PHARMACEUTICAL SERVICES BRANCH**

SCHEDULE 4 APPENDIX D DRUGS
("Prescribed restricted substances")

Hereunder is a list of substances and some preparations that are classified as "prescribed restricted substances" by their inclusion in Appendix D of the Poisons and Therapeutic Goods Regulation 2002. **Not all Appendix D substances are included here** since many are not currently available for use in Australia. **Some brand names, including veterinary products, have been included alphabetically in bold letters.** The list is not exhaustive, so not all derivatives or brand names are listed individually. Anabolic and androgenic steroidal agents, barbiturates and benzodiazepines that are not listed individually are included in their classes. Salts, derivatives, preparations and admixtures of the substances listed are controlled in the same way as the substances themselves.

- | | |
|--|--|
| + Alepam | * Canitone |
| + Alodorm | Capadex |
| + Alprazolam | + Clobazam |
| # Amylobarbitone when packed and labelled for injection | + Clonazepam |
| # Amytal Sodium when packed and labelled for injection | * Deca-Durabolin |
| Anabolic and androgenic steroidal agents when included in Schedule 4 of the Poisons List (examples are marked thus * in this list) | Dextropropoxyphene when included in Schedule 4 of the Poisons List |
| * Anadiol | * DHEA (dehydroepiandrosterone) |
| * Anaplex | + Diazepam |
| * Andriol | Diethylpropion |
| * Androderm | Di-Gesic |
| + Antenex | Doloxene |
| + Ativan | * Drive |
| Barbiturates including barbituric acid when included in Schedule 4 of the Poisons List (examples are marked thus # in this list) | + Ducene |
| Benzodiazepine derivatives when included in Schedule 4 of the Poisons List (examples are marked thus + in this list) | * Durateston |
| * Boldebal-H | Duromine |
| * Boldenone | Ephedrine |
| # Brietal Sodium | * Ethyloestrenol |
| + Bromazepam | + Euhypnos |
| | * Filybol |
| | + Frisium |
| | + Halcion |
| | + Hypnovel |
| | + Kalma |
| | + Lexotan |
| | + Libriol |
| | + Lorazepam |

* denotes an anabolic or androgenic steroidal agent

+ denotes a benzodiazepine

denotes a barbiturate

- * Mesterolone
- * Methandriol
- # Methohexitone
- # Methylphenobarbitone
- * Methyltestosterone
- + Midazolam
- + **Mogadon**
- + **Murelax**
- * **Nandoral**
- * Nandrolone
- + Nitrazepam
- * **Nitrotain**
- * Norandrostenolone
- * Norethandrolone
- + **Normison**
- * **Oxandrin**
- * Oxandrolone
- + Oxazepam
- Paradex**
Paraldehyde
- + **Paxam**
- # Pentobarbitone when packed and
labelled for injection
- # **Pentothal Sodium**
- # Phenobarbitone
- Phentermine
- Pipradrol except in compounded
preparations containing 0.01 per cent
or less of pipradrol
- * Prasterone (dehydroepiandrosterone,
dehydroisoandrosterone)
- * **Primoteston Depot**
Propylhexedrine
- * Protabol
- * **Proviron**
Pseudoephedrine when included in
Schedule 4 of the Poisons List
- + **Rivotril**
- * **Ropel Liquid**
- + **Serepax**
- * **Sesoral**
- * **Spectriol**
- * **Stanabolic**
- * **Stanazol**
- * Stanozolol
- * **Sustanon 100**
- * **Sustanon 250**
- * **Sybolin**
- + **Temaze**
- + Temazepam
- + **Temtabs**
- Tenuate**
Tenuate Dospan
- * **Tepro**
- * **Testaprop**
- * Testosterone except when included in
Schedule 6 of the Poisons List
- # Thiopentone
- * Trenbolone except when included in
Schedule 5 or 6 of the Poisons List
- + Triazolam
- * **Tribolin 75**
- + **Valium**
- + **Valpam**
- + **Xanax**
- + Zolazepam
