

Floods and COVID-19: Advice for people with COVID-19 or self-isolating

Plan now:

1. Make an evacuation plan.
2. Pack a bag with medicines, extra drinking fluids and comfort items ready to go.

If you need to evacuate:

1. Do NOT remain in self-isolation at your home.
An emergency evacuation is a reason to leave home.
2. Stay with friends and family who are up to date with vaccinations AND who do not have a high-risk (elderly or severely immunocompromised) person at their home.
Do not mix in the household.
3. Make a hotel booking if you can't stay with friends or family or head to an evacuation centre. Tell evacuation centre staff immediately if you have COVID-19 or are self-isolating.
