

# INDEPENDENT AUDITOR'S REPORT

# SOUTH EASTERN SYDNEY AND ILLAWARRA AREA HEALTH SERVICE AND ITS CONTROLLED ENTITY

To Members of the New South Wales Parliament

I have audited the accompanying financial statements of South Eastern Sydney and Illawarra Area Health Service (the Service), which comprises statements of financial position as at 30 June 2010, the statements of comprehensive income, statements of changes in equity, statements of cash flows and service group statements for the year then ended, a summary of significant accounting policies and other explanatory notes for both the Service and the consolidated entity. The consolidated entity comprises the Service and the entities it controlled at the year's end or from time to time during the financial year.

### **Auditor's Opinion**

In my opinion, the financial statements:

- present fairly, in all material respects, the financial position of the Service and the consolidated entity as at 30 June 2010, and of their financial performance for the year then ended in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations)
- are in accordance with section 45E of the Public Finance and Audit Act 1983 (the PF&A Act)
   and the Public Finance and Audit Regulation 2010

My opinion should be read in conjunction with the rest of this report.

# Chief Executive's Responsibility for the Financial Statements

The Chief Executive is responsible for the preparation and fair presentation of the financial statements in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the PF&A Act. This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

# Auditor's Responsibility

My responsibility is to express an opinion on the financial statements based on my audit. I conducted my audit in accordance with Australian Auditing Standards. These Auditing Standards require that I comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Chief Executive, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

My opinion does not provide assurance:

- about the future viability of the Service or consolidated entity,
- that they have carried out their activities effectively, efficiently and economically,
- about the effectiveness of their internal controls, or
- on the assumptions used in formulating the budget figures disclosed in the financial statements.

# Independence

In conducting this audit, the Audit Office of New South Wales has complied with the independence requirements of the Australian Auditing Standards and other relevant ethical requirements. The PF&A Act further promotes independence by:

- providing that only Parliament, and not the executive government, can remove an Auditor-General, and
- mandating the Auditor-General as auditor of public sector agencies but precluding the provision of non-audit services, thus ensuring the Auditor-General and the Audit Office of New South Wales are not compromised in their role by the possibility of losing clients or income.

A T Whitfield

Acting Auditor-General

a. V. Whiteld

5 October 2010 SYDNEY

# Certification of Parent/Consolidated Financial Statements For the Period Ended 30 June 2010

The attached financial statements of the South Eastern Sydney and Illawarra Area Health Service for the year ended 30 June 2010:

- i) Have been prepared in accordance with the requirements of applicable Australian Accounting Standards which include Australian equivalents to International Financial Reporting Standards (AEIFRS), the requirements of the *Public Finance and Audit Act 1983* and its regulations, the Health Services Act 1997 and its regulations, the Accounts and Audit Determination and the Accounting Manual for Area Health Services and Public Hospitals;
- ii) Present fairly the financial position and transactions of the South Eastern Sydney and Illawarra Area Health Service;
- iii) Have no circumstances which would render any particulars in the financial statements to be misleading or inaccurate; and
- the internal controls exercised by the South Eastern Sydney and Illawarra Area Health Service are appropriate and effective in accounting for all income received and applied by the South Eastern Sydney and Illawarra Area Health Service from any of its fundraising appeals.

**Chief Executive** 

South Eastern Sydney and Illawarra Area Health Service

30 September 2010

Chief Financial Officer
South Eastern Sydney and

Illawarra Area Health Service

- The name and purpose of each service group is summarised in Note 17.
The Service Group Statement uses statistical date to 30 June 2009 (and 31 March 2010 for General Funds Expenditure) to allocate the current general fund period's financial information on Expenses and income to each Service Group.
No changes have occurred during the period between 1 April 2010 and 30 June 2010 which would materially impact this allocation.

The name and purpose of each service group is summarised in Note 17

Assets and liabilities the specific to service groups are altocated accordingly eg. Non-Current Assets Held for Sele.
Remaining assets and liabilities incurred to service groups in accordance with the methodology advised in Note 2 (set), thereby ensuring that the benefit of each asset and the liabilities incurred in the provision of services are duly recognised in each service group.

### 1. The Health Service Reporting Entity

The South Eastern Sydney Illawarra Area Health Service was established under the provisions of the Health Services Act with effect from 1 January 2005.

The Health Service, as a reporting entity, comprises all the operating activities of the Hospital facilities and the Community Health Centres under its control. It also encompasses the Special Purposes and Trust Funds which, while containing assets which are restricted for specified uses by the grantor or the donor, are nevertheless controlled by the Health Service. The Health Service is a not-for-profit entity (as profit is not its principal objective).

The South Eastern Sydney Illawarra Area Health Service Special Purpose Service Entity was established as a Division of the Government Service on 17 March 2006 in accordance with the Public Sector Employment and Management Act 2002 and the Health Services Act 1997. These Divisions provide personnel services to enable a Health Service to exercise its functions.

As a consequence the values in the annual financial statements presented herein consist of the Health Service (as the parent entity), the financial statements of the special purpose entity division and the consolidated financial statements of the economic entity. Notes capture both the parent and consolidated values with notes 3, 4, 13, 27, 29 and 34 being especially relevant.

In the process of preparing the consolidated financial statements for the economic entity consisting of the controlling and controlled entities, all inter-entity transactions and balances have been eliminated.

The reporting entity is consolidated as part of the financial statements prepared for both the NSW Department of Health and the NSW Total State Sector Accounts.

These consolidated financial statements for the year ended 30 June 2010 have been authorised for issue by the Chief Executive on 30 September 2010.

### 2. Summary of Significant Accounting Policies

The Health Service's financial statements are general purpose financial statements which have been prepared in accordance with applicable Australian Accounting Standards (which include Australian Accounting Interpretations), the requirements of the *Health Services Act 1997* and its regulations including observation of the Accounts and Audit Determination for Area Health Services and Public Hospitals.

Property, plant and equipment, investment property, assets (or disposal groups) held for sale and financial assets at "fair value through profit and loss" and available for sale are measured at fair value. Other financial statement items are prepared in accordance with the historical cost convention.

All amounts are rounded to the nearest one thousand dollars and are expressed in Australian currency.

Judgments, key assumptions and estimations made by management are disclosed in the relevant notes to the financial statements.

Except when an Australian Accounting Standard permits or requires otherwise, comparative information is disclosed in respect of the previous period for all amounts reported in the financial statements.

No new or revised accounting standards or interpretations are adopted earlier than their prescribed date of application. Set out below are changes to be effected, their date of application and the possible impact on the financial statements of the South Eastern Sydney & Illawarra Area Health Service.

### **Accounting Standard/Interpretation**

AASB 9, Financial Instruments and AASB 2009-11, Amendments to Australian Accounting Standards arising from AASB 9, have application from 1 July 2013 and focus on simplifying the classifications of financial assets into those carried at amortised cost and those carried at fair value. They also simplify the requirements for embedded derivatives and remove the tainting rules associated with held-to-maturity assets. They have been assessed as having no material impact on the Health Service.

AASB 1053, Application of tiers of Australian Accounting Standards, has application from 1 July 2013 and establishes a differential reporting framework consisting of two tiers of reporting requirements. Tier 1 entities will continue to apply existing Australian Accounting Standards. Tier 2 entities will apply the same recognition, measurement and presentation requirements but reduced disclosure requirements. Tier 2 entities include the majority of public sector entities. This standard has been assessed as having no material impact on the Health Service.

AASB 2009-5, Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project, has application from 1 July 2010 and comprises accounting changes for presentation, recognition or measurement purposes. This standard has been assessed as having no material impact on the Health Service.

AASB 2009-8, Amendments to Australian Accounting Standards - Group Cash-settled Share-based Payment Transactions, has application from 1 July 2010 and makes amendments which clarify the scope of AASB 2 by requiring an entity that receives goods or services in a share-based payment arrangement to account for those goods or services no matter which entity in the group settles the transaction, and no matter whether the transaction is settled in shares or cash. This standard has been assessed as having no impact on the Health Service.

AASB 2009-9, Amendments to Australian Accounting Standards - Additional Exemptions for First-time Adopters, has application from 1 July 2010 and makes amendments to ensure that entities applying Australian Accounting Standards for the first time will not face undue cost or effort in the transition process in particular situations. This standard has been assessed as having no impact on the Health Service.

AASB 2009-10, Amendments to Australian Accounting Standards- Classification of Rights Issues, has application from 1 July 2010 and provides clarification concerning equity instruments. This standard has been assessed as having no material impact on the Health Service.

AASB 124, Related Party Disclosures and AASB 2009-12, Amendments to Australian Accounting Standards, have application from 1 July 2011 and simplify the definition of a related party. They have been assessed as having no impact on the Health Service.

Interpretation 19, Extinguishing Financial Liabilities with Equity Instruments and AASB 2009-13, Amendments to Australian Accounting Standards arising from Interpretation 19, have application from 1 July 2010 and addresses the accounting by an entity when the terms of a financial liability are renegotiated and result in the entity issuing equity instruments to a creditor to extinguish all or part of the financial liability. They have been assessed as having no impact on the Health Service.

AASB 2009-14, Amendments to Australian Interpretation - Prepayments of a Minimum Funding Requirement, has application from 1 July 2011 and makes limited - application amendments to Interpretation 14 AASB 119 - The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction. This standard has been assessed as having no impact on the Health Service.

AASB 2010-1, Amendments to Australian Accounting Standards - Limited Exemption from Comparative AASB 7 Disclosures for First-time Adopters, has application from 1 July 2010 and provides additional exemption on IFRS transition in relation to AASB 7 Financial Instruments: Disclosures, to avoid the potential use of hindsight and to ensure that first-time adopters are not disadvantaged as compared with current IFRS-compliant preparers. This standard has been assessed as having no impact on the Health Service.

AASB 2010-2, Amendments to Australian Accounting Standards arising from Reduced Disclosure Requirements, has application from 1 July 2013 and determines disclosures in Australian Accounting Standards from which Tier 2 entities are exempt. This standard has been assessed as having no material impact on the Health Service.

AASB 2010-3 and AASB 2010-4, Amendments to Australian Accounting Standards arising from the Annual Improvements Project, have application from 1 January 2011 and amend a number of different Australian Accounting Standards. These standards have been assessed as having no material impact on the Health Service.

Other significant accounting policies used in the preparation of these financial statements are as follows:

### a) Employee Benefits and Other Provisions

# i) Salaries & Wages, Annual Leave, Sick Leave and On-Costs

At the consolidated level of reporting, liabilities for salaries and wages (including non-monetary benefits), annual leave and paid sick leave that are due to be settled within 12 months after the end of the period in which the employees render the service are recognised and measured in respect of employees' services up to the reporting date at undiscounted amounts based on the amounts expected to be paid when the liabilities are settled.

All Annual Leave employee benefits are reported as "Current" as there is an unconditional right to payment. Current liabilities are then further classified as "Short Term" or "Long Term" based on past trends and known resignations and retirements. Anticipated payments to be made in the next twelve months are reported as "Short Term". On-costs of 17% are applied to the value of leave payable at 30 June 2010, such on-costs being consistent with actuarial assessment (Comparable on-costs for 30 June 2009 were also 17%).

Unused non-vesting sick leave does not give rise to a liability as it is not considered probable that sick leave taken in the future will be greater than the benefits accrued in the future.

The outstanding amounts of workers' compensation insurance premiums and fringe benefits tax, which are consequential to employment, are recognised as liabilities and expenses where the employee benefits to which they relate have been recognised.

### ii) Long Service Leave and Superannuation

At the consolidated level of reporting, long service leave entitlements are dissected as "Current" if there is an unconditional right to payment and "Non-Current" if the entitlements are conditional. Current entitlements are further dissected between "Short Term" and "Long Term" on the basis of anticipated payments for the next twelve months. This in turn is based on past trends and known resignations and retirements.

Long service leave provisions are measured on a short hand basis at an escalated rate of 18.3% (9.8% at 30 June 2009) for all employees with five or more years of service. The escalation applied is consistent with actuarial assessment and is affected in the main by the fall in the Commonwealth Government 10 year bond yield which is used as the discount rate.

The Health Service's liability for the closed superannuation pool schemes (State Authorities Superannuation Scheme and State Superannuation Scheme) is assumed by the Crown Entity. The Health Service accounts for the liability as having been extinguished resulting in the amount assumed being shown as part of the non-monetary revenue item described as "Acceptance by the Crown Entity of Employee Benefits". Any liability attached to Superannuation Guarantee Charge cover is reported in Note 27, "Payables".

The superannuation expense for the financial year is determined by using the formulae specified by the NSW Department of Health. The expense for certain superannuation schemes (ie Basic Benefit and First State Super) is calculated as a percentage of the employees' salary. For other superannuation schemes (ie State Superannuation Scheme and State Authorities Superannuation Scheme), the expense is calculated as a multiple of the employees' superannuation contributions.

# iii) Other Provisions

Other provisions exist when: the Health Service has a present legal or constructive obligation as a result of a past event; it is probable that an outflow of resources will be required to settle the obligation; and a reliable estimate can be made of the amount of the obligation.

### b) Insurance

The Health Service's insurance activities are conducted through the NSW Treasury Managed Fund Scheme of self insurance for Government Agencies. The expense (premium) is determined by the Fund Manager based on past claim experience.

### c) Finance Costs

Finance costs are recognised as expenses in the period in which they are incurred, in accordance with the Department's Mandate to not-for profit general government sector agencies.

### d) Income Recognition

Income is measured at the fair value of the consideration or contribution received or receivable. Additional comments regarding the accounting policies for the recognition of revenue are discussed below.

### Sale of Goods and Services

Revenue from the sale of goods is recognised as revenue when the agency transfers the significant risks and rewards of ownership of the assets.

The Commonwealth Highly Specialised Drug program was varied from 1 July 2009. The State now claims on a recovery basis the cost of highly specialised drugs through Medicare (Commonwealth).

In Previous years these funds were received within annual Government Allocation from the NSW Department of Health.

### Rendering of Services

Revenue is recognised of services is generally recognised as revenue when the service is provided.

### Patient Fees

Patient Fees are derived from chargeable inpatients and non-inpatients on the basis of rates specified by the NSW Department of Health from time to time.

### Investment Revenue

Interest revenue is recognised using the effective interest method as set out in AASB139, Financial Instruments: Recognition and Measurement. Rental revenue is recognised in accordance with AASB117 Leases on a straight line basis over the lease term. Dividend revenue is recognised in accordance with AASB118 Revenue when the Health Service's right to receive payment is established.

Royalty revenue is recognised in accordance with AASB118 on an accrual basis in accordance with the substance of the relevant agreement.

# Debt Forgiveness

Debts are accounted for as extinguished when and only when settlement occurs through repayment or replacement by another liability.

### Use of Hospital Facilities

Specialist doctors with rights of private practice are subject to an infrastructure charge for the use of hospital facilities at rates determined by the NSW Department of Health. Charges consist of two components:

- \* a monthly charge raised by the Health Service based on a percentage of receipts generated
- \* the residue of the Private Practice Trust Fund at the end of each financial year, such sum being credited for Health Service use in the advancement of the Health Service or individuals within it.

### Use of Outside Facilities

The Health Service uses a number of facilities owned and maintained by the local authorities in the area to deliver community health services for which no charges are raised by the authorities. The cost method of accounting is used for the initial recording of all such services. Cost is determined as the fair value of the services given and is then recognised as revenue with a matching expense.

### Grants and Contributions

Grants and Contributions are generally recognised as revenues when the Health Service obtains control over the assets comprising the contributions. Control over contributions is normally obtained upon the receipt of cash.

# NSW Department of Health Allocations

Payments are made by the NSW Department of Health on the basis of the allocation for the Health Service as adjusted for approved supplementations mostly for salary agreements, patient flows between Health Services and approved enhancement projects. This allocation is included in the Statement of Comprehensive Income before arriving at the "Result for the Year" on the basis that the allocation is earned in return for the health services provided on behalf of the Department. Allocations are normally recognised upon the receipt of Cash.

General operating expenses/revenues of Calvary Health Care Sydney, Eastern Sydney Scarba and Early Intervention Program, Sacred Heart Hospice, St Vincent Hospital and War Memorial Hospital (Waverley) have only been included in the Statement of Comprehensive Income prepared to the extent of the cash payments made to the Health Organisations concerned. The Health Service is not deemed to own or control the various assets/liabilities of the aforementioned Health Organisations and such amounts have been excluded from the Statement of Financial Position. Any exceptions are specifically listed in the notes that follow.

# e) Accounting for the Goods & Services Tax (GST)

Income, expenses and assets are recognised net of the amount of GST, except that:

- \* the amount of GST incurred by the Health Service as a purchaser that is not recoverable from the Australian Taxation Office is recognised as part of the cost of acquisition of an asset or as part of an item of expense and
- receivables and payables are stated with the amount of GST included.

Cash flows are included in the Statement of Cash Flows on a gross basis. However, the GST components of cash flows arising from investing and financing activities which is recoverable from, or payable to, the Australian Taxation Office are classified as operating cash flows.

### f) Inter Area and Interstate Patient Flows

Inter Area Patient Flows

Health Services recognise patient flows for patients they have treated that live outside the Service's regional area. The flows recognised are for acute inpatients (other than Mental Health Services), emergency and rehabilitation and extended care.

Patient flows have been calculated using benchmarks for the cost of services for each of the categories identified and deducting estimated revenue, based on the payment category of the patient. The flow information is based on activity for the last completed calendar year. The NSW Department of Health accepts that category identification for various surgical and medical procedures is impacted by the complexities of the coding process and the interpretation of the coding staff when coding a patient's medical records. The Department reviews the flow information extracted from Health Service records and once it has accepted it, requires each Health Service and the Children's Hospital at Westmead to bring to account the value of patient flows in accordance with the Department's assessment.

The adjustments have no effect on equity values as the movement in Net Cost of Services is matched by a corresponding adjustment to the value of the NSW Department of Health Recurrent Allocation.

Inter State Patient Flows

Health Services recognise the outflow of acute inpatients that are treated by other States and Territories within Australia who normally reside in the Service's residential area. The Health Services also recognise the value of inflows for acute inpatient treatment provided to residents from other States and territories. The expense and revenue values reported within the financial statements have been based on 2008/09 activity data using standard cost weighted separation values to reflect estimated costs in 2009/10 for acute weighted inpatient separations. Where treatment is obtained outside the home health service, the State/Territory providing the service is reimbursed by the benefiting Area.

The reporting adopted for both inter area and interstate patient flows aims to provide a greater accuracy of the cost of service provision to the Area's resident population and disclose the extent to which service is provided to non-residents.

The composition of patient flow expense/revenue is disclosed in Notes 5 and 10.

### g) Acquisition of Assets

The cost method of accounting is used for the initial recording of all acquisitions of assets controlled by the Health Service. Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire the asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Australian Accounting Standards.

Assets acquired at no cost, or for nominal consideration, are initially recognised as assets and revenues at their fair value at the date of acquisition (See also assets transferred as a result of an equity transfer Note 2(z)).

Fair value is the amount for which an asset could be exchanged between knowledgeable, willing parties in an arm's length transaction.

Where payment for an asset is deferred beyond normal credit terms, its cost is the cash price equivalent, ie the deferred payment amount is effectively discounted at an asset-specific rate.

Land and Buildings which are owned by the Health Administration Corporation or the State and administered by the Health Service are deemed to be controlled by the Health Service and are reflected as such in the financial statements.

# h) Capitalisation Thresholds

Individual items of property, plant & equipment are capitalised where their cost is \$10,000 or above.

### i) Depreciation of Property, Plant and Equipment

Depreciation is provided for on a straight-line basis for all depreciable assets so as to write off the depreciable amount of each asset as it is consumed over its useful life to the Health Service. Land is not a depreciable asset. All material separately identifiable components of assets are depreciated over their shorter useful lives.

Details of depreciation rates initially applied are consistent with previous years major asset categories and are as follows:

Buildings	2.5%
Electro Medical Equipment	
- Costing less than \$200,000	10.0%
- Costing more than or equal to \$200,000	12.5%
Computer Equipment	20.0%
Infrastructure Systems	2.5%
Motor Vehicle Sedans	12.5%
Motor Vehicles, Trucks & Vans	20.0%
Office Equipment	10.0%
Plant and Machinery	10.0%
Linen	25.0%
Furniture, Fittings and Furnishings	5.0%

"Infrastructure Systems" means assets that comprise public facilities and which provide essential services and enhance the productive capacity of the economy including roads, bridges, water infrastructure and distribution works, sewerage treatment plants, seawalls and water reticulation systems.

Depreciation rates are subsequently varied where changes occur in the assessment of the remaining useful life of the assets reported.

# j) Revaluation of Non-Current Assets

Physical non-current assets are valued in accordance with the NSW Department of Health's "Valuation of Physical Non-Current Assets at Fair Value" policy. This policy adopts fair value in accordance with AASB116, *Property*, *Plant and Equipment* and AASB140, *Investment Property*. Investment property is separately discussed at Note 2(o).

Property, plant and equipment is measured on an existing use basis, where there are no feasible alternative uses in the existing natural, legal, financial and socio-political environment. However, in the limited circumstances where there are feasible alternative uses, assets are valued at their highest and best use.

The Health Service revalues its Land and Buildings and Infrastructure at minimum every three years by independent valuation. The last revaluation for assets assumed by the Health Service as at 1 July 2007 was completed on 31 March 2008 and was based on an independent assessment. To ensure that the carrying amount for each asset does not differ materially from its fair value at reporting date, indices provided in expert advice from the Department of Lands are applied. The indices reflect an assessment of movements made in the period between revaluations.

Non-specialised assets with short useful lives are measured at depreciated historical cost, as a surrogate for fair value.

When revaluing non-current assets by reference to current prices for assets newer than those being revalued (adjusted to reflect the present condition of the assets), the gross amount and the related accumulated depreciation are separately restated.

For other assets, any balances of accumulated depreciation existing at the revaluation date in respect of those assets are credited to the asset accounts to which they relate. The net asset accounts are then increased or decreased by the revaluation increments or decrements.

Revaluation increments are credited directly to the asset revaluation reserve, except that, to the extent that an increment reverses a revaluation decrement in respect of that class of asset previously recognised as an expense in the Result for the Year, the increment is recognised immediately as revenue in the Result for the Year.

Revaluation decrements are recognised immediately as expenses in the Result for the Year, except that, to the extent that a credit balance exists in the asset revaluation reserve in respect of the same class of assets, they are debited directly to the asset revaluation reserve.

As a not-for-profit entity, revaluation increments and decrements are offset against one another within a class of non-current assets, but not otherwise.

Where an asset that has previously been revalued is disposed of, any balance remaining in the asset revaluation reserve in respect of that asset is transferred to accumulated funds.

### k) Impairment of Property, Plant and Equipment

As a not-for-profit entity with no cash generating units, the Health Service is effectively exempt from AASB 136 *Impairment of Assets* and impairment testing. This is because AASB136 modifies the recoverable amount test to the higher of fair value less costs to sell and depreciated replacement cost. This means that, for an asset already measured at fair value, impairment can only arise if selling costs are regarded as material. Selling costs are regarded as immaterial.

# I) Assets Not Able to be Reliably Measured

The Health Service may at times hold certain assets that are not recognised in the Statement of Financial Position because the Health Service is unable to measure reliably the value of the assets. The Health Service has not identified any assets which are not able to be reliably measured.

### m) Restoration Costs

The estimated cost of dismantling and removing an asset and restoring the site is included in the cost of an asset, to the extent it is recognised as a liability.

### n) Non-Current Assets (or disposal groups) Held for Sale

The Health Service has certain non-current assets (or disposal groups) classified as held for sale, where their carrying amount will be recovered principally through a sale transaction, not through continuing use. Non-current assets (or disposal groups) held for sale are recognised at the lower of carrying amount and fair value less costs to sell. These assets are not depreciated while they are classified as held for sale.

# o) Investment Properties

Investment property is held to earn rentals or for capital appreciation, or both. However, for not-for-profit entities, property held to meet service delivery objectives rather than to earn rental or for capital appreciation does not meet the definition of investment property and is accounted for under AASB 116 *Property, Plant and Equipment*. The Health Service does not have any property that meets the definition of Investment Property.

### p) Intangible Assets

The Health Service recognises intangible assets only if it is probable that future economic benefits will flow to the Health Service and the cost of the asset can be measured reliably. Intangible assets are measured initially at cost. Where an asset is acquired at no or nominal cost, the cost is its fair value as at the date of acquisition. All research costs are expensed. Development costs are only capitalised when certain criteria are met.

The useful lives of intangible assets are assessed to be finite.

Intangible assets are subsequently measured at fair value only if there is an active market. As there is no active market for the Health Service's intangible assets, the assets are carried at cost less any accumulated amortisation.

### q) Maintenance

Day-to-day servicing costs or maintenance are charged as expenses as incurred, except where they relate to the replacement of a part or component of an asset, in which case the costs are capitalised and depreciated.

### r) Leased Assets

A distinction is made between finance leases which effectively transfer from the lessor to the lessee substantially all the risks and benefits incidental to ownership of the leased assets, and operating leases under which the lessor effectively retains all such risks and benefits.

Where a non-current asset is acquired by means of a finance lease, the asset is recognised at its fair value at the commencement of the lease term. The corresponding liability is established at the same amount. Lease payments are allocated between the principal component and the interest expense.

Operating lease payments are charged to the Statement of Comprehensive Income in the periods in which they are incurred.

### s) Inventories

Inventories are stated at cost, adjusted when applicable for any loss of service potential. A loss of service potential is identified and measured based on the existence of a current replacement cost that is lower than the carrying amount. Costs are assigned to individual items of stock mainly on the basis of weighted average costs.

All inventory at year end are to be consumed in the course of business and are not held for distribution. Obsolete items are disposed of in accordance with instructions issued by the NSW Department of Health.

# t) Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These financial assets are recognised initially at fair value, usually based on the transaction cost or face value. Subsequent measurement is at amortised cost using the effective interest method, less an allowance for any impairment of receivables. Any changes are recognised in the Result for the Year when impaired, derecognised or through the amortisation process.

Short-term receivables with no stated interest rate are measured at the original invoice amount where the effect of discounting is immaterial.

### u) Investments

investments are initially recognised at fair value plus, in the case of investments not at fair value through profit or loss, transaction costs. The South Eastern Sydney and Illawarra Area Health Service determines the classification of its financial assets after initial recognition and, when allowed and appropriate, re-evaluates this at each financial year end.

Fair value through profit or loss - The South Eastern Sydney and Illawarra Area Health Service subsequently measures investments classified as "held for trading" or designated upon initial recognition "at fair value through profit or loss" at fair value. Financial assets are classified as "held for trading" if they are acquired for the purpose of selling in the near term. Derivatives are also classified as held for trading. Gains or losses on these assets are recognised in the Result for the Year.

The Hour-Glass Investment facilities are designated at fair value through profit or loss using the second leg of the fair value option i.e. these financial assets are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management strategy, and information about these assets is provided internally on that basis to the agency's key management personnel.

The risk management strategy of the Health Service has been developed consistent with the investment powers granted under the provision of the Public Authorities (Financial Arrangements) Act. T Corp investments are made in an effort to improve interest returns on cash balances otherwise available whilst also providing secure investments guaranteed by the State market exposures.

The movement in the fair value of the Hour-Glass Investment facilities incorporates distributions received as well as unrealised movements in fair value and is reported in the line item 'investment revenue'.

- \* Held-to-maturity investments Non-derivative financial assets with fixed or determinable payments and fixed maturity that the South Eastern Sydney and Illawarra Area Health Service has the positive intention and ability to hold to maturity are classified as "held-to-maturity". These investments are measured at amortised cost using the effective interest method. Changes are recognised in the Result for the Year when impaired, derecognised or through the amortisation process.
- \* Available-for-sale investments Any residual investments that do not fall into any other category are accounted for as available-for-sale investments and measured at fair value in other comprehensive income until disposed or impaired, at which time the cumulative gain or loss previously recognised in other comprehensive income is recognised in the Result for the Year. However, interest calculated using the effective interest method and dividends are recognised in the Result for the Year.

Purchases or sales of investments under contract that require delivery of the asset within the timeframe established by convention or regulation are recognised on the trade date; i.e. the date the Health Service commits to purchase or sell the asset.

The fair value of investments that are traded at fair value in an active market is determined by reference to quoted current bid prices at the close of business on the Statement of Financial Position date.

# v) Impairment of financial assets

All financial assets, except those measured at fair value through profit and loss, are subject to an annual review for impairment. An allowance for impairment is established when there is objective evidence that the entity will not be able to collect all amounts due.

For financial assets carried at amortised cost, the amount of the allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of the impairment loss is recognised in the Result for the Year.

When an available for sale financial asset is impaired, the amount of the cumulative loss is removed from equity and recognised in the Result for the Year, based on the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss previously recognised in the Result for the Year.

Any reversals of impairment losses are reversed through the Result for the Year, where there is objective evidence, except reversals of impairment losses on an investment in an equity instrument classified as "available for sale" must be made through the reserve. Reversals of impairment losses of financial assets carried at amortised cost cannot result in a carrying amount that exceeds what the carrying amount would have been had there not been an impairment loss.

# w) De-recognition of financial assets and financial liabilities

A financial asset is derecognised when the contractual rights to the cash flows from the financial assets expire; or if the Health Service transfers the financial asset:

Where the Health Service has neither transferred nor retained substantially all the risks and rewards or transferred control, the asset is recognised to the extent of the Health Service's continuing involvement in the asset.

A financial liability is derecognised when the obligation specified in the contract is discharged or cancelled or expires.

# x) Payables

These amounts represent liabilities for goods and services provided to the Health Service and other amounts. Payables are recognised initially at fair value, usually based on the transaction cost or face value. Subsequent measurement is at amortised cost using the effective interest method. Short-term payables with no stated interest rate are measured at the original invoice amount where the effect of discounting is immaterial.

Payables are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Health Service.

### y) Borrowings

Loans are not held for trading or designated at fair value through profit or loss and are recognised at amortised cost using the effective interest rate method. Gains or losses are recognised in the Result for the Year on derecognition.

The finance lease liability is determined in accordance with AASB 117, Leases.

# z) Equity Transfers

The transfer of net assets between agencies as a result of an administrative restructure, transfers of programs/functions and parts thereof between NSW public sector agencies is designated or required by Accounting Standards to be treated as contributions by owners and is recognised as an adjustment to "Accumulated Funds". This treatment is consistent with AASB1004, Contributions and Australian Interpretation 1038 Contributions by Owners Made to Wholly-Owned Public Sector Entities.

Transfers arising from an administrative restructure involving not-for-profit entities and for-profit government departments are recognised at the amount at which the asset was recognised by the transferor immediately prior to the restructure. Subject to below, in most instances this will approximate fair value.

All other equity transfers are recognised at fair value, except for intangibles. Where an intangible has been recognised at (amortised) cost by the transferor because there is no active market, the agency recognises the asset at the transferor's carrying amount. Where the transferor is prohibited from recognising internally generated intangibles, the agency does not recognise that asset.

### aa) Equity and Reserves

# (i) Asset Revaluation Reserve

The asset revaluation reserve is used to record increments and decrements on the revaluation of non-current assets. This accords with the Health Service's policy on the revaluation of property, plant and equipment as discussed in Note 2(j).

# (ii) Accumulated Funds

The category "accumulated funds" includes all current and prior period retained funds.

# (iii) Separate Reserves

Separate reserve accounts are recognised in the financial statements only if such accounts are required by specific legislation or Australian Accounting Standards.

# ab) Trust Funds

The Health Service receives monies in a trustee capacity for various trusts as set out in Note 32. As the Health Service performs only a custodial role in respect of these monies, and because the monies cannot be used for the achievement of the Health Service's own objectives, they are not brought to account in the financial statements.

### ac) Budgeted Amounts

The budgeted amounts are drawn from the budgets agreed with the NSW Health Department at the beginning of the financial reporting period and with any adjustments for the effects of additional supplementation provided.

### ad) Emerging Asset

The Health Service's emerging interest in the St George, Sydney and Randwick Hospitals carparks has been valued in accordance with the Department of Health's policy for *Accounting for Privately Financed Projects*. This policy required the Health Service to initially determine the estimated written down replacement cost by reference to the project's historical cost escalated by a construction index and the system's estimated working life. The estimated written down replacement cost was then allocated on a systematic basis over the concession period of 25 years using the annuity method and the Government Bond rate of 6.27% for St George Hospital, 9.21% for Sydney Hospital and 5.58% for the Randwick Campus Hospitals at commencement of the concession period.

### ae) Service Group Statements Allocation Methodology

Expenses and revenues are assigned to service groups in accordance with statistical data for the twelve months ended 30 June 2009 (or more reliable recent data, that is General Fund Expenditure 31 March 2010) which is then applied to the current period's financial information. The same methodology is applied to attribute assets and liabilities to each service group.

In respect of assets and liabilities the Department requires that all Health Services take action to identify those components that can be specifically identified and reported by service groups. Remaining values are attributed to service groups in accordance with values advised by the NSW Department of Health, e.g. depreciation/amortisation charges form the basis of apportioning the values for Intangibles and Property, Plant & Equipment.

### af) Joint Ventures

(i) The South Eastern Sydney and Illawarra Area Health Service is a registered member of the Illawarra Health and Medical Research Institute (IHMRI).

The IHMRI was established in April 2008 as a collaborative venture between the University of Wollongong and the South Eastern Sydney Illawarra Area Health Service. The IHMRI is incorporated in Australia as a company limited by guarantee under the Corporations Act 2001.

The objectives of the company are to initiate, promote, undertake, develop, conduct, carry out and directly facilitate Health and Medical research through grants and donations; and to make available knowledge obtained from Health and Medical research to the health and medical professions and the general public.

The profits (if any) or other income of the Company, however derived, must be applied solely towards the promotion of the above objectives and may not be paid or transferred to the Members, either directly or indirectly by way of dividend, bonus or otherwise.

(ii) The South Eastern Sydney and Illawarra Area Health Service is a registered member of the Randwick Health and Medical Research Institute (RHMRI).

The RHMRI was established in December 2008 as a collaborative venture between the University of New South Wales and the South Eastern Sydney Illawarra Area Health Service. The RHMRI is incorporated in Australia as a company limited by guarantee under the Corporations Act 2001.

The objectives of the company are to initiate, promote, undertake, develop, conduct, carry out and directly facilitate Health and Medical research through grants and donations; and to make available knowledge obtained from Health and Medical research to the health and medical professions and the general public.

The profits (if any) or other income of the Company, however derived, must be applied solely towards the promotion of the above objectives and may not be paid or transferred to the Members, either directly or indirectly by way of dividend, bonus or otherwise.

# 17 Service Groups of the Health Service

# Service Group 1.1 - Primary and Community Based Services

Service Description:

This service group covers the provision of health services to persons attending community health centres or in the home, including health promotion activities, community based women's health, dental, drug and alcohol and HIV/AIDS services. It also covers the provision of grants to non-Government organisations for community health purposes.

Objective:

This service group contributes to making prevention everybody's business and strengthening primary health and continuing care in the community by working towards a range of intermediate results that include the following:

- improved access to early intervention, assessment, therapy and treatment services for claims in a home or community setting
- reduced rate of avoidable hospital admissions for conditions identified in the State Plan that can be appropriately treated in the community and
- reduced rate of hospitalisation from fall-related injury for people aged 65 years and over.

# Service Group 1.2 - Aboriginal Health Services

Service Description:

This service group covers the provision of supplementary health services to Aboriginal people, particularly in the areas of health promotion, health education and disease prevention. (Note: This Service Group excludes most services for Aboriginal people provided directly by Area Health Services and other general health services which are used by all members of the community).

Objective:

This service group contributes to ensuring a fair and sustainable health system by working towards a range of intermediate results that include the following:

- the building of regional partnerships for the provision of health services
- · raising the health status of Aboriginal people and
- promoting a healthy lifestyle.

# Service Group 1.3 - Outpatient Services

Service Description:

This service group covers the provision of services provided in outpatient clinics including low level emergency care, diagnostic and pharmacy services and radiotherapy treatment.

Objective:

This service group contributes to creating better experiences for people using health services and ensuring a fair and sustainable health system by working towards a range of intermediate results including improving, maintaining or restoring the health of ambulant patients in a hospital setting through diagnosis, therapy, education and treatment services.

# Service Group 2.1 - Emergency Services

Service Description:

This service group covers the provision of emergency ambulance services and treatment of patients in designated emergency departments of public hospitals.

Objective:

This service group contributes to creating better experiences for people using the health system by working towards a range of intermediate results including reduced risk of premature death or disability by providing timely emergency diagnostic treatment and transport services.

# Service Group 2.2 - Overnight Acute Inpatient Services

Service Description:

This service group covers the provision of health care to patients admitted to public hospitals with the intention that their stay will be overnight, including elective surgery and maternity services.

### Objective:

This service group contributes to creating better experiences for people using the health system by working towards a range of intermediate results that include the following:

- timely treatment of booked surgical patients, resulting in improved clinical outcomes, quality of life and patient satisfaction and
- reduced rate of unplanned and unexpected hospital readmissions.

# Service Group 2.3 - Same Day Acute Inpatient Services

Service Description: This service group covers the provision of health care to patients who are admitted to

public hospitals with the intention that they will be admitted, treated and discharged on the

same day.

Objective: This service group contributes to creating better experiences for people using the health

system by working towards a range of intermediate results that include the following:

• timely treatment of booked surgical patients resulting in improved clinical outcomes,

quality of life and patient satisfaction and

reduced rate of unplanned and unexpected hospital readmissions.

# Service Group 3.1 - Mental Health Services

Service Description: This service group covers the provision of an integrated and comprehensive network of

services by Area Health Services and community based organisations for people seriously affected by mental illness and mental health problems. It also includes the development of

preventative programs which meet the needs of specific client groups.

Objective: This service group contributes to strengthening primary health and continuing care in the

community by working towards a range of intermediate results that include the following:

• improving the health, wellbeing and social functioning of people with disabling mental

disorders and

• reducing the incidence of suicide, mental health problems and mental disorders in the

community.

### Service Group 4.1 - Rehabilitation and Extended Care Services

Service Description: This service group covers the provision of appropriate health care services for persons with

long-term physical and psycho-physical disabilities and for the frail-aged. It also includes the coordination of the Department's services for the aged and disabled, with those

provided by other agencies and individuals.

Objective: This service group contributes to strengthening primary health and continuing care in the

community and creating better experiences for people using the health system by working towards a range of intermediate results including improving or maintaining the wellbeing and independent functioning of people with disabilities or chronic conditions, the frail and

terminally ill.

### Service Group 5.1 - Population Health Services

Service Description: This service group covers the provision of health services targeted at broad population

groups including environmental health protection, food and poisons regulation and

monitoring of communicable diseases.

Objective: This service group contributes to making prevention everybody's business by working

towards a range of intermediate results that include the following:

reduced incidence of preventable disease and disability and

• improved access to opportunities and prerequisites for good health.

# Service Group 6.1 - Teaching and Research

Service Description: This service group covers the provision of professional training for the needs of the New

South Wales health system. It also includes strategic investment in research and development to improve the health and wellbeing of the people of New South Wales.

Objective: This service group contributes to ensuring a fair and sustainable health system by working towards a range of intermediate results that include the following:

developing the skills and knowledge of the health workforce to support patient care and

 developing the skills and knowledge of the health worklord population health and

extending knowledge through scientific enquiry and applied research aimed at improving

the health and wellbeing of the people of New South Wales.

- (i) Land and Buildings include land owned by the Health Administration Corporation and administered by the South Eastern Sydney and Illawarra Area Health Service [see note 2(g)].

  (ii) Land and Buildings were valued by CB Richard Ellis (AAPI qualified)

on 1 July 2007 [see note 2(j)].
CB Richard Ellis is not an employee of the South Eastern Sydney and Illawarra Area Health Service.

(iii) In accordance with the fair value requirements of AASB 116 the land, buildings and infrastructure assets have had a factor applied in relation to the movement in the market and variation in the building and infrastructure costs. The adjustment has been performed on a gross basis in accordance with note 2(j). This factor gives consideration to the valuation of Physical Non-Current Assets at Fair Value.

The following table details the indice applied to Non Current Assets as determined by the Land and Property Management Authority (formerly known as the Department of Lands).

16,131	20,125	Total Operating Lease Commitments (Including GST)	16,131	20,125

The operating lease commitments above are for motor vehicles, information technology, equipment including personal computers, medical equipment and other equipment.

(d) Contingent Asset related to Commitments for Expenditure
The total of "Commitments for Expenditure" above, i.e. \$79.330 million as at 30 June 2010 includes input tax credits of \$7.212 million that are expected to be recoverable from the Australian Taxation Office.

### PARENT AND CONSOLIDATION

### 32. Trust Funds

The South Eastern Sydney and Illawarra Area Health Service holds trust fund moneys of \$5.896 million which are used for the safe keeping of patients' monies, deposits on hired items of equipment and Private Practice Trusts. These monies are excluded from the financial statements as the South Eastern Sydney and Illawarra Area Health Service cannot use them for the achievement of its objectives. The following is a summary of the transactions in the trust account:

	Patient Trust	Trust	Refundable Deposits	able its	Private Practice Trust Funds	ractice unds	Total	a
	2010	\$000	2010 \$000	\$000	2010 \$000	\$000	2010 \$000	\$000

Cash Balance at the end of the financial reporting period	484	484	301	215	5,111	5,826	5,896	6,525

### PARENT AND CONSOLIDATED

### 33. Contingent Liabilities

### a) Claims on Managed Fund

Since 1 July 1989, the South Eastern Sydney and Illawarra Area Health Service has been a member of the NSW Treasury Managed Fund. The Fund will pay to or on behalf of the South Eastern Sydney and Illawarra Area Health Service all sums which it shall become legally liable to pay by way of compensation or legal liability if sued except for employment related, discrimination and harassment claims that do not have statewide implications. The costs relating to such exceptions are to be absorbed by the South Eastern Sydney and Illawarra Area Health Service. As such, since 1 July 1989, apart from the exceptions noted above no contingent liabilities exist in respect of liability claims against the South Eastern Sydney and Illawarra Area Health Service. A Solvency Fund (now called Pre-Managed Fund Reserve) was established to deal with the insurance matters incurred before 1 July 1989 that were above the limit of insurance held or for matters that were incurred prior to 1 July 1989 that would have become verdicts against the State. That Solvency Fund will likewise respond to all claims against the South Eastern Sydney and Illawarra Area Health Service.

### b) Workers Compensation Hindsight Adjustment

Treasury Managed Fund normally calculates hindsight premiums each year. However, in regard to workers compensation the final hindsight adjustment for the 2003/04 fund year and an interim adjustment for the 2005/06 fund year were not calculated until 2009/10. As a result, the 2004/05 final and 2006/07 interim hindsight calculations will be paid in 2010/11.

It is not possible for the Health Service to reliably quantify the benefit to be received.

### c) Affiliated Health Organisations

Based on the definition of control in Australian Accounting Standard AASB127Consolidated and Separate Financial Statements, Affiliated Health Organisations listed in Schedule 3 of the Health Services Act, 1997 are only recognised in the Health Service's consolidated financial statements to the extent of cash payments made.

However, it is accepted that a contingent liability exists which may be realised in the event of cessation of health service activities by any Affiliated Health Organisation. In this event the determination of assets and liabilities would be dependent on any contractual relationship which may exist or be formulated between the administering bodies of the organisation, the Health Service and the NSW Department of Health.

### 36. 2009/10 Voluntary Services

It is considered impracticable to quantify the monetary value of voluntary services provided to South Eastern Sydney and Illawarra Area Health Service. Services provided include:

- . Chaplaincies and Pastoral Care
- . Pink Ladies/Hospital Auxiliaries
- . Patient Support Groups
- . Community Organisations
- . Patient & Family Support
- . Patient Services, Fund Raising
- . Practical Support to Patients and Relatives
- . Counselling, Health Education, Transport, Home Help & Patient Activities

### PARENT AND CONSOLIDATION

### 37. Unclaimed Moneys

Unclaimed salaries and wages are paid to the credit of the Department of Industrial Relations and Employment in accordance with the provisions of the Industrial Relations Act, 1996.

All money and personal effects of patients which are left in the custody of South Eastern Sydney and Illawarra Area Health Service by any patient who is discharged or dies in the hospital and which are not claimed by the person lawfully entitled thereto within a period of twelve months are recognised as the property of South Eastern Sydney and Illawarra Area Health Service.

All such money and the proceeds of the realisation of any personal effects are lodged to the credit of the Samaritan Fund which is used specifically for the benefit of necessitous patients or necessitous outgoing patients.

### 38. Budget Review

### **Net Cost of Services**

The actual Net Cost of Services was higher than budget by \$5.504m (0.003%) (Consolidated only). This was mainly due to acute and Emergency Department activity being above target for the year. The higher activity flowed through to higher than targeted staffing numbers. Expenditure on consumables such as medical and surgical supplies, prosthesis and drugs also exceeded budget. This was partly offset by patient fees exceeding budget due to increased chargeable bed days, other revenue exceeding budget, and a positive return on investments greater than last year.

### Result for the Year

The result for the year from ordinary activities was higher than budget by \$9.665m. This was mainly due to the Net Cost of Services unfavourability (refer above) and delays in capital projects resulting in capital allocations totalling \$4.308m not required for the year.

### Assets and Liabilities

### Current Assets

The variance of \$17.438m (10.06%) above budget was mainly due to higher Special Purpose Fund investments in Financial Assets (\$7.462m), increase in properties held for sale of \$16.573m, offset by collection improvement in debtors of \$6.611m.

### Non-Current Assets

The variance of \$134.419m (9.4%) above budget was mainly due to unbudgeted valuation update to property and infrastructure to bring those assets to Fair Value, and is offset by transfer of properties to Current Assets Held for Sale.

### **Current Liabilities**

The variance of \$9.118m (1.5%) is mainly due to Payables (\$5.434m) and Provisions (\$3.986m) being lower than budget. The Payables variance was mainly due to the Health Service decreasing trade creditors over 45 days to Nil at June 10.

### Non-Current Liabilities

Non Current Liabilities were \$4.759m (13.1%) below budget, and mainly relates to repayment of loans to DOH.

### Cash Flows

### Operating Activities

Cash inflows from Operating Activities were \$16.890m lower than budget. This was mainly due to Area's over budget result and capital projects not progressing at budgeted levels.

### Investing Activities

Cash outflows from Investing Activities were \$19.309m lower than budget. This was mainly due to delays in several capital projects and delay in purchase of plant & equipment.

### Financing Activities

Cash outflows from Financing Activities were \$3.403m lower than budget.

Movements in the level of the NSW Department of Health Recurrent Allocation that have occurred since the time of the initial allocation in June 2009 are as follows:

### 39. Increase/(Decrease) in Net Assets from Equity Transfers

Net assets of \$1.152 million transferred from the South EasternSydney Illawarra Area Health Service with effect from 11 December 2009 from which time Health Support Services assumed responsibility for the provision of Warehousing Services. Assets and liabilities transferred are as follows:

	2010 \$'000	2009 \$'000
Assets Inventory Plant and Equipment	(1,214) (15)	(434) (1,524)
Liabilities Provisions Loans	662 (585)	755
Increase/(Decrease) in Net Assets from Equity Transfers	(1,152)	(1,203)

### 40 Financial Instruments

The South Eastern Sydney and Illawarra Area Health Service's principal financial instruments are outlined below. These financial instruments arise directly from the Health Service's operations or are required to finance its operations. The South Eastern Sydney and Illawarra Area Health Service does not enter into or trade financial instruments, including derivative financial instruments for speculative purposes.

The South Eastern Sydney and Illawarra Area Health Service's main risks arising from financial instruments are outlined below, together with the Service's objectives, policies and processes for measuring and managing risk. Further quantitative and qualitative disclosures are included throughout these financial statements.

The Chief Executive has overall responsibility for the establishment and oversight of risk management and reviews and agrees policies for managing each of these risks. Risk management policies are established to identify and analyse the risk faced by the South Eastern Sydney and Illawarra Area Health Service, to set risk limits and controls and monitor risks. Compliance with policies is reviewed by the Audit and Risk Management Committee/Internal auditors on a regular basis and in a planned manner.

### (a) Financial Instrument Categories

### **PARENT and CONSOLIDATION**

Financial Assets Class:	Category	Carrying Amount 2010 \$000	Carrying Amount 2009 \$000
Cash and Cash Equivalents (note 19)	Loans and Receivables (at	20,195	18,185
Receivables (note 20)1	amortised cost)	30,610	36,846
Financial Assets at Fair Value (note 22)	At fair value through profit	87,322	79,860
Total Financial Assets	or loss (designated as such upon initial recognition)	138,127	134,891
Financial Liabilities			
Borrowings (Note 30)	Financial liabilities	14,470	16,786
Payables (Note 29)2	measured at	125,449	167,529
Other (Note 32)	amortised cost.	0	0
Total Financial Liabilities		139,919	184,315

### Note

- 1 Excludes statutory receivables and prepayments (ie not within scope of AASB 7)
- 2 Excludes statutory payables and uneamed revenue (ie not within scope of AASB 7)

### (b) Credit Risk

Credit risk arises when there is the possibility of the South Eastern Sydney and Illawarra Area Health Service's debtors defaulting on their contractual obligations, resulting in a financial loss to the South Eastern Sydney and Illawarra Area Health Service. The maximum exposure to credit risk is generally represented by the carrying amount of the financial assets (net of any allowance for impairment).

Credit risk arises from financial assets of the South Eastern Sydney and Illawarra Area Health Service, including cash, receivables and authority deposits. No collateral is held by the Health Service. The Health Service has not granted any financial guarantees.

Credit risk associated with the South Eastern Sydney and Illawarra Area Health Services's financial assets, other than receivables, is managed through the selection of counterparties and establishment of minimum credit rating standards.

South Eastern Sydney and Illawarra Area Health Service deposits held with NSW Tcorp are guaranteed by the State.

### Cast

Cash comprises cash on hand and bank balance deposited in accordance with Public Authorities (Financial Arrangements) Act approvals. Interest is earned on daily bank balances at rates of approximately 3.90% in 2009/10 compared to 3.07% in the previous year. The TCorp Hour Glass cash facility is discussed in paragraph (d) below.

### Receivables - trade debtors

All trade debtors are recognised as amounts receivable at balance date. Collectibility of trade debtors is reviewed on an ongoing basis. Procedures as established in the NSW Department of Health Accounting Manual and Fee Procedures Manual are followed to recover outstanding amounts, including letters of demand. Debts which are known to be uncollectable are written off. An allowance for impairment is raised when there is objective evidence that the entity will not be able to collect all amounts due. The evidence includes past experience and current and expected changes in economic conditions and debtor credit ratings. No interest is earned on trade debtors.

The South Eastern Sydney and Illawarra Area Health Service is not materially exposed to concentrations of credit risk to a single trade debtor or group of debtors. Of the total trade debtors balance at year-end, \$22.366m (2009: \$27.436m) related to debtors that were not past due and not considered impaired and debtors of \$5.766m (2009: \$4.882m) were past due but not considered impaired. Together these represent 80.4% (2009: 78.5%) of total trade debtors. The Receivables include Patient Fees Compensables which are frequently not settled within 6 months of the date of the service provision due to the length of time it takes to settle legal claims. Most of the South Eastern Sydney and Illawarra Area Health Services' debtors are Health Insurance Companies or Compensation Insurers settling claims in respect of inpatient treatments. There are no debtors which are currently not past due or impaired whose terms have not been renegotiated.

Financial assets that are past due or impaired could be either 'sales of goods and services' or 'other debtors' in the 'receivables' category of the Statement of Financial Position. Patient Fees Ineligibles may represent the majority of financial assets that are past due or impaired.

	\$000	\$000	\$000
2010	Total 12	Past due but not impaired 1,2	Considered impaired 1,2
<3 months overdue	28,329	27,999	330
3 months - 6 months overdue	1,910	1,296	614
> 6 months overdue	4,711	1,316	3,395
2009			
<3 months overdue	32,492	32,318	174
3 months - 6 months overdue	2,254	1,375	879
> 6 months overdue	6,429	3,152	3,277

Notes

### **Authority Deposits**

The South Eastern Sydney and Illawarra Area Health Service has placed funds on deposit with TCorp, which has been rated "AAA" by Standard and Poor's. These deposits are similar to money market or bank deposits and can be placed "at call" or for a fixed term. For fixed term deposits, the interest rate payable by TCorp is negotiated initially and is fixed for the term of the deposit, while the interest rate payable on at call deposits vary. The deposits at balance date were earning an average interest rate of 8.12% (2009: -2.69%), while over the year the weighted average interest rate was 7.74% (2009: -2.67%) on a weighted average balance during the year of \$93.787m (2009: \$89.105m). None of these assets is past due or impaired.

### (c) Liquidity Risk

Liquidity risk is the risk that the South Eastern Sydney and illawarra Area Health Service will be unable to meet its payment obligations when they fail due. The South Eastern Sydney and Illawarra Area Health Service continuously manages risk through monitoring future cash flows and maturities planning to ensure adequate holding of high quality liquid assets. The objective is to maintain a balance between continuity of funding and flexibility through effective management of cash, investments and liquid assets and liabilities.

The South Eastern Sydney and Illawarra Area Health Service has negotiated no loan outside of arrangements with the NSW Department of Health or the Sustainable Energy Development Authority.

During the current and prior year, there were no defaults or breaches on any loans payable. No assets have been pledged as collateral. The South Eastern Sydney and Illawarra Area Health Service's exposure to liquidity risk is considered significant. However the risk is minimised as the NSW Department of Health has indicated its ongoing financial support for the South Eastern Sydney and Illawarra Area Health Service. (refer note 2)

The liabilities are recognised for amounts due to be paid in the future for goods or services received, whether or not invoiced. Amounts owing to suppliers (which are unsecured) are generally settled in accordance with the policy set by the NSW Department of Health. If trade terms are not specified, payment is also generally made no later than the end of the month following the month in which an invoice or a statement is received.

In those instances where settlement cannot be effected in accordance with the above, eg due to short term liquidity constraints, contact is made with creditors and terms of payment are negotiated which are advantageous to both parties.

The table following summarises the maturity profile of the South Eastern Sydney and Illawarra Area Health Service's financial liabilities together with the interest rate exposure.

<sup>1.</sup> Each column in the table reports "gross receivables".

<sup>2.</sup> The ageing analysis excludes statutory receivables, as these are not within the scope of AASB 7 and excludes receivables that are not past due and not impaired. Therefore, the "total" will not reconcile to the receivables total recognised in the statement of financial position.

### Notes:

- Health Service can be required to pay. The table include both interest and principal cash flows and therefore will not reconcile to the Statement Of Financial Position. 1. The amounts disclosed are the contractual undiscounted cash flows of each class of financial liabilities, based on the earliest date on which the
  - 2. Of the \$5.323M disclosed in the 2010 'other loans and deposits' time band 1-5yrs, The South Eastern Sydney Illawarra Health Service has no intent to effect payments in advance of maturity dates on or prior to 30 September 2010.

### (d) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. The South Eastern Sydney and Illawarra Area Health Service's exposures to market risk are primarily through interest rate risk on the South Eastern Sydney and Illawarra Area Health Service's borrowings and other price risks associated with the movement in the unit price of the Hour-Glass investment facilities. The South Eastern Sydney and Illawarra Area Health Service has no exposure to foreign currency risk and does not enter into commodity contracts.

In e effect on profit and equity due to a reasonably possible change in risk variable is outlined in the information below, for interest rate risk and other price risk. A reasonably possible change in risk variable has been determined after taking into account the economic environment in which the South Eastern Sydney and Illawarra Area Health Service operates and the time frame for the assessment (i.e. until the end of the next annual reporting period). The sensitivity analysis is based on risk exposures in existence at the Statement of Financial Position date. The analysis is performed on the same basis for 2009. The analysis assumes that all other variables remain constant.

### Interest rate risk

Exposure to interest rate risk arises primarily through the South Eastern Sydney and Illawarra Area Health Service's interest bearing liabilities.

However, Health Services are not permitted to borrow external to the NSW Department of Health (Sustainable Energy Development Authority loans which are negotiated through Treasury excepted). Both SEDA and NSW Department of Health loans are set at fixed rates and therefore are generally not affected by fluctuations in market rates. The Health Service does not account for any fixed rate financial instruments at fair value through profit or loss or as available-for-sale. Therefore, for these financial instruments, a change of interest rates would not affect profit or loss or equity. A reasonably possible change of +/-1% is used consistent with current trends in interest rates. The basis will be reviewed annually and amended where there is a structural change in the level of interest rate volatility. The South Eastern Sydney and Illawarra Area Health Service's exposure to interest rate risk is set out below.

	\$'000				
		-1%	,	+′	1%
	Carrying Amount	Profit	Equity	Profit	Equity
2010					
Financial Assets					
Cash and Cash Equivalents	20,195	(202)	(202)	202	202
Financial Assets at Fair Value	87,322	(873)	(873)	873	873
Financial Liabilities					
Borrowings	14,470	(145)	(145)	145	145
2009					
Financial Assets					
Cash and Cash Equivalents	18,185	(182)	(182)	182	182
Financial Assets at Fair Value	79,860	(799)	(799)	799	799
Financial Liabilities					
Borrowings	16,786	(168)	(168)	168	168

### Other price risk - TCorp Hour-Glass facilities

Exposure to 'other price risk' primarily arises through the investment in the TCorp Hour-Glass Investment Facilities, which are held for strategic rather than trading purposes. The South Eastern Sydney and Illawarra Area Health Service holds units in the following Hour-Glass investment trusts:

Facility	Investment Sectors	Investment Horizon	2010	2009
		Honzon	\$'000	\$'000
Cash facility	Cash, money market instruments	Up to 2 years	5,608	6,905
Strategic cash facility	Cash,money market and other interest rate instruments	2 years to 4 years	14,216	13,586
Medium term growth facility	Cash, money market instruments, Australian and International bonds, listed property, Australian and International shares	4 years to 7 years	37,890	34,789
Long term growth facility	Cash, money market instruments, Australian and International bonds listed property, Australian and International shares	7 years and over	35,215	31,485

The unit price of each facility is equal to the total fair value of net assets held by the facility divided by the total number of units on issue for that facility. Unit prices are calculated and published daily.

NSW TCorp as trustee for each of the above facilities is required to act in the best interest of the unitholders and to administer the trusts in accordance with the trust deeds. As trustee, TCorp has appointed external managers to manage the performance and risk of each facility in accordance with a mandate agreed by the parties. However, TCorp, acts as manager for part of the Cash and Strategic Cash Facilities and also manages the Australian Bond portfolio. A significant portion of the administration of the facilities is outsourced to an external custodian.

Investment in the Hour-Glass facilities limits the Health Service's exposure to risk, as it allows diversification across a pool of funds, with different investment horizons and a mix of investments.

NSW TCorp provides sensitivity analysis information for each of the Investment facilities, using historically based volatility information collected over a ten year period, quoted at two standard deviations (ie 95% probability). The TCorp Hour-Glass Investment facilities are designated at fair value through profit or loss and therefore any change in unit price impacts directly on profit (rather than equity).

A reasonably possible change is based on the percentage change in unit price (as advised by TCorp) multiplied by the redemption value as at 30 June each year for each facility (balance from Hour-Glass Statement).

	Impact	on profit/loss	
	Change in		
	unit price	2010 \$'000	2009 \$'000
Hour-Glass Investment - Cash	+/- 1%	0	0
facility Hour-Glass Investment -	+/- 5%	711	679
Strategic cash facility Hour-Glass Investment -	+/- 7%	2,652	2,435
Medium-term growth facility Hour-Glass Investment -	+/- 15%	5,282	4,723
Long-term growth facility		<u> </u>	

### (f) Fair Value recognised in the Statement of Financial Position

The South Eastern Sydney and Illawarra Area Health Service uses the following hierarchy for disclosing the fair value of financial instruments by valuation technique:

- Level 1 derived from quoted prices in active markets for identical assets/liabilities.
- Level 2 derived from inputs other than quoted prices that are observable directly or indirectly.
- Level 3 derived from valuation techniques that include inputs for the asset/liabilty not based on observable market data (unobservable inputs).

Level 1	Level 2	Level 3	Total
\$'000	\$'000	\$'000	\$'000
	87.322		87,322

TCorp Hour-Glass Invt.Facility

(The table above only includes financial assets as no financial liabilities were measured at fair value in the Statement of Financial Position.)

There were no transfers between level 1 and 2 during the period ended 30 June 2010.

### 41. Working Capital Deficiency

The consolidated entity has a deficiency of working capital of \$401,138,000 (2009 \$406,269,000). Notwithstanding this deficiency the financial statements have been prepared on a going concern basis because the entity has the support of the New South Wales Department of Health.

### 42. Post Balance Date Events

The NSW Department of Health by administrative restructure has transferred the Sydney Childrens Hospital, on and from, 1 July 2010 to The Sydney Children's Hospitals Network.

On 20 April 2010, the State of NSW and the Commonwealth agreed on national health reforms to establish Local Health Networks in NSW and to introduce national standards for timely access to emergency care and elective surgery.

Under the Agreement, NSW will remain responsible for system-wide planning, performance and purchasing of public hospital services and supporting the transition process for the Commonwealth to assume full funding and policy responsibility for general practice, primary health care and the national aged care system.

This agreement will result in structural and corporate changes including the establishment of these Local Health Networks in 2010-11. A professional Governing Council will be constituted for each Local Health Network. It is expected that these reforms will significantly change this reporting entity.
