

Faecal Accident Response Plan Solid Stool in a Pool

(Solid stool – low risk of disease transmission)

- 1. Request people to leave the immediate area,** where the accident occurred and advise all patrons in the pool of the accident.
- 2. Remove the solid stool using a fine net or scoop and dispose into a toilet.** Wear appropriate protective equipment – e.g. disposable gloves and disinfect the net, bucket or scoop used to collect the faecal matter.
- 3. Ensure disinfection concentration is satisfactory. Otherwise close the pool.**
- 4. It should be safe to resume full use of the pool after 15 mins of satisfactory disinfection.**
- 5. Log the incident and action taken.**
