

Flu and COVID-19 are serious illnesses – especially if you have other conditions

Your condition puts you at higher risk of serious illness from flu and COVID-19:

- Severe asthma
- Diabetes
- Cancer
- Immune disorders
- Obesity
- Heart, liver, kidney or lung disease

Protect yourself this winter

Get a FREE flu shot and stay up to date with your COVID-19 vaccinations.

Speak to your GP or specialist and get vaccinated today.
