

Are you Aboriginal and aged 30 years or over?

Talk to your doctor about COVID-19 antiviral medicines now.

“Antiviral medicines kept us out of hospital when we got COVID-19. They really saved us.”

Rachael and Gordon Brown

Antiviral medicines can help protect you from becoming really sick if you get COVID-19. Aboriginal people aged 30 years and older with one or more risk factors for severe illness are among those eligible for antiviral medicines.

Antiviral medicines work best if you start them within 5 days of developing COVID-19 symptoms, so don't wait until you get sick. Make a plan with your doctor today.
