

IMPORTANT NOTICE

Non Potable Water

Wyangala Village

Re: Wyangala Water Supply

Following a report to the Ordinary Council Meeting of Monday 25 September 2017, Council wishes to advise residents that the Wyangala water supply has been declared as “non-potable” (i.e. the water supply is currently not safe for drinking, but may still be used for other household uses).

Wyangala residents are advised to bring water to a rolling boil prior to consumption. Water should then be allowed to cool and stored in a clean container with a lid and refrigerated.

If you have any further questions in relation to this matter, please contact Peter Ford, Engineer Water - Wastewater on 6340 2070.

Yours faithfully,

George Ridley
Director – Infrastructure & Operations
