Safety Alert 006/11
Supply of Minijet® injections

Due to ongoing supply issues from the overseas manufacturer, the Commonwealth Serum Laboratories (CSL) has been rationing a number of presentations of the Minijet® product range. CSL have advised that based on restricting supply to hospitals:

- Stock of Minijet® Adrenaline has run out.
- Stock of Minijet® Naloxone 2mg/5ml - 4 weeks supply.
- Stock of Minijet® Atropine - 3 weeks supply.

CSL is also notifying stakeholders that further products in the Minijet® range have been impacted.

<table>
<thead>
<tr>
<th>Minijet® Range currently included on the ARTG</th>
<th>Current levels of stock availability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minijet® Adrenaline</td>
<td>None available</td>
</tr>
<tr>
<td>Minijet® Naloxone (2mg/5mL)</td>
<td>Restricted Supply</td>
</tr>
<tr>
<td>Minijet® Atropine</td>
<td>Restricted Supply</td>
</tr>
<tr>
<td>Minijet® Lignocaine hydrochloride</td>
<td>None available</td>
</tr>
<tr>
<td>Minijet® Calcium Chloride</td>
<td>None available</td>
</tr>
<tr>
<td>Minijet® Glucose</td>
<td>Restricted Supply</td>
</tr>
</tbody>
</table>

CSL advises that ampoules of these drugs are available from alternate suppliers and the company is also investigating alternate suppliers for Minijet® injections.

Local Health Districts/Networks should:

- Distribute this notice to key stakeholders and all clinical departments.
- Assess the current status of the Minijet® range, as detailed above for each facility within the LHD/LHN and provide feedback to the Ministry of Health by cob Friday 7 October 2011.
- Develop a local plan to manage the supply shortage.
