

Appendix 1

NSW Trauma System – Minimum Data Set

All trauma admissions with ISS >15 or ICU Admission or death
(Exclude # NOF Death)

Data collection form

Hospital name	
Gender	male / female
Age	
Residential postcode	
Injury postcode	
Date of injury	\ \
Time of injury	:
Mechanism	
Place of injury	home / not at home
Date of arrival	\ \ (at your hospital)
Time of arrival	: (at your hospital)
Mode of arrival	(at your hospital)
Transfer in?	yes / no
Transfer from	
Op suite at first hospital?	yes / no
If yes, type of OS at first hospital	
Transfer out?	yes / no
Transferred to	
Transfer out reason	(burns, paediatric, spinal, other)
Op suite first 24 hrs?	yes / no
If yes, type of OS	
ICU admit?	yes / no
ICU LOS	(patient days)
Outcome?	survived / died
AIS body regions	
ISS	
Length of stay (LOS)	(total Hospital LOS in patient days)

Data dictionary

Mechanism

- MVC driver
- MVC pass
- MBC rider
- MBC pillion
- Pedestrian
- Pedal cyclist
- Fall <1m
- Fall 1-5m
- Fall >5m
- Shooting
- Stabbing
- Blunt assault
- Organised sport
- Recreational sport
- Burns
- Industrial – includes all work related
- Horse
- Other – specify

Mode of arrival

- Ambulance
- Helicopter
- Private vehicle
- Fixed wing
- NETS
- Other

AIS body regions

List three most injured, ie the ones used to calculate the ISS.

Type of OS

- Craniotomy
- Thoracotomy
- Laparotomy
- Open ext#
- Other – specify

Length of stay (LOS)

If LOS is >6 weeks then put >42 days.

Index of figures

Figure 1. Total trauma admissions to each trauma service for 2002 with ISS > 15.....	7
Figure 2. Trauma admissions to all trauma services by age	7
Figure 3. Trauma admissions to all trauma services for 2002 by age and gender.....	7
Figure 4. Trauma admissions to each trauma service by admission type (ie direct from scene or transfer into the trauma service from another hospital).....	7
Figure 5. Percentage of admission types for all trauma admissions to each trauma service direct from scene or transferred from another hospital to a trauma service	8
Figure 6. Percentage of inter-AHS (from one hospital to another in a different AHS) and intra-AHS (from one hospital to another within the same AHS) transfers for all trauma admissions to each trauma service	8
Figure 7. Trauma admissions to all trauma services by mechanism of injury.....	8
Figure 8. Trauma admissions to all trauma services by mechanism of injury and outcome (survived or died).....	9
Figure 9. Trauma admissions to all trauma services showing outcome percentages by mechanism of injury	9
Figure 10. Trauma admissions to all trauma services showing injury region percentages by mechanism of injury.....	9
Figure 11. Motor vehicle accident related trauma patient admissions to all trauma services by gender and age group..	10
Figure 12. Motor vehicle accident related trauma patient admissions to all trauma services by hour of day that injury occurred	10
Figure 13. Motor vehicle accident related trauma patient admissions to all trauma services by day of week that injury occurred for 2002.....	10
Figure 14. Motor Bike accident related trauma patient admissions to all trauma services by age and gender	11
Figure 15. Motor Bike accident related trauma patient admissions to all trauma services by hour of day that injury occurred	11
Figure 16. Motor bike accident related trauma patient admissions to all trauma services by day of week for 2002.....	11
Figure 17. Pedestrian trauma patient admissions to all trauma services by age and gender	12
Figure 18. Pedestrian trauma patient admissions to all trauma services by hour of day that injury occurred	12
Figure 19. Pedestrian trauma patient admissions to all trauma services by day of week that injury occurred	12
Figure 20. Low to medium fall (<5m) trauma patient admissions to all trauma services by age and gender	13
Figure 21. Low to medium fall (<5m) trauma patient admissions to all trauma services by hour of day that injury occurred	13
Figure 22. Low to medium fall (<5m) trauma patient admissions to all trauma services by day of week that injury occurred	13
Figure 23. High fall (5m or greater) trauma patient admissions to all trauma services by age and gender	14
Figure 24. Pedal cycle trauma patient admissions to all trauma services by age and gender	14
Figure 25. Pedal cycle trauma patient admissions to all trauma services by hour of day that injury occurred	14
Figure 26. Pedal cycle trauma patient admissions to all trauma services by day of week that injury occurred	15
Figure 27. Blunt assault trauma patient admissions to all trauma services by age and gender	15
Figure 28. Shooting trauma patient admissions to all trauma services by age and gender	15
