### Respiratory illness resources

Protect yourself and your family from influenza (flu), so you can keep doing the things you love.

Influenza (flu) is serious, but your yearly flu vaccine offers the best protection against getting really sick. Flu can occur throughout the year but is most common in autumn and winter.

Anyone can get flu. Getting a flu vaccine is quick, easy and recommended for everyone aged 6 months and over so you can keep doing the things you love.

Scan the QR code to find your nearest flu vaccine provider

The flu vaccine is **free** for people who are at a higher risk of getting really sick from flu. This includes:

- Children aged 6 months to under five years of age
- Pregnant women, at any stage of pregnancy
- Aboriginal people aged 6 months and over
- · People aged 65 years and over
- People with serious health conditions such as diabetes, cancer, immune disorders, severe asthma, kidney, heart or lung disease

## A wide range of influenza and other respiratory illness resources are available for you to use

These include resources for:

- Health professionals
- Community
- · Pregnant women
- Residential care
- Aboriginal communities
- Multicultural communities

We encourage you to display assets in vaccination clinics, GP waiting rooms, pharmacies, hospitals, residential care facilities, community health clinics and any other relevant health care facilities.

Scan the QR code or visit the NSW Health website to access and download the influenza and other respiratory illness resources available:
