BOIL WATER ALERT - BETWEEN MULGUM CREEK AND DE WILLIAMS DAM

Effective immediately from today Friday, 3 December 2021 residents between Mulgum Creek and DE Williams Dam have sediment contamination in the pipeline due to heavy rainfall.

Effective Chlorine disinfection cannot be assured for only those customers connected to the water supply between the Weir and Dam.

Water used for drinking or food preparation should be brought to a rolling boil to make it safe. Kettles with automatic shut off switches can do this. Water should then be allowed to cool and stored in a clean container with a lid and refrigerated.

Bottled water or cool boiled water should be used for drinking, washing uncooked food (e.g., salad vegetables and fruit), making ice, cleaning teeth, gargling and pet's drinking water.

Dishes should be washed in hot soapy water or in a dishwasher.

Children should take bottled water or cool boiled water to school.

Electronic road signs are being installed to notify residents.

Lismore City Council is working to fix the problem.

This boiled water notice is effective between Friday, 3 December until further notice.
