A casual contact is someone who has been near a person with COVID-19 but who is at lower risk of getting COVID-19 than a close contact.

You will know you are a casual contact if you have been contacted by NSW Health or if you have been to a casual contact venue.

These venues are on the NSW Government website: www.nsw.gov.au/COVID-19

If you are a casual contact you must get tested immediately and isolate until you get a negative test result.
