental health patient under the Child and Adolescent Mental Health Network (CAMHSNET) program. While admitted to this bed, care is provided by a specially trained CAMHSNET nurse.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may NOT be used for 'overflow patients'. These beds are 'swinging' beds with beds classified as '43 – Paediatric'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit". Patients admitted to beds in this category must be less than 18 years old at the time of formal admission. As this activity is accounted for under Program 5 – Acute Admitted Patient Services, a sub-program is not relevant.</p>

Code	Domain Definition
63	<p>CAMHSNET Supported Psychiatric:</p> <p>A bed that is staffed 24 hours a day, designated by the facility to be a designated adult psychiatric bed, that is currently being used to accommodate a child or adolescent mental health patient under the Child and Adolescent Mental Health Network (CAMHSNET) program.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may NOT be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit". These beds are 'swinging' beds with beds classified designated adult psychiatric beds (such as '04 - Psychiatric Acute Care'). Patients admitted to beds in this category must be less than 18 years old at the time of formal admission. The associated value for the 'Mental Health Financial Sub Program' must be "B".</p>
64	<p>CAMHSNET Acute:</p> <p>A bed staffed 24 hours a day that is specifically designated by the NSW Health Centre for Mental Health to accommodate child or adolescent mental health patients who require acute care. These beds are funded under the Child and Adolescent Mental Health Network (CAMHSNET) program.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may NOT be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit". Patients admitted to beds in this category must be less than 18 years old at the time of formal admission. The associated value for the 'Mental Health Financial Sub Program' must be "B".</p>
65	<p>CAMHSNET Non-Acute:</p> <p>A bed staffed 24 hours a day that is specifically designated by the NSW Health Centre for Mental Health to accommodate child or adolescent mental health patients who require non-acute care. These beds are funded under the Child and Adolescent Mental Health Network (CAMHSNET) program.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may NOT be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit". Patients admitted to beds in this category must be less than 18 years old at the time of formal admission. The associated value for the 'Mental Health Financial Sub Program' must be "B".</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
66	<p>Delivery Suite:</p> <p>A bed able to be staffed 24 hours a day, that is dedicated for the delivery of newborns.</p> <p>Note: It is not a NSW Health requirement to establish delivery suite beds, however where these beds have been established on the patient administration this Bed Type must be used. Beds in this category may NOT be used for 'overflow patients'.</p>
67	<p>Operating Theatre / Recovery:</p> <p>A bed able to be staffed 24 hours a day, that is within a dedicated operating theatre or theatre procedure recovery area.</p> <p>Note: It is not a NSW Health requirement to establish operating theatre / recovery beds, however where these beds have been established on the patient administration this Bed Type must be used. Beds in this category may NOT be used for 'overflow patients'.</p>
68	<p>Mobile Service:</p> <p>A mobile bed located within a vehicle which is used to deliver admitted patient care, including routine procedures, outside the hospital setting. These services are generally run in remote rural areas, and generally intended for routine admitted patient services that can be provided on a same day basis.</p> <p>Note: Beds in this category may NOT be used for 'overflow patients'.</p>
69	<p>Stroke:</p> <p>A bed staffed 24 hours a day that is designated by the facility to accommodate patients who are recovering from a stroke.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'.</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
70	<p>Drug and Alcohol Community Residential:</p> <p>A bed staffed 24 hours a day, located in a community or non-admitted patient setting, that is used to accommodate patients who require treatment for substance use/abuse on a non-admitted patient basis.</p> <p>Note: It is not a requirement for community residential activity to be recorded on a patient administration system, however where it is the activity must be clearly identified by a community residential care bed type so that it is not counted as admitted patient activity. Beds in this category may not be used for 'overflow patients'. Ward transfers transactions to this Bed Type are not permitted, rather a formal discharge and formal admission transaction must be performed. All activity reported under this Bed Type must have a "Service Category" of either "6 – Other Care" or "0 - Boarder".</p>
71	<p>Same Day Chemotherapy:</p> <p>A chair or bed staffed for a limited period each a day that is designated by the facility for the provision of same day chemotherapy and radiation oncology services only.</p> <p>Note: Same Day Chemotherapy units generally have regular business hours and open and close each day at set times. Chairs and beds in this category may only be used for patients receiving a chemotherapy service. This bed type can be used to temporarily accommodate overnight stay patients requiring chemotherapy as part of their overall admitted patient service, however where this occurs the patient must be transferred out to an overnight ward before the end of the business day.</p> <p>The purpose of this bed type is not to identify same day patients, but instead to identify activity in beds that are not staffed 24 hours a day.</p>
72	<p>Sleep Disorder (< 24 Hour Care):</p> <p>A chair or bed staffed for a limited period each a day that is designated by the facility for the provision of same day sleep disorder patients only.</p> <p>Note: Sleep Disorder units generally have regular business hours and open and close each day at set times. Chairs and beds in this category may only be used for patients receiving a sleep disorder service. The purpose of this bed type is not to identify same day patients, but instead to identify activity in beds that are not staffed 24 hours a day.</p>

Code	Domain Definition
73	<p>Same Day Mental Health:</p> <p>A chair or bed staffed for a limited period each a day that is designated by the NSW Health Centre for Mental Health for the provision of same day mental health services only.</p> <p>Note: Same Day Mental Health units generally have regular business hours and open and close each day at set times. Beds in this category include those used to for same day ECT services.</p> <p>Chairs and beds in this category may only be used for patients receiving a mental health service and days spent in this type of bed are counted as “Days in a Designated Psychiatric Unit”.</p> <p>This bed type can be used to temporarily accommodate overnight stay patients however where this occurs the patient must be transferred out to an overnight ward before the end of the business day.</p> <p>The purpose of this bed type is not to identify same day patients, but instead to identify activity in beds that are not staffed 24 hours a day.</p>
74	<p>Same Day Drug and Alcohol:</p> <p>A chair or bed staffed for a limited period each a day that is designated by the facility for the accommodation of patients requiring same day treatment for substance use/abuse; and/or detoxification.</p> <p>Note: Same Day Drug and Alcohol units generally have regular business hours and open and close each day at set times, however in some facilities these units may be open at midnight.</p> <p>Chairs and beds in this category may only be used for patients receiving a drug and alcohol service. This bed type can be used to temporarily accommodate overnight stay patients however where this occurs the patient must be transferred out to an overnight ward before the end of the business day. The purpose of this bed type is not to identify same day patients, but instead to identify activity in beds that are not staffed 24 hours a day.</p> <p>Days spent in this type of bed are NOT counted as “Days in a Designated Psychiatric Unit”, despite the fact they can be co-located with designated psychiatric beds.</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
75	<p>Same Day, Not Elsewhere Classified:</p> <p>A chair or bed staffed for a limited period each a day that is designated by the facility for the provision of same day services only, and not covered by any other same day Bed Type category.</p> <p>Note: Other Same Day units generally have regular business hours and open and close each day at set times. This bed type can be used to temporarily accommodate overnight stay patients however where this occurs the patient must be transferred out to an overnight ward before the end of the business day. The purpose of this bed type is not to identify same day patients, but instead to identify activity in beds that are not staffed 24 hours a day.</p>
76	<p>Transit Lounge:</p> <p>A chair or lounge used to temporarily accommodate patients that no longer require care within a specific ward, are medically ready to be discharged, and unable to be formally discharged due to a requirement for further observation or limited care by nursing staff, return of test results, fulfilment of prescriptions, completion of administrative tasks, etc. These chairs or lounges are generally used to address the problem of access block to overnight wards.</p> <p>Note: It is not a requirement for transit lounge beds to be established on a patient administration system, however where they are established the bed must be mapped to this category and the patient movement should be reflected via a bed/ward transfer on the patient administration system. The time of formal discharge should be the time the patient departs the lounge, and the movements and transfer times should be recorded in the patient's medical record. Beds in this category may not be used for 'overflow patients'. These beds should not be counted as overnight available beds.</p>

78	<p>Transitional Care – Community Based – Federal & State Mix Funding:</p> <p>A flexible care place located in the community under the terms of the Australian Government Transition Care Program Guidelines and the Aged Care Act 1997.</p> <p>Transitional Aged Care places must be used to provide a mix of services for older people at the conclusion of a hospital admission. Services will include low intensity therapy such as physiotherapy, occupational therapy and social work and nursing support and/or personal care for clients to complete their restorative process and optimise their functional capacity. Services are provided for a limited time period of up to 12 weeks with a possible extension of another 6 weeks.</p> <p>The clients accommodated in these places must:</p> <ul style="list-style-type: none"> • have completed their acute and sub-acute episodes of care, be medically stable and discharged from hospital upon entry to the Transitional Aged Care Program, • have an ACAT approval to receive transitional aged care, • be eligible to receive permanent residential aged care at least at a low level of care. <p>Note: These places are NOT admitted hospital in-patient beds.</p>
79	<p>Gynaecology:</p> <p>A bed staffed 24 hours a day and designated by the facility to primarily accommodate gynaecology patients of a non-specific age.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may be used for 'overflow patients' (that is, patients who would usually be accommodated in another Bed Type if those beds were available).</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
80	<p>Same Day Medical:</p> <p>A chair or bed staffed for a limited period each a day that is designated by the facility for the provision of same day medical services only.</p> <p>Note: Other Same Day units generally have regular business hours and open and close each day at set times. This bed type can be used to temporarily accommodate overnight stay patients however where this occurs the patient must be transferred out to an overnight ward before the end of the business day. The purpose of this bed type is not to identify same day patients, but instead to identify activity in beds that are not staffed 24 hours a day.</p>
81	<p>Same Day Surgical:</p> <p>A chair or bed staffed for a limited period each a day that is designated by the facility for the provision of same day surgical services only.</p> <p>Note: Other Same Day units generally have regular business hours and open and close each day at set times. This bed type can be used to temporarily accommodate overnight stay patients however where this occurs the patient must be transferred out to an overnight ward before the end of the business day. The purpose of this bed type is not to identify same day patients, but instead to identify activity in beds that are not staffed 24 hours a day.</p>
82	<p>Extended Short Stay Surgical (< 24 hrs)</p> <p>A chair or bed staffed for a time period within each 24 hours that is designated by the facility for the provision of surgical services only.</p> <p>23 Hour Care Units are based on the premise that the majority of surgical care can be administered within a 24-hour period in a non-ward environment. Patients can be admitted, prepared for the surgical procedure, then monitored and provided with appropriate pain relief post-surgery before protocol based discharge occurs within 24 hours.</p> <p>Extended Day Only (EDO) can be for emergency or elective procedures (surgery and occasionally non surgery e.g. diagnostic procedures, medical procedures).</p> <p>EDO beds may be staffed on a 24/7 basis depending on the facility (hence emergency surgery of EDO type can be accommodated).</p> <p>Some units may choose to have Day Only & Extended Day Only co-located.</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
83	<p>Residential Aged Care, Not Further Defined:</p> <p>A bed block funded by the federal Government, for the provision of either high level (nursing home), low level (hostel) or respite residential aged care. These beds are NOT counted admitted patient beds.</p> <p>These beds may be located in Public Nursing Homes, Multi Purpose Services, and a small number specially approved public hospitals (for example, rural hospitals that have lodged an application to become a Multi Purpose Service).</p> <p>Note: Beds in this category may not be used for 'overflow patients'. Ward transfers transactions to this Bed Type are not permitted. For all other ward transfers to this Bed Type a formal discharge and formal admission transaction must be performed.</p>
84	<p>ComPacks – Approved Patient Packages:</p> <p>THIS BED TYPE IS NOT CURRENTLY IN USE</p>
85	<p>Psychiatric Emergency:</p> <p>A bed staffed 24 hours a day that is designated by the NSW Health Centre for Mental Health to accommodate patients who present to hospital Emergency Departments with acute mental illness and require specialised mental health care and observation prior to disposal (e.g. transportation, transfer to another admitted patient bed, transfer to another designated psychiatric bed or discharge). They may be admitted as either voluntary or involuntary patients under the Mental Health Act. These beds are co-located and associated with the Emergency Department of a hospital.</p> <p>Note: Beds in this category may be used for a mix of both day stay and overnight patients, but must be staffed for overnight patient care. Beds in this category may not be used for 'overflow patients'. Days spent in this type of bed are counted as "Days in a Designated Psychiatric Unit".</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Code	Domain Definition
86	<p>Respite - Not Further Defined:</p> <p>A bed block funded by the federal Government, for the provision of residential aged care to short stay respite clients. These beds are NOT counted admitted patient beds.</p> <p>These beds may be located in Public Nursing Homes, Multi Purpose Services, and a small number specially approved public hospitals (for example, rural hospitals that have lodged an application to become a Multi Purpose Service).</p> <p>Note: Beds in this category may not be used for 'overflow patients'. Ward transfers transactions to this Bed Type are not permitted, except between this Bed Type and Bed Type "52 – Respite – Low: Federal Govt. Block Funded". For all other ward transfers to this Bed Type a formal discharge and formal admission transaction must be performed. In Multi Purpose Services "virtual" beds will need to be established under this Bed Type for situations where high level respite residential aged care is provided in a bed usually designed for respite low care, long stay residential aged care, or admitted patient activity.</p>
87	<p>Medical Assessment Unit (MAU):</p> <p>A bed in a dedicated Medical Assessment Unit (MAU) which is a physical ward that is close to the Emergency Department although not co-located.</p> <p>The MAU is an alternative pathway for adult non-critical medical patients; in many cases these will be elderly complex medical patients with co-morbidities.</p> <p>Patients within the MAU can expect to stay for a period of up to 48 hours, after this time most will be discharged home (with community services where appropriate), while some who require specialised care will be transferred to an inpatient bed.</p>
99	<p>Lodger / Boarder Beds:</p> <p>Beds used to accommodate boarders and lodgers who are not in receipt of health care. People accommodated in these beds are commonly relatives (e.g. parents or children) of patients.</p> <p>Most activity reported under this Bed Type would have a Service Category of "0 – Hospital Boarder", however where clinical coding needs to be reported for a local requirement non-admitted patient activity may also be reported as "6 – Other Care".</p>

Title: New Bed Type Categories for Reporting Purposes from March 2008

Clarifying Points:

Not Applicable

Collection Methods:

Bed Type is attached to a bed in patient administration systems. Staff record bed / ward movements on the patient administration system and the Bed Type is recorded or linked in the back end of the system.

Screen Prompts:

The screen prompts below are recommended where this information is collected on a computer screen.

Question Module:

Bed Type

Not Applicable

Validation Rules:

= 01, 02, 03, 04, 05, 06, 07, 08, 09, 12, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 24, 25, 26, 28, 29, 30, 32, 33, 34, 37, 38, 39, 40, 41, 42, 43, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 99.

Justification:

This information is collected for the purpose of:

- Identifying activity within special purpose inpatient units located in hospitals. The clinical profile of patients admitted to such units, as distinct from those admitted to a general ward, can be determined,
- Monitoring the utilisation patterns of state-wide units. Many of these units are psychiatric units that must be monitored individually to satisfy National and State reporting requirements,
- Measuring "Hospital in the Home" days
- Accounting for "Contracted Care" activity
- Accounting for "Transitional Care" activity
