

BASIC PHYSICIAN TRAINING NETWORKED POSITIONS

RECRUITMENT FACT SHEET FOR APPLICANTS

IMET
NSW Institute of
Medical Education
and Training

This page provides information regarding Basic Physician Training recruitment for the 2010 Clinical Year along with information on the Basic Physician Networked Training Program in NSW. Recruitment for the 2010 period will be advertised in accordance with the **NSW Policy Directive “Junior Medical Staff Recruitment for Clinical Year 2010 in the NSW Public Health System**. The recruitment process will comply with the NSW Department of Health’s policies for recruitment in the public sector and the principles of equal employment opportunity.

APPLICATIONS

This fact sheet relates to Networked Basic Physician Training positions in NSW i.e PGY3+. Applicants seeking streamed medical resident positions should search directly under facilities.

You will need to apply online to each Network. You can apply for a position in one, some, or all nine basic physician training networks. A separate application must be submitted for each network that you want to apply to. However, as culling and interviewing require considerable network resources, it is requested that you only apply for networks in which you are considering working. These positions are accessed via the NSW Health JMO Jobs website <http://www.health.nsw.gov.au/jobs/recruitment/jmo.asp>.

INTERVIEWS

Networks will contact applicants if they are required for an interview. Each network will interview their candidates separately. The selection panel consists of representation from the network as well as a Human Resources representative.

Where will interviews be convened?

All BPT interviews will be held between **Monday 31 August and Wednesday 2 September** at the Macquarie Graduate School of Management, North Ryde. Hunter Regional Physicians Network will also interview applicants locally between these dates.

What do I need to bring to interview?

- 100 points of ID – Originals and photocopies for each interview panel

OFFERS

For 2010, basic physician training will be using the preference matching system which is included as part of the Mercury e-recruitment system. For more information on the NMRP Matching Algorithm, please see the following web page: http://www.nrmp.org/res_match/about_res/algorithms.html

Applicants will be asked to upload their preferences onto the e-recruitment system during the application process. Applicant preferences WILL NOT be seen by Network panels at any time.

At the end of the interview process, and after completing reference checks, the Networks will lodge their preferred eligibility list on the e-recruitment System. The preference matching will take place automatically to place applicants with employing Networks.

Following preference matching, the networks will be sent a revised eligibility list. All offers will then be made via email through the Mercury online recruitment program. Applicants will receive NO verbal offers. Please note successful applicants will receive only one offer for the BPT Program.

NSW Basic Physician Networked Training Program

Since 2005, basic physician training in NSW has been delivered through training networks. A training network is a group of hospitals and health services operating together as part of a combined training program. Generally, a network is made up of at least one city teaching hospital, one metropolitan hospital and one rural hospital in NSW.

Each network is responsible for providing a training program and a range of terms and rotations for trainees to complete their College training requirements. The purpose of training networks is to facilitate equitable distribution of trainees in each network while balancing high quality of training and clinical service needs in NSW.

For more information on the Basic Physician Networked Training Program in NSW please refer to the NSW Institute of Medical Education and Training (IMET) website
<http://www.imet.health.nsw.gov.au/www/472/1001127/displayarticle/1001393.html>.
