

Health

## Feedback Form

### NSW Health welcomes your comments

Gladesville Campus is an important health, government and community space which has significant value as a heritage site with public harbour access.

It is important that the Gladesville Campus site is carefully managed and looked after, so NSW Health is set to commence a Master Planning process which will guide the future uses of this unique site.

In recent years, there have been calls for more community services and commercial development opportunities on the site, as well as a pressing need to secure financial sustainability for the site. A Master Plan will ensure that any future development on the site is consistent and complementary to the whole site.

### We are keen to hear your views...
