

Vaccination is the best way to help protect you, your family and your community from COVID-19.

There is plenty of vaccine supply and places across NSW where you can get your vaccination, including Aboriginal Medical Services, GP's, pharmacies and NSW Health clinics. Many places offer walk-ins, no appointment is needed.

If you haven't had your first dose yet, it's not too late!

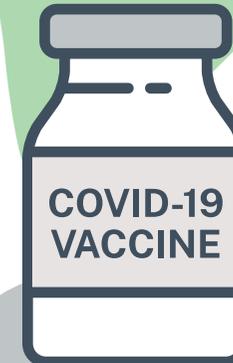

To find a vaccination clinic near you visit [www.nsw.gov.au](http://www.nsw.gov.au) or scan the QR code

For more information about COVID-19 vaccination, talk to your GP, Aboriginal Medical Service or Aboriginal Health Worker.

 COVID-19 BOOSTER

Are you up to date with your vaccinations?

Get the booster to help keep our mob safe.

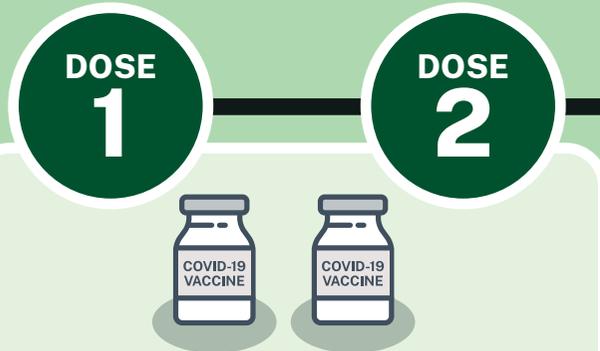

**LET'S DO THIS**

## ✓ COVID-19 BOOSTER

# Staying protected with COVID-19 vaccines.

It is important to stay up to date with COVID-19 vaccines to stay protected. A COVID-19 booster dose strengthens your immune system and helps you maintain a high level of protection against the virus.

## Two doses of vaccine provides protection against COVID-19.

The time between doses will depend on what type of vaccine you get. You will be told when you get your first dose when you should get your second – don't delay your second dose!

### THIRD DOSE

#### People who are severely immunocompromised may require an additional dose.

Speak to your doctor if you think you need require a third dose.

Boosters are now recommended for people who are immunocompromised, 3 months after your third dose.

Three months after second dose

## COVID-19 booster doses are now available.

You should get your booster if you are **16 years and over**, and it has been **3 months** since you received your second dose of a COVID-19 vaccine.

It is strongly recommended, particularly if you're over 50 or have an underlying medical condition.

## Frequently asked questions

### When should I get my booster?

If you're aged 16 years or over, and it's been three months since you received your second dose of a COVID-19 vaccine, it's strongly recommended you get a booster dose now.

A COVID-19 booster can increase your protection against serious illness by 98%. It will also reduce your risk of catching COVID-19 by 86%.

If you've had COVID-19 you can get a booster once you've fully recovered. For most people this is about a month after infection.

If you can't remember when you received your second dose, check your COVID-19 digital certificate or immunisation history statement, which you can find through myGov, visit [my.gov.au](https://www.my.gov.au)

If you can't access your certificate or statement online, you can ask your vaccination provider to print a copy for you or call the Australian Immunisation Register on **1800 653 809** and ask them to send your immunisation history statement to you.

### Will there be any side effects?

You may experience common, mild side effects after getting your booster dose however these should look similar to the side effects following the first 2 doses. These are normal and show that your immune system is responding to the vaccine and that it is working.
