Foreword.....	i
List of tables .....	vi
List of figures .....	ix
List of appendix tables .....	xi
List of appendix figures .....	xi
List of abbreviations .....	xi
Acknowledgments .....	xiii
Executive summary.....	xvii
Background.....	xvii
Methods of the survey .....	xvii
Findings.....	xviii
Recommendations.....	xxii
Chapter 1 – Introduction .....	1
Background.....	1
Nature and rationale of the study.....	2
References .....	3
Chapter 2 – Methods in brief .....	5
Study design .....	5
Approvals .....	6
Field staff .....	6
Selection of schools and students .....	7
Data collection.....	7
Demographic variables .....	7
Anthropometry.....	7
Fundamental movement skill assessments .....	8
Cardiorespiratory endurance .....	8
Self-reported information .....	8
Physical activity sub-survey .....	12
School environment questionnaires.....	12
The response bias study.....	12
References .....	13

Chapter 3 – Response rates and description of the samples.....	15
Response rates.....	15
Description of the samples .....	17
Representativeness of the samples .....	19
Potential bias.....	23
Discussion .....	25
References .....	25
Chapter 4 – Overweight and obesity .....	27
Prevalence of overweight and obesity by sex and Year group .....	27
Prevalence of overweight and obesity by rurality, socioeconomic status and cultural background.....	29
Trends in overweight 1985-1997-2004 .....	32
Discussion .....	35
References .....	35
Chapter 5 – Self-reported physical activity.....	37
Prevalence of physical activity during summer school terms by sex and Year group .....	38
Prevalence of physical activity during summer school terms by rurality, socioeconomic status, cultural background and BMI category .....	38
Prevalence of physical activity during winter school terms by sex and Year group .....	41
Prevalence of physical activity during winter school terms by rurality, socioeconomic status, cultural background and BMI category .....	42
Trends in physical activity 1997-2004.....	45
Trends in physical activity during summer school terms .....	45
Trends in physical activity during winter school terms .....	46
Trends in physical activity 1985-2004.....	47
Discussion .....	49
References .....	52
Chapter 6 – Sedentary behaviours .....	55
Time spent in sedentary behaviours by sex and Year group .....	56
Time spent in sedentary behaviours by rurality, socioeconomic status, cultural background and BMI category.....	57
More than two hours per day of small screen recreation .....	63

The prevalence of more than two hours per day of small screen recreation by sex and Year group ...	63	Soft drinks .....	147
The prevalence of more than two hours per day of small screen recreation by rurality, socioeconomic status, cultural background and BMI category .....	64	Confectionery .....	151
Discussion .....	67	Hot chips, fried potato products, potato chips and salty snacks .....	152
References .....	67	Discussion .....	154
References .....	67	References .....	155
<b>Chapter 7 – Travel to and from school .....</b>	<b>69</b>	<b>Chapter 11 – Eating patterns .....</b>	<b>157</b>
Travel to school – modes of transport .....	69	Consumption of food and drink at the main meal times .....	158
Prevalence of travelling to school by car, walking or public transport by sex and year group .....	69	Family eating patterns and habits .....	168
Prevalence of travelling to school by car, walking or public transport by rurality, socioeconomic status, cultural background and BMI category .....	70	Family food habits .....	175
Travel to school – time spent walking .....	73	Eating snacks between meals .....	176
Travel home from school – modes of transport .....	75	Fast food meals .....	179
Prevalence of travelling home from school by car, walking or public transport by sex and year group ...	75	Fast food consumption habits .....	181
Prevalence of travelling home from school by car, walking or public transport by rurality, socioeconomic status, cultural background and BMI category .....	75	Discussion .....	182
Travel home from school – time spent walking .....	79	References .....	183
Discussion .....	81	<b>Chapter 12 – Influences over food and drink choices..</b>	<b>185</b>
References .....	81	Vegetables .....	185
<b>Chapter 8 – Cardiorespiratory fitness .....</b>	<b>83</b>	Fruit .....	186
Prevalence of adequate cardiorespiratory fitness by sex and Year group .....	84	Soft drinks .....	187
Prevalence of adequate cardiorespiratory fitness by rurality, socioeconomic status, cultural background and BMI .....	85	Fast food .....	189
Trends in the prevalence of adequate cardiorespiratory fitness 1997-2004 .....	87	Family influences .....	191
Discussion .....	89	Discussion .....	192
References .....	91	References .....	193
<b>Chapter 9 – Fundamental movement skills .....</b>	<b>95</b>	<b>Chapter 13 – Food and drink purchasing patterns.....</b>	<b>195</b>
Mastery and near-mastery of fundamental movement skills by sex and Year group .....	96	Buying food on the way to school .....	195
Mastery and near-mastery of fundamental movement skills by rurality, socioeconomic status, cultural background and BMI category .....	99	Buying food on the way home from school .....	196
Trends in fundamental movement skills mastery 1997-2004 .....	120	Sources of lunch .....	197
Discussion .....	125	Canteen use .....	198
References .....	127	Drink purchases .....	200
<b>Chapter 10 – Food habits .....</b>	<b>131</b>	Drink vending machines .....	201
Fruit .....	132	Spending on food and drinks .....	202
Vegetables .....	135	Discussion .....	203
100% fruit juice .....	139	<b>Chapter 14 – Markers of chronic disease (The biomarker sub-study) .....</b>	<b>205</b>
Milk .....	140	The biomarker sub-study .....	205
Type of milk .....	141	Prevalence of abnormal concentrations of biomarkers by sex .....	206
Consumption of bread, pasta and rice .....	142	Prevalence of abnormal concentrations of biomarkers by socioeconomic status, cultural background and BMI category .....	207
Consumption of meat, chicken and fish .....	144	Discussion .....	211
		References .....	212

Chapter 17– Methods in full .....	243	Language codes .....	A-78
Study design, selection, recruitment and data collection .....	243	Appendix F	
Staff selection, training and organisation .....	244	Accessibility/Remoteness Index of Australia (ARIA) values for each postcode of residence .....	A-79
Selection of schools and students .....	245	Appendix G	
Sample size calculations .....	246	Equivalence between level shuttle (LS) and number of laps for the Multistage Fitness Test .....	A-84
School and student recruitment .....	248	Appendix H	
Data collection .....	249	Estimated rates of energy expenditure .....	A-85
Data management .....	250	Appendix I	
Methods of analysis .....	250	School environment interview/questionnaire .....	A-87
Methods of measurement and reporting .....	251	Appendix J	
Fundamental movement skill assessments .....	252	School canteen manager/supervisor survey .....	A-103
Cardiorespiratory endurance .....	253	Appendix K	
Self-reported information .....	253	The response bias study .....	A-106
Biomarker sub-study .....	257	Appendix L	
Physical activity sub-study .....	261	Descriptive statistics and 5, 10, 15, 20, 30, 40, 50, 60, 70, 80, 85, 90 and 95 percentiles for height, weight, waist girth and BMI for boys and girls in Years K, 2, 4, 6, 8 and 10 .....	A-113
School environment questionnaires .....	261	Appendix M	
School canteen questionnaire .....	262	Procedure used to convert age data from the <i>Australian Health and Fitness Survey, 1985</i> , to school Year to allow comparisons with SPANS data .....	A-118
The response bias study .....	262	Appendix N	
Questionnaire administration .....	262	Descriptive statistics and 5, 10, 15, 20, 30, 40, 50, 60, 70, 80, 85, 90 and 95 percentiles for the Multistage Fitness Test for boys and girls in Years 4, 6, 8 and 10 .....	A-119
References .....	263	Appendix O	
APPENDICES		Prevalence of proficiency at fundamental movement skill components .....	A-120
Appendix A		Appendix P	
Participating schools .....	A-2	Descriptive statistics and 5, 10, 15, 20, 30, 40, 50, 60, 70, 75, 85, 90 and 95 percentiles for insulin, ALT, GGT, CRP, HDL cholesterol, LDL cholesterol and triglycerides for boys and girls in Year 10 .....	A-124
Appendix B			
Information package for:			
Primary school principals .....	A-4		
Secondary school principals (no blood collection) .....	A-8		
Secondary school principals (blood collection) .....	A-12		
Appendix C Information package/consent forms for:			
Primary school students and parents/carers .....	A-17		
Secondary school students and parents/carers .....	A-20		
Secondary school students and parents/carers (blood collection) .....	A-23		

## LIST OF TABLES

Table 2.1.	Measures administered to each Year group .....6	Table 6.4.	Prevalence of engaging in more than two hours per day of small screen recreation among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) ....66
Table 3.1.	Students' participation rates by Year and sex for the main study, physical activity sub-study and biomarker sub-study .....16	Table 7.1.	Prevalence of the use of the different modes of travel to school among boys and girls in Years 6, 8 and 10 (%) .....70
Table 3.2.	Number and percentage of boys and girls in each school Year for the main study, the physical activity sub-study and the biomarker sub-study (%) .18	Table 7.2.	Prevalence of travelling to school by car, walking or public transport (PT) among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%)...72
Table 3.3.	Number and percentage of boys and girls from rural and urban schools, from each cultural group and from each education sector for the study samples and for the NSW population .....21	Table 7.3.	Median daily time (mins) spent walking to school for those who reported walking to school (Walk), using public transport (PT) and for both groups combined (Both) among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....74
Table 3.4.	Prevalence of healthy weight, overweight, obesity and overweight/obesity combined among Year 10 boys and girls who participated in the biomarker sub-study and boys and girls who did not participate in the biomarker sub-study .....24	Table 7.4.	Prevalence of the use of the different modes of travel home from school among boys and girls in Years 6, 8 and 10 (%) .....75
Table 4.1.	Prevalence of overweight, obesity and overweight/obesity combined among boys and girls in Years K, 2, 4, 6, 8 and 10 (%) ....28	Table 7.5.	Prevalence of travelling home from school by car (car), walking (walk), or public transport (PT) among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....78
Table 4.2.	Prevalence of overweight and obesity combined among boys and girls in Years K, 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES) and cultural background (%) .....31	Table 7.6.	Median daily time (minutes) spent walking home from school for those who reported walking home (Walk), for those who reported using public transport (PT) and for both groups combined (Both) among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status, cultural background and BMI category .....80
Table 4.3.	Prevalence of healthy weight, overweight, obesity and overweight/obesity combined (O+O) in the 1985, 1997 and 2004 NSW data sets and the average annual change in the prevalence of overweight/obesity between subsequent surveys (%).....33	Table 8.1.	Prevalence of adequate fitness among boys and girls in Years 4, 6, 8 and 10 (%).....85
Table 5.1.	Prevalence of one hour per day of MVPA during summer school terms among boys and girls in Years 6, 8, and 10 (%) .....38	Table 8.2.	Prevalence of adequate fitness among boys and girls in Years 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category .....87
Table 5.2.	Prevalence of one hour per day of MVPA during summer school terms among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%)....41	Table 8.3.	Prevalence of adequate fitness among boys and girls in Years 4, 6, 8, and 10 in 1997 and 2004 (%)..87
Table 5.3.	Prevalence of one hour per day of MVPA during winter school terms among boys and girls in Years 6, 8, and 10 (%).....42	Table 9.1.	Prevalence of skill mastery, near-mastery and advanced skills among boys and girls in Years 2, 4, 6, 8 and 10 (%) .....98
Table 5.4.	Prevalence of one hour per day of MVPA during winter school terms among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%).....44	Table 9.2.	Prevalence of sprint run advanced skills among boys and girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....101
Table 5.5.	Prevalence of one hour per day of MVPA during summer and winter school terms among boys and girls in Years 8 and 10 in 1997 and 2004 (%) .46	Table 9.3.	Prevalence of vertical jump advanced skills among boys and girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....104
Table 5.6.	Prevalence of one hour per day of MVPA among boys and girls in Years 8 and 10 in 1985 and 2004 (%).....48	Table 9.4.	Prevalence of side gallop advanced skills among boys and girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....107
Table 5.7.	Prevalence of regularly walking and cycling to school (at least four days per week) among boys and girls in Years 8 and 10 in 1985 and 2004 (%) .49	Table 9.5.	Prevalence of leap advanced skills among boys and girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....110
Table 6.1.	Median hours per week spent in small screen recreation, educational, travel, cultural and social sedentary behaviours among boys and girls in Years 6, 8 and 10 (%) .....57	Table 9.6.	Prevalence of kick advanced skills among boys and girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....113
Table 6.2.	Median hours per week spent in each category of sedentary behaviour and total sedentary behaviour by boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category .....60	Table 9.7.	Prevalence of advanced skills for the overarm throw among boys and girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....116
Table 6.3.	Prevalence of engaging in more than two hours per day of small screen recreation (SSR) among boys and girls in Years 6, 8 and 10 (%) .....63		

Table 9.8.	Prevalence of catch advanced skills among boys and for girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....119	Table 10.20.	Usual consumption of hot chips and fried potato products among boys and girls in Years 6, 8 and 10 (%).....153
Table 9.9.	Prevalence of sprint run mastery among boys and girls in Years 4, 6, 8, and 10 in 1997 and 2004 (%) 120	Table 10.21.	Usual consumption of potato chips and salty snacks among boys and girls in Years 6, 8 and 10 (%) .....154
Table 9.10.	Prevalence of vertical jump mastery among boys and girls in Years 4, 6, 8, and 10 in 1997 and 2004 (%) .....121	Table 11.1.	Usual consumption of breakfast among boys and girls in Years 6, 8 and 10 (%).....158
Table 9.11.	Prevalence of overarm throw mastery among boys and girls in Years 4, 6, 8, and 10 in 1997 and 2004 (%) .....122	Table 11.2.	Prevalence of eating breakfast daily among boys and girls in Years 6, 8 and 10 (%).....159
Table 9.12.	Prevalence of catch mastery among boys and girls in Years 4, 6, 8, and 10 in 1997 and 2004 (%)123	Table 11.3.	Prevalence of eating breakfast every day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....161
Table 9.13.	Prevalence of kick mastery among boys and girls in Years 4, 6, 8, and 10 in 1997 and 2004 (%)....124	Table 11.4.	Usual consumption of a drink at breakfast among boys and girls in Years 6, 8 and 10 (%)...162
Table 10.1.	Usual consumption of fruit among boys and girls in Years 6, 8 and 10 (%).....132	Table 11.5.	Usual consumption of lunch among boys and girls in Years 6, 8 and 10 (%).....163
Table 10.2.	Consumption of at least two serves of fruit per day among boys and girls in Years 6, 8 and 10 (%).....133	Table 11.6.	Prevalence of eating lunch every day among boys and girls in Years 6, 8 and 10 (%).....163
Table 10.3.	Consumption of at least two serves of fruit per day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status, cultural background and BMI category (%) .....135	Table 11.7.	Prevalence of eating lunch every day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%).....164
Table 10.4.	Consumption of vegetables among boys and girls in Years 6, 8 and 10 (%).....136	Table 11.8.	Usual consumption of a drink at lunch among boys and girls in Years 6, 8 and 10 (%)...165
Table 10.5.	Consumption of at least four serves of vegetables per day among boys and girls in Years 6, 8 and 10 (%) .....136	Table 11.9.	Usual consumption of dinner among boys and girls in Years 6, 8 and 10 (%).....166
Table 10.6.	Consumption of at least four serves of vegetables per day among Year 6, 8 and 10 boys and girls by rurality, socioeconomic status (SES), cultural background and BMI category (%).....139	Table 11.10.	Prevalence of eating dinner every day among boys and girls in Years 6, 8 and 10 (%).....166
Table 10.7.	Usual consumption of fruit juice among boys and girls in Years 6, 8 and 10 (%).....140	Table 11.11.	Prevalence of eating dinner every day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....168
Table 10.8.	Usual consumption of milk among boys and girls in Years 6, 8 and 10 (%).....141	Table 11.12.	Prevalence of eating dinner with the family among boys and girls in Years 6, 8 and 10 (%)...169
Table 10.9.	Type of milk usually consumed among boys and girls in Years 6, 8 and 10 (%).....142	Table 11.13.	Prevalence of eating dinner with most of the family at least four times per week among boys and girls in Years 6, 8 and 10 (%).....169
Table 10.10.	Usual consumption of bread among boys and girls in Years 6, 8 and 10 (%).....143	Table 11.14.	Prevalence of eating dinner with most of the family at least four times per week among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....171
Table 10.11.	Usual consumption of pasta or rice among boys and girls in Years 6, 8 and 10 (%).....144	Table 11.15.	Prevalence of eating dinner in front of the TV among boys and girls in Years 6, 8 and 10 (%)...172
Table 10.12.	Usual consumption of red meat among boys and girls in Years 6, 8 and 10 (%).....145	Table 11.16.	Prevalence of eating dinner in front of the TV more than four times per week among boys and girls in Years 6, 8 and 10 (%).....173
Table 10.13.	Usual consumption of chicken among boys and girls in Years 6, 8 and 10 (%).....146	Table 11.17.	Prevalence of eating dinner in front of the TV more than four times per week among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%)...175
Table 10.14.	Usual consumption of fish among boys and girls in Years 6, 8 and 10 (%).....146	Table 11.18.	Prevalence of family food habits among boys and girls in Years 6, 8 and 10 (%).....176
Table 10.15.	Usual consumption of soft drink among boys and girls in Years 6, 8 and 10 (%).....147	Table 11.19.	Consumption of between-meal snacks among boys and girls in Years 6, 8 and 10 (%)...177
Table 10.16.	Prevalence of consumption of more than one cup per day of soft drink among boys and girls in Years 6, 8 and 10 (%).....148	Table 11.20.	Prevalence of consuming at least five snacks per day between meals among boys and girls in Years 6, 8 and 10 (%).....177
Table 10.17.	Prevalence of consumption of more than one cup per day of soft drink among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status, cultural background and BMI category (%).....150	Table 11.21.	Prevalence of consuming at least five snacks per day between meals among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic (SES) status, cultural background and BMI category .....178
Table 10.18.	Patterns of soft drink consumption among boys and girls in Years 6, 8 and 10 (%).....151		
Table 10.19.	Usual consumption of confectionery among boys and girls in Years 6, 8 and 10 (%).....152		

Table 11.22.	Consumption of fast food among boys and girls in Years 6, 8 and 10 (%).....	179	Table 15.4.	Proportion of urban and rural secondary schools that reported the adequacy of sports/PE facilities and equipment, of support from the school for sport and PE and of parents' support for sport and PE (%).....	222
Table 11.23.	Prevalence of eating a meal at a fast food outlet at least once per week among boys and girls in Years 6, 8 and 10 (%).....	180	Table 15.5.	Proportion of urban and rural primary schools which reported the staff responsible for teaching PE and sport (%).....	223
Table 11.24.	Prevalence of eating a meal at a fast food outlet at least once per week among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status, cultural background and BMI category (%).....	180	Table 15.6.	Proportion of urban and rural secondary schools that reported which staff were responsible for teaching PE and sport (%).....	224
Table 11.25.	Prevalence of fast food consumption habits among boys and girls in Years 6, 8 and 10 (%).....	181	Table 15.7.	Proportion of primary schools that reported making available <60, 60-80 or ≥80 minutes per week for PE in Years 2, 4 and 6 (%).....	224
Table 12.1.	Influences over vegetable consumption among boys and girls in Years 6, 8 and 10 (%).....	186	Table 15.8.	Proportion of secondary schools that reported making available <60, 60-80 or ≥80 minutes per week for PE in Years 8 and 10 (%).....	225
Table 12.2.	Influences over fruit consumption among boys and girls in Years 6, 8 and 10 (%).....	187	Table 15.9.	Proportion of primary schools that reported making available <60, 60-89 or ≥90 minutes per week for sport in Years 2, 4 and 6 (%).....	225
Table 12.3.	Influences over soft drink consumption among boys and girls in Years 6, 8 and 10 (%).....	188	Table 15.10.	Proportion of secondary schools that reported making available <60, 60-80 or >80 minutes per week for sport in Years 8 and 10 (%).....	225
Table 12.4.	Influences over fast food consumption among boys and girls in Years 6, 8 and 10 (%).....	190	Table 15.11.	Proportion of primary schools that reported making available <90, 91-119, 120-150 or >150 minutes per week for PE and sport in Years 2, 4 and 6 (%).....	226
Table 12.5.	Family influences over food habits among boys and girls in Years 6, 8 and 10 (%).....	191	Table 15.12.	Proportion of secondary schools that reported making available <90, 91-119, 120-150 or >150 minutes per week for PE and sport in Years 8 and 10 (%).....	226
Table 13.1.	Prevalence of buying food on the way to school among boys and girls in Years 6, 8 and 10 (%).....	196	Table 15.13.	Proportion of urban and rural primary and secondary schools which offered each activity for PE (%).....	228
Table 13.2.	Prevalence of buying food on the way home from school among boys and girls in Years 6, 8 and 10 (%).....	197	Table 15.14.	Proportion of urban and rural primary and secondary schools that offered each activity for sport (%).....	229
Table 13.3.	Sources of lunch among boys and girls in Years 6, 8 and 10 (%).....	197	Table 15.15.	Proportion of urban and rural primary schools that identified barriers to FMS, fitness and physical activity (%).....	231
Table 13.4.	Frequency of buying breakfast from the school canteen among boys and girls in Years 6, 8 and 10 (%).....	198	Table 15.16.	Proportion of urban and rural secondary schools that identified barriers to FMS, fitness and physical activity (%).....	231
Table 13.5.	Frequency of buying food for recess from the school canteen among boys and girls in Years 6, 8 and 10 (%).....	199	Table 15.17.	Proportion of urban and rural primary schools that reported the frequency of applying strategies to promote physical activity (%).....	233
Table 13.6.	Frequency of buying lunch from the school canteen among boys and girls in Years 6, 8 and 10 (%).....	200	Table 15.18.	Proportion of urban and rural secondary schools that reported the frequency of applying strategies to promote physical activity.....	234
Table 13.7.	Drinks bought from the school canteen among boys and girls in Years 6, 8 and 10 (%).....	201	Table 17.1.	Measures administered to each Year group.....	244
Table 13.8.	Drinks bought from the school vending machine among boys and girls in Years 6, 8 and 10 (%).....	202	Table 17.2.	Standard errors (SE) and values of N for prevalence estimates based on a relative standard error of 25%.....	246
Table 13.9.	Money spent on food, drinks and snacks each week among boys and girls in Years 6, 8 and 10 (%).....	203	Table 17.3.	Prevalence of unacceptably high values of cholesterol and blood pressure in the <i>Bogalusa Heart Study</i> and the <i>Australian Health and Fitness Survey 1985</i> .....	247
Table 14.1.	Prevalence of abnormal concentrations of the biomarkers and blood pressure among Year 10 boys and girls by socioeconomic status (SES), cultural background and BMI category (%).....	210	Table 17.4.	Sample sizes per cell at powers of 0.7, 0.8 and 0.9 to detect differences of 5%, 10% and 15%, given a prevalence of 20% in one group, assuming simple random sampling.....	248
Table 15.1.	Proportion of urban and rural primary schools that reported facilities at or near schools, their availability out-of-hours and extent of use (at least four days per week) (%).....	217	Table 17.5.	Cut-points used in analysis of blood pressure in SPANS.....	261
Table 15.2.	Proportion of urban and rural secondary schools that reported facilities at or near the school, their availability out-of-hours and extent of use (at least four days per week) (%).....	220			
Table 15.3.	Proportion of urban and rural primary schools that reported the adequacy of sports/PE facilities and equipment, of support from the school for sport and PE and of parents' support for sport and PE (%).....	221			

## LIST OF FIGURES

Figure 4.1.	Prevalence of overweight, obesity and overweight/obesity combined among boys and girls in Years K, 2, 4, 6, 8 and 10 (%) .....28	Figure 7.4.	Prevalence of travelling home from school by car, walking or public transport among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES) and BMI category (%) .....76
Figure 4.2.	Prevalence of overweight and obesity combined among boys and girls in Years K, 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES) and cultural background (%) .....30	Figure 8.1.	Prevalence of adequate fitness among boys and girls in Years 4, 6, 8 and 10 (%).....85
Figure 4.3.	Prevalence of overweight and obesity combined among boys and girls in Years 2, 4, 6, 8 and 10, for the 1985, 1997 and 2004 NSW data sets (%) .....32	Figure 8.2.	Prevalence of adequate fitness among boys and girls in Years 4, 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....86
Figure 5.1.	Prevalence of one hour per day of MVPA during summer school terms among boys and girls in Years 6, 8, and 10 (%) .....38	Figure 8.3.	Prevalence of adequate fitness among boys and girls in Years 4, 6, 8, and 10 in 1997 and 2004 (%) .....88
Figure 5.2.	Prevalence of one hour per day of MVPA during summer school terms among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%).....40	Figure 9.1.	Prevalence of skill mastery and near-mastery among boys (b) and girls (g) in Years 2, 4, 6, 8 and 10 (%) .....97
Figure 5.3.	Prevalence of one hour per day of MVPA during winter school terms among boys and girls in Years 6, 8, and 10 (%) .....42	Figure 9.2.	Prevalence of sprint run advanced skills among boys and girls in Years 2, 4, 6, 8, and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....100
Figure 5.4.	Prevalence of one hour per day of MVPA during winter school terms among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%).....43	Figure 9.3.	Prevalence of vertical jump advanced skills among boys and girls in Years 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....103
Figure 5.5.	Prevalence of one hour per day of MVPA during summer school terms among boys and girls in Years 8 and 10 in 1997 and 2004 (%).....45	Figure 9.4.	Prevalence of side gallop advanced skills among boys and girls in Years 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....106
Figure 5.6.	Prevalence of one hour per day of MVPA during winter school terms among boys and girls in Years 8 and 10 in 1997 and 2004 (%).....46	Figure 9.5.	Prevalence of leap advanced skills among boys and girls in Years 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....109
Figure 5.7.	Prevalence of one hour per day of MVPA among boys and girls in Years 8 and 10 in 1985 and 2004 (%).....47	Figure 9.6.	Prevalence of kick advanced skills among boys and girls in Years 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....112
Figure 5.8.	Prevalence of regularly walking and cycling to school (at least four days per week) among boys (b) and girls (g) in Years 8 and 10 in 1985 and 2004 (%) .....48	Figure 9.7.	Prevalence of advanced skills for the overarm throw among boys and girls in Years 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....115
Figure 6.1.	Median hours per week spent in small screen recreation, educational, travel, cultural and social sedentary behaviours among boys and girls in Years 6, 8 and 10 (%) .....57	Figure 9.8.	Prevalence of catch advanced skills among boys and for girls in Years 2, 4, 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....118
Figure 6.2.	Median hours per week engaged in sedentary behaviours among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status, cultural background and BMI category (%) .....59	Figure 9.9.	Prevalence of sprint run mastery among boys and girls in Years 4, 6, 8 and 10 in 1997 and 2004 (%) .....120
Figure 6.3.	Prevalence of engaging in more than two hours per day of small screen recreation (SSR) among boys and girls in Years 6, 8 and 10 (%).....63	Figure 9.10.	Prevalence of vertical jump mastery among boys and girls in Years 4, 6, 8 and 10 in 1997 and 2004 (%) .....121
Figure 6.4.	Prevalence of engaging in more than two hours per day of small screen recreation among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%).....65	Figure 9.11.	Prevalence of overarm throw mastery among boys and girls in Years 4, 6, 8 and 10 in 1997 and 2004 (%) .....122
Figure 7.1.	Prevalence of the use of the different modes of travel to school among boys and girls in Years 6, 8 and 10 (%) .....70	Figure 9.12.	Prevalence of catch mastery among boys and girls in Years 4, 6, 8 and 10 in 1997 and 2004 (%) .....123
Figure 7.2.	Prevalence of travelling to school by car, walking or public transport among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES) and BMI category (%) .....71	Figure 9.13.	Prevalence of kick mastery among boys and girls in Years 4, 6, 8 and 10 in 1997 and 2004 (%) .....124
Figure 7.3.	Prevalence of the use of the different modes of travel home from school among boys and girls in Years 6, 8 and 10 (%).....75	Figure 10.1.	Usual consumption of fruit among boys and girls in Years 6, 8 and 10 (%).....132
		Figure 10.2.	Consumption of at least two serves of fruit per day among boys and girls in Years 6, 8 and 10 (%).....133

Figure 10.3.	Consumption of at least two serves of fruit per day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....134	Figure 11.9.	Prevalence of eating dinner every day among boys and girls in Years 6, 8 and 10 (%).....166
Figure 10.4.	Consumption of vegetables among boys and girls in Years 6, 8 and 10 (%).....136	Figure 11.10.	Prevalence of eating dinner every day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....167
Figure 10.5.	Consumption of at least four serves of vegetables per day among boys and girls in Years 6, 8 and 10 (%).....136	Figure 11.11.	Prevalence of eating dinner with the family among boys and girls in Years 6, 8 and 10 (%)...169
Figure 10.6.	Consumption of at least four serves of vegetables per day among Year 6, 8 and 10 boys and girls by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....138	Figure 11.12.	Prevalence of eating dinner with most of the family at least four times per week among boys and girls in Years 6, 8 and 10 (%)...169
Figure 10.7.	Usual consumption of fruit juice among boys and girls in Years 6, 8 and 10 (%).....140	Figure 11.13.	Prevalence of usually eating dinner with most of the family among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....170
Figure 10.8.	Usual consumption of milk among boys and girls in Years 6, 8 and 10 (%).....141	Figure 11.14.	Prevalence of eating dinner in front of the TV among boys and girls in Years 6, 8 and 10 (%)...172
Figure 10.9.	Type of milk usually consumed among boys and girls in Years 6, 8 and 10 (%).....142	Figure 11.15.	Prevalence of eating dinner in front of the TV more than four times per week among boys and girls in Years 6, 8 and 10 (%) .....172
Figure 10.10.	Usual consumption of bread among boys and girls in Years 6, 8 and 10 (%).....143	Figure 11.16.	Prevalence of eating dinner in front of the TV more than four times per week among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%)..174
Figure 10.11.	Usual consumption of pasta or rice among boys and girls in Years 6, 8 and 10 (%).....144	Figure 11.17.	Consumption of between-meal snacks among boys and girls in Years 6, 8 and 10 (%).....177
Figure 10.12.	Usual consumption of red meat among boys and girls in Years 6, 8 and 10 (%).....145	Figure 11.18.	Prevalence of consuming at least five snacks per day between meals among boys and girls in Years 6, 8 and 10 (%).....177
Figure 10.13.	Usual consumption of chicken among boys and girls in Years 6, 8 and 10 (%).....145	Figure 11.19.	Consumption of fast food among boys and girls in Years 6, 8 and 10 (%).....179
Figure 10.14.	Usual consumption of fish among boys and girls in Years 6, 8 and 10 (%).....146	Figure 11.20.	Prevalence of eating a meal at a fast food outlet at least once per week among boys and girls in Years 6, 8 and 10 (%) .....179
Figure 10.15.	Usual consumption of soft drink among boys and girls in Years 6, 8 and 10 (%).....147	Figure 13.1.	Prevalence of buying food on the way to school among boys and girls in Years 6, 8 and 10 (%)...195
Figure 10.16.	Prevalence of consumption of more than one cup per day of soft drink among boys and girls in Years 6, 8 and 10 (%) .....148	Figure 13.2.	Prevalence of buying food on the way home from school among boys and girls in Years 6, 8 and 10 (%) .....196
Figure 10.17.	Prevalence of consumption of more than one cup of soft drink per day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%)..149	Figure 13.3.	Sources of lunch among boys and girls in Years 6, 8 and 10 (%) .....197
Figure 10.18.	Usual consumption of confectionery among boys and girls in Years 6, 8 and 10 (%).....152	Figure 13.4.	Frequency of buying breakfast from the school canteen among boys and girls in Years 6, 8 and 10 (%).....198
Figure 10.19.	Usual consumption of hot chips and fried potato products among boys and girls in Years 6, 8 and 10 (%).....153	Figure 13.5.	Frequency of buying food for recess from the school canteen among boys and girls in Years 6, 8 and 10 (%) .....199
Figure 10.20.	Usual consumption of potato chips and salty snacks among boys and girls in Years 6, 8 and 10 (%) .....153	Figure 13.6.	Frequency of buying lunch from the school canteen among boys and girls in Years 6, 8 and 10 (%) .....199
Figure 11.1.	Usual consumption of breakfast among boys and girls in Years 6, 8 and 10 (%).....158	Figure 13.7.	Drinks bought from the school canteen among boys and girls in Years 6, 8 and 10 (%)...200
Figure 11.2.	Prevalence of eating breakfast daily among boys and girls in Years 6, 8 and 10 (%).....159	Figure 13.8.	Drinks bought from the school vending machine among boys and girls in Years 6, 8 and 10 (%)...201
Figure 11.3.	Prevalence of eating breakfast every day among boys and girls in Years 6, 8 and 10 by rurality, socioeconomic status (SES), cultural background and BMI category (%) .....160	Figure 13.9.	Money spent on food, drinks and snacks each week among boys and girls in Years 6, 8 and 10 (%) .....202
Figure 11.4.	Usual consumption of a drink at breakfast among boys and girls in Years 6, 8 and 10 (%)...162	Figure 14.1.	Prevalence of each of the biomarkers and elevated blood pressure among boys and girls in Year 10 (Ins 90 = 90 pmol/L insulin and Ins 100 = 100 pmol/L insulin) (%).....207
Figure 11.5.	Usual consumption of lunch among boys and girls in Years 6, 8 and 10 (%).....162	Figure 14.2.	Prevalence of abnormal concentrations of the biomarkers and blood pressure among boys and girls in Year 10 by socioeconomic status (SES), cultural background and BMI category (%) .....209
Figure 11.6.	Prevalence of eating lunch every day among boys and girls in Years 6, 8 and 10 (%).....163		
Figure 11.7.	Usual consumption of a drink at lunch among boys and girls in Years 6, 8 and 10 (%).....165		
Figure 11.8.	Usual consumption of dinner among boys and girls in Years 6, 8 and 10 (%).....165		

## LIST OF APPENDIX TABLES

Table AK.1.	Number and proportion of boys and girls classes in each Year which did or did not participate in the response bias study and the reasons for non-participation (%).....	110
Table AK.2.	Prevalence of healthy weight, overweight and obesity based on measured and estimated height and weight among boys and girls in Years K, 2, 4, 6, 8 and 10 (%).....	111
Table AL.1.	Height (centimetres) for boys in Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	113
Table AL.2.	Height (centimetres) for girls Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	114
Table AL.3.	Weight (kilograms) for boys in Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table (%).....	114
Table AL.4.	Weight (kilograms) for girls in Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	115
Table AL.5.	Waist girth (centimetres) for boys in Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	115
Table AL.6.	Waist girth (centimetres) for girls Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	116
Table AL.7.	BMI for boys in Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	116
Table AL.8.	BMI for girls in Years K, 2, 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	117
Table AM.1.	Percentiles of ages (years) from the SPANS physical activity sub-study for boys and girls in Years 8 and 10.....	118
Table AM.2.	Percentiles of ages (years) from the AHFS 1985 study for boys and girls in Years 8 and 10.....	118
Table AN.1.	Number of laps on the Multi-stage Fitness Test for boys in Years 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	119
Table AN.2.	Number of laps on the Multistage Fitness Test for girls in Years 4, 6, 8 and 10. Percentiles are shown in the columns on the left and right of the table.....	119
Table AO.1.	Prevalence of proficiency at sprint run components among boys and girls in Years 2, 4, 6, 8 and 10 (%).....	120
Table AO.2.	Prevalence of proficiency at vertical jump components among boys and girls in Years 2, 4, 6, 8 and 10 (%).....	120
Table AO.3.	Prevalence of proficiency at side gallop components among boys and girls in Years 2, 4, 6, 8 and 10 (%).....	121
Table AO.4.	Prevalence of proficiency at the leap components among boys and girls in Years 2, 4, 6, 8 and 10 (%).....	121
Table AO.5.	Prevalence of proficiency at the overarm throw components among boys and girls in Years 2, 4, 6, 8 and 10 (%).....	122
Table AO.6.	Prevalence of proficiency at the kick components among boys and girls in Years 2, 4, 6, 8 and 10 (%).....	122
Table AO.7.	Prevalence of proficiency at the catch components among boys and girls in Years 2, 4, 6, 8 and 10.....	123
Table AP.1.	Descriptive statistics on insulin, ALT, GGT, CRP, HDL cholesterol, LDL cholesterol and triglycerides for boys in Year 10.....	124
Table AP.2.	Descriptive statistics on insulin, ALT, GGT, CRP, HDL cholesterol, LDL cholesterol and triglycerides for girls in Year 10.....	124

## LIST OF APPENDIX FIGURES

Figure AK.1.	Flow diagram of the group allocation, data collection and comparison procedures .....	109
Figure AK.2.	Proportion of classes in each Year for which percent agreement between measured and adjusted estimated BMI categories was <60%, 60-79%, 80-89% or 90-100%.....	111
