Paediatrics – Neonatal & Perinatal

The Workforce
Paediatrics is a specialty which provides expert diagnosis, treatment and care for infants, children and young people. Paediatricians may have specific fields of practice e.g. endocrinology, general, neonatal & perinatal medicine, medical oncology or rehabilitation medicine. The Royal Australasian College of Physicians (RACP) is accredited by the Australian Medical Council (AMC) to deliver paediatrics and child health training.

Workforce Characteristics in 2015
- 60 Headcount
- 41.7% Female
- 43.9 hours per week
- 45.5 years average age
- 26.7% Workforce aged over 50
- 8.3% Workforce aged over 60
- 11 New Fellows in Australia in 2016

The Future in NSW - Workforce Planning to 2030

Workforce projections are provided for a low and high demand scenario. Where requirements for both scenarios are met without the need for additional fellows, the projected “No Growth” scenario workforce data is provided.

Estimated Demand Growth
Between 1.9% (low demand scenario) to 2.9% (high demand scenario).

Estimated Workforce Size
In 2030, 97 Headcount (assuming all additional fellows will enter the workforce).

Estimated Additional Fellows
All demand scenarios require no additional fellows and hence no growth in trainees.

Estimated percentage over 60 years
In 2030, 10.8% of workforce over 60 years.

Estimated Workforce Average Age
In 2030, 48.2 years.

Estimated percentage over 60 years
In 2030, 10.8% of workforce over 60 years.

Workforce Planning Priority and Assessment Framework

Priority for Workforce Planning: ADEQUATE CAREER OPPORTUNITIES

Retirement Intentions: The factor associated with workforce retiring within the next 2 and the next 5 years

Ageing > 60 Minor factor

Ageing > 70 Minimal factor

New Fellow Requirements: The factor associated with the requirement to recruit additional trainees, based on workforce planning to 2030

Small Workforce Size: The factor associated with the sustainability of small workforces

Rating Key: Minimal Factor < Minor Factor < Moderate Factor < Major Factor

Workforce Modelling Considerations

- Workforce modelling is based on current models of care. Any change in the models may impact on requirements.
- Any changes to current training programs will affect the workforce modelling outcome.
- Workforce modelling is based on current workforce hours profile by age co-hours. Any changes to hours worked by future clinicians will affect the model.
- There is an accepted error rate of plus or minus two per cent within workforce modelling.
- The model does not address any mal-distribution either by location (rural or regional) or sector (public or private).
