

If you are a casual contact of someone with COVID-19:

- Get tested for COVID-19 immediately and self-isolate until you get a negative result, even if you are vaccinated
- Do not leave your home except for urgent medical care or in an emergency (including to avoid injury or escape risk of harm from domestic violence)
- Get tested again on day 6 after your last contact with the COVID-19 positive person. If you feel well, you do not need to self-isolate while waiting for this test result.
