COVID-19 fact sheet for secondary close contacts

Close contacts (接触者) are those who have been in close contact with a person who has COVID-19. If you have COVID-19 then you should self-isolate immediately and not leave home.

If you are a close contact, you must:

• Quarantine (居家隔离) at your closest testing location (at your closest testing location)
• Get tested for COVID-19 after 10 days
• Get tested if symptoms develop

COVID-19 can spread to others, even if you are asymptomatic. COVID-19 can spread to others, even if you are asymptomatic. COVID-19 can spread to others, even if you are asymptomatic.
