2005 physiotherapist labourforce survey

Introduction

Each year, as part of the annual registration process for physiotherapists in NSW, an Annual Labourforce Survey is sent to each physiotherapist currently registered with the Physiotherapists Registration Board of New South Wales. This report provides an overview of information from the 2005 workforce survey.

The response rate to the survey has declined from 2001 with a rate of 85.4% in 2002, to 82.4% in 2005. The continued support of the Physiotherapists Registration Board of New South Wales, professional organisations and physiotherapists participating in the survey is appreciated.

Availability of survey information

The most recent summary of the total Annual Survey data was produced in 2005, entitled "Physiotherapy Labourforce Annual Survey, New South Wales, 2003". Additional survey analysis data such as additional cross tabulations can be obtained by forwarding a written request to the contact address in the front of the publication. Contact should be made to clarify the information required and to determine if a fee may apply. A charging policy is available on request.

Strict procedures are followed to ensure the privacy of individual physiotherapists who respond to the Survey. There is no access to identifying data, as individual names and addresses are not provided by the Board on the data file. Survey information will not be made available in any format that enables the identification of individual respondents.

Category of Physiotherapist Registration

In 2005, there were 6,568 physiotherapists financially registered with the Physiotherapists Registration Board of NSW, an increase of 509 or 8.4% from the 6,059 physiotherapists registered in 2004. Of these, 4,930 (75.1%) were female and 1,635 (24.9%) were male. Table 1.1 provides an overview of the number of physiotherapists in each category of registration.

Table 1.1: Persons registered as Physiotherapists in NSW, 2005

Category of registration ₁	No. Row %		No. Row %		No. Row %	
	Female		Male		Total	
New registrations(only status)	59	78.7%	16	21.3%	75	100.0%
Restorations	1	0.0%	0	0.0%	1	0.0%
"True" restorations	0	0.0%	0	0.0%	0	0.0%
"Technical" restorations	1	0.0%	0	0.0%	1	0.0%
Renewals ₂	4,598	75.4%	1,504	24.6%	6,102	100.0%
Technical renewals	273	70.4%	115	29.6%	388	100.0%
Deletions	2	1.9%	101	98.1%	103	100.0%
New registrations (total) ₂					322	100.0%

Notes:

- 1 The table includes information on physiotherapists financial with the Board during 2005
- 2 Some physiotherapists are included in more than one category during the twelve month period. There were 322 new registrations in total, but 253 of those were also renewals within the survey period. These have been counted as renewals. One new registration with unknown sex has been excluded from the table above.

Response rate to Labour force Annual Survey

The response rate to the 2005 Physiotherapy Labour force Annual Survey was 82.4 per cent, lower than the response rate in 2002, but similar to the rate in 2003.

Table 1.2: Response Rate to Physiotherapy Annual Labour Force Survey, 2002 to 2005

	No. Rate		No. Rate		No. Rate		No. Rate	
	2002		2003		2004		2005	
Formal response rate								
<i>Survey respondents</i> ¹ who were <i>renewals</i> ²	4,971		4,988		5,166		5,348	
<i>Total renewals</i> ²	5,819	85.4%	6,037	82.6%	6,059	85.3%	6,493	82.4%

- Notes:**
1. A "survey respondent" is defined as a renewal who provides information to the question on working status. There were 127 persons who returned a form but workforce status could not be determined. 1,018 physiotherapists did not return any survey form.
 2. "Renewal" is defined as a person recorded as renewing their registration although other actions may also have been recorded (technical restoration, technical renewal, new registration).

Determining the response rate to the survey is complicated by the relationship between the survey and the renewal process. While new registrants and restorations do not generally receive the survey, some may if they also receive a renewal notice within the twelve month survey period. Additionally, some persons sent renewal notices do not renew their registration and therefore do not return surveys. All survey responses from financially registered physiotherapists are presented in Tables 1.3 and 1.4. The survey process including survey coverage and method of calculating response is described in the Appendix.

Work Status

There were 3,950 working renewal survey respondents in 2005. Working renewals are those respondents who:

- Were financially registered and renewed their registration in 2005
- Returned a labourforce survey indicating their work status; and
- Indicated that their work status was one of the following three categories:
 - Working in physiotherapy only in NSW
 - Working in physiotherapy mainly in NSW, but also in other states
 - Working in physiotherapy in NSW, but on extended leave (see Table 1.3)

Table 1.3: Work status of Physiotherapy Labourforce Survey respondents¹, NSW, 2005

Work Status	No.	%	No.	%	No.	%	No.	%	%
	Unknown sex		Female		Male		Total		Female
Working in physiotherapy									
Only in NSW	151	70.9%	2696	68.8%	925	75.9%	3,772	70.5%	74.5%
Mainly in other states, but also in NSW	2	0.9%	43	1.1%	27	2.2%	72	1.3%	61.4%
Mainly in NSW, but also in other states	3	1.4%	48	1.2%	33	2.7%	84	1.6%	59.3%
Only in states other than NSW	3	1.4%	73	1.9%	36	3.0%	112	2.1%	67.0%
Overseas	20	9.4%	293	7.5%	125	10.3%	438	8.2%	70.1%
In NSW, but on extended leave	0	0.0%	90	2.3%	4	0.3%	94	1.8%	95.7%
Not Working in physiotherapy		0.0%							
Currently not working, and not looking for work	23	10.8%	428	10.9%	27	2.2%	478	8.9%	94.1%
Currently not working, but looking for work	3	1.4%	47	1.2%	7	0.6%	57	1.1%	87.0%
Currently working but not in physiotherapy	8	3.8%	198	5.1%	35	2.9%	241	4.5%	85.0%
Total	213	100.0%	3916	100.0%	1,219	100.0%	5,348	100.0%	76.3%
<i>Non-response to survey question¹</i>									
Working in NSW	154	72.3%	2834	72.4%	962	78.9%	3950	73.9%	74.7%

Notes: 1. There were 5,475 forms from physiotherapists renewing their registration, of whom 127 did not reply to the question on work status and a work status could not be derived. (see Note 1 to Table 1.2)

Based on the unadjusted survey response, there were 73.9% of respondent physiotherapists working in New South Wales in 2005.

Physiotherapists seeking work

Table 1.4: Nature of work sought by physiotherapists who were not working in physiotherapy, 2005

Nature of work sought	No.	%	No.	%	No.	%	No.	%	%
	Unknown		Female		Male		Total		Female
Looking for work in physiotherapy:									
- either full time or part time	1	50.0%	7	14.6%	1	12.5%	9	15.5%	87.5%
- full time	0	0.0%	5	10.4%	4	50.0%	9	15.5%	55.6%
- part time	1	50.0%	36	75.0%	3	37.5%	40	69.0%	92.3%
-no type of work shown	0	0.0%	0	0.0%	0	0.0%	0	0.0%	0.0%
Total	2	100.0%	48	100.0%	8	100.0%	58	100.0%	85.7%
<i>Not looking for work</i>	9		187		34		230		
<i>Unknown</i>	0		10		0		10		

Note: Table includes those survey respondents in table 1.3 who indicated that they were not currently working but looking for work, or currently working but not in physiotherapy (n = 298). There were five respondents not looking for work with unknown sex not shown above.

Estimating Workforce Size

Table 1.5: Estimating the Size of the Physiotherapist Workforce, 2001-2005

	2002	2003	2004	2005
Size of Workforce (excludes any new registrations) ¹	3,565	3,607	3,683	3,641
Adjustment for varying non response	90	149	207	544
Estimated working renewals	3,655	3,756	3,890	4,185
Adjusted respondents (excludes any new registrations) ²	4,972	5,019	5,374	5,632
Estimated % respondents working	73.5%	74.8%	72.4%	74.3%
Estimated new registrations working ³	307	369	424	267
Estimated restorations working ⁴	6	1	3	0
Total Estimated Workforce	3,968	4,126	4,317	4,452
Total number of new registrations	345	407	484	322
Estimated % new registrations working	89.0%	90.7%	87.6%	82.9%
No. of renewals(excluding new registrations)	5,819	6,039	5,840	6,325
Estimated working renewals as % of renewals excluding new registrations	62.8%	62.2%	66.6%	66.2%

- Notes:**
- 1 The unadjusted size of the workforce is based on renewals, technical restorations and technical renewals who answered the work status question as working in NSW. This is the workforce size excluding any new registrations unadjusted for non response.
 - 2 The respondent numbers have been adjusted to allow for changing non response rates (set to 90.1% for 2001) and exclude any new registrations who were also renewals within the year.
 - 3 Based on flow matrix analyses showing work status in two consecutive years
 - 4 Based on flow matrix analyses showing work status in two consecutive years

NOTE: These figures vary from estimates of workforce size documented in previous physiotherapist workforce profiles due to a new method of calculating workforce size. The method is described in detail in the Appendix, Section on Estimating Workforce Size. The estimate for 2005 may be modified in the 2006 profile after analysis of flow matrix data.

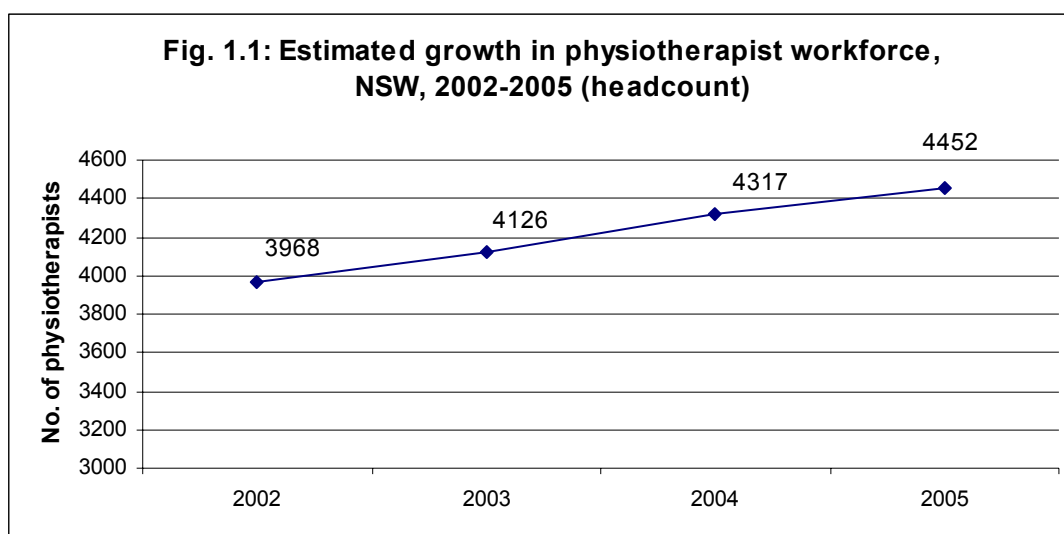

Table 1.5 and Fig 1.1 show that the estimated physiotherapist workforce was 3,968 in 2002, increasing to 4,452 in 2005. This is an overall growth rate of 12.2%, with growth of 4.0% between 2002 and 2003, 4.6% between 2003 and 2004, and 3.1% between 2004 and 2005.

Estimating Full-Time Equivalent Workforce (FTE)

The numbers of hours worked by physiotherapists on average per week for all jobs together can be converted to full-time equivalents (FTEs), which is a measure of the productive workforce. The total hours worked by physiotherapists are divided by 35 to calculate the FTE workforce. Thirty five hours is used as the measure of full time work based on labourforce definitions developed by the Australian Bureau of Statistics.

A ratio of FTEs to the total headcount workforce can then be calculated, to determine the relative productivity of the workforce. The FTE ratio of 0.9433 applied to the estimated workforce size of 4,452 headcount results in an estimated FTE workforce 4,200.5 FTE physiotherapists, after adjusting for non response (based on full time being defined as 35 hours worked per week).

Table 1.6: Workforce dynamics for physiotherapists, 2005

Physiotherapists	Estimated workforce size, 2005	New registrations entering the workforce	Re-entry	Wastage	FTE ratio (based on 35 hours)
Workforce headcount	4,452	267	154	355	0.9433
Percentage of workforce		6.0%	3.5%	8.0%	

SOURCE: flow matrix change rates from physiotherapist labourforce profile data, 2004 to 2005

NOTE: The actual participation rate of 2005 new registrations can only be calculated by category when the 2006 work status is known.

Employment Settings

3,794 physiotherapists responded to the employment setting question in the labourforce survey. Of these, 40.9% (1,520 physiotherapists) reported working in the public sector and 59.1% (2,194 physiotherapists) reported working in the private sector.

Table 1.7 - Total employment settings, physiotherapists working in NSW, 2005

Area Health Service	Private	Public Health	Public Other	Total	Unknown	Grand Total
Greater Southern AHS	94	63	26	183	6	189

Methodology

Timing of the 2005 Survey

Information from the 2005 Annual Labour force Survey relates to the 2005 registration renewal period. Renewal notices and surveys were forwarded in October 2005 to physiotherapists registered with the Physiotherapists Registration Board of New South Wales at that time. The renewal fee was due by the end of December in order for the physiotherapist to be retained on the register, as non-financial physiotherapists had their status altered by Board consent in mid December. Survey respondents completed the survey with information about their usual working situation at that time. Information regarding the registration status of physiotherapists was provided by the Board which related to the period from January 2005 to December 2005.

Labour force Survey coverage

Information from the Annual Labourforce Survey does not cover all registered physiotherapists in NSW. Only those registrants renewing their registration are forwarded a survey form. This excludes:

- **New registrations:** New registrations include new local graduates, interstate graduates and overseas trained physiotherapists registering for the first time with the NSW Board who have had their qualifications recognised in NSW. These persons will normally not receive the labourforce survey, but some new registrants may receive the survey form if they also renew in the same financial year. New registrations are defined as all those physiotherapists who were initial registrations in 2005.
- **Restorations:** Restorations are persons who have been restored to the register after a period in which they were not financial. These persons will not normally receive the annual survey. Some physiotherapists are restorations simply due to late payment and may have returned a survey form, and this group are defined as technical restorations.
- **Technical restorations:** Some physiotherapists are restorations simply due to late payment, as they are removed from the register and then reinstated on receipt of the payment of the renewal fee. These physiotherapists have usually completed a survey form, and therefore if they have provided survey data they have been included in the data analysis for this profile. Prior to this profile, the definition of respondents was those physiotherapists **renewing** their registration who completed or part completed a survey form.
- **Technical renewals:** There are a group of physiotherapists who either pay their registration fee early or who pay in advance and earn a credit as they will not be able to make their payment at the usual time. If these physiotherapists were sent a survey form in the year of renewal and are still financial in that year they have now been included in the survey population, and their returned survey forms included as respondents. This group has now been defined as **technical renewals, even though no transaction may have been recorded for the year of the survey**. This process has occurred for the first time in analysing the 2005 survey data.

The definition of response has been applied to those respondents who completed the question on workforce status. In addition, a number of physiotherapists have not completed the question on workforce status, but have completed the majority of the remainder of the survey form including the provision of a New South Wales postcode for work location, as well as other data such as hours worked. It was therefore decided for data completeness, to include both of those categories in the definition of respondents, as a workforce status could be derived.

The adoption of these changes in the approach to survey coverage, and definition of respondents, means that the data will now be compatible with definitions of the workforce used by the Australian Institute of Health & Welfare in preparing national profiles. However, it also means that the raw data on workforce size may show variation from years previous to 2002.

Care should be taken when interpreting this data as some individual physiotherapists may be included in more than one of the categories during the twelve month period.

Figures have not been adjusted for non-response

Data in this publication have not been adjusted for unknown information (both survey non-response and registration data such as year of birth). When interpreting the tables, consideration should be given to the impact of unknown data:

- The absence of data due to non-response results in an under-representation of the size of the workforce in individual tables.
- The labour force characteristics of non-respondents may differ from the characteristics of survey respondents (for example, respondents may be more likely than non-respondents to be in the workforce). Weighting the survey data according to non-response alone may result in an over-estimation or under-estimation in some categories.
- The labour force characteristics of physiotherapists who are not part of the survey target group (that is, new registrants and restorations) may differ from the characteristics of the survey population.

Calculating total unknown data for the survey

In determining the total unknown data for a particular question, consideration should be given to:

- **Unknown data for the question or questions comprising the table**, as indicated at the foot of each table. This may also include information that is unknown due to registration data (eg, year of birth) being unavailable from the Board.
- **Non-response to any filtering questions.** Data on second job will be affected by the lack of the explicit question “Do you have a 2nd job?” The number of persons with second jobs has been estimated from the highest response to any one question and used to estimate unknown data in relevant questions.
- **Non-response to the survey.** Survey response rates are presented in Table 1.1.

It should be noted that limitations in the survey data prevent a distinction between non-response and alternatives such as “no”, “other” or “zero”. Information regarding this is noted at the foot of the relevant tables.

Conventions used in this publication

Throughout this publication, figures within the tables may not add to the total shown where it has been necessary to round numbers. Percentages printed as 0.0 may denote less than 0.05%.

Italics are used to report unknown data.

— denotes not applicable.

Bold is used to indicate a total or subtotal.

n/a denotes data is not available.

The location of home and work for physiotherapists has been analysed by Area Health Service for those respondents working in both the public and private sectors. The NSW Department of Health sets the boundaries of each Area Health Service by postcode, and this approach has been used in the analysis. There is no intent to imply that physiotherapists working in the private sector are employed by Area Health Services, and the approach is used for comparative purposes only.

Estimating Workforce Size

Previous profiles have used a standard approach to estimating workforce size which was first documented in the 1999 Profile of the Medical Workforce in NSW (NSW Health Department, 2005) estimated the size of the medical workforce in New South Wales. This approach involved:

- Assume the proportion of survey respondents working in NSW represents the proportion of all renewals working in NSW
- Assume 90% of new registrants are working in NSW
- Assume 80% of other registrants are working in NSW (excluding deletions)

However recent analysis of data reported in the 2001 ABS Census has indicated that the workforce estimates calculated in the previous profiles are too high and should be adjusted. The 2001 Census reported that there were 3,408 working physiotherapists in 2001¹. This is 89.3% of the estimated physiotherapist workforce in New South Wales in 2001 using the new method. Using the previous method, the estimate would have been 4,305, and the Census figure would be 79.1% of this estimate. As a result, the new estimates have been developed to minimise the adjustment for non response and to improve the estimate of new registrations and restorations working.

The variation between the Census data and the profile data could be due to physiotherapists working using other titles which would not necessarily be coded to the physiotherapist category in the Census data.

The method is based on the following approach:

- Use the 2001 numbers of working physiotherapists as a baseline as 2001 had the highest response rate.
- Develop flow matrices of workforce dynamics for 2000/01, 2001/02, 2002/03, 2003/04, and,2004/05 and use the input/output calculation to determine workforce size between 2001 and 2005. This involves calculations of entry (inter-state and overseas migration and local new graduate entry patterns), re-entry (based on restorations and renewals re-entering the workforce), and wastage (including overseas entrants leaving the following year).
- Adjust the 2002, 2003,2004 and 2005 working respondent numbers to account for lower response rates in those years.

¹ NSW Health Department, unpublished ABS data
