Thursday 4 June 2015

#### QUALITY HOSPITAL PERFORMANCE CONTINUES IN NSW

Health Minister Jillian Skinner has welcomed the latest Bureau of Health Information Quarterly Report (January-March 2015) which shows NSW hospitals are providing timely access to care for record numbers of patients.

Today's BHI report shows 75% of patients left NSW emergency departments within four hours and elective surgery performance was strong, despite increased volumes.

"Compared to the same quarter last year, over 17,000 extra patients visited our emergency departments, over 9,000 extra patients were admitted and more than 370 more elective surgeries were performed," Mrs Skinner said.

"Our skilled staff have dealt with this record demand for their services in a timely, professional manner and I thank them for it."

Today's data shows significant improvement in emergency department performance in hospitals, including:

- **Bankstown /Lidcombe Hospital:** 79 per cent of patients treated within four hours - up from 66 per cent at the same time last year.
- **The Children's Hospital at Westmead:** 75 per cent of patients treated within four hours - up from 68 per cent at the same time last year.
- **Prince of Wales Hospital:** 73 per cent of patients treated within four hours - up from 66 per cent at the same time last year.
- **Port Macquarie Hospital:** 74 per cent of patients treated within four hours - up from 68 per cent at the same time last year.

The BHI also reports performance in clinically-recommended timeframes by surgical specialty, including:

- **Neurosurgery:** 99 per cent of patients are receiving their care within clinically-recommended timeframes, compared to 96 per cent at the same time last year.
- **Cardiothoracic surgery:** 99 per cent of patients are receiving their care within clinically-recommended timeframes, compared to 97 per cent at the same time last year.
- **Orthopaedic surgery:** 97 per cent of patients are receiving their care within clinically-recommended timeframes, compared to 95 per cent at the same time last year.
- **Ophthalmology:** 99 per cent of patients are receiving their care within clinically-recommended timeframes, compared to 97 per cent at the same time last year.

Mrs Skinner said the improvements in hospital performance since the dying months of the Labor Government (January-March 2011) to January-March 2015 is very pleasing.

“The proportion of patients who received elective surgery in the recommended timeframe is now 98% - the highest result ever reported by BHI,” Mrs Skinner said.

“There is always more work to be done in ensuring timely care in our emergency departments but today’s results are pleasing in the light of increasing demand.”

<b>Emergency department performance (January-March quarter)</b>		
	<b>2011</b>	<b>2015</b>
Non-urgent	Median time to start treatment: <b>31 minutes</b>	Median time to start treatment: <b>24 minutes</b>
Semi-urgent	Median time to start treatment: <b>34 minutes</b>	Median time to start treatment: <b>26 minutes</b>
Urgent	Median time to start treatment: <b>23 minutes</b>	Median time to start treatment: <b>20 minutes</b>
Emergency	Median time to start treatment: <b>8 minutes</b>	Median time to start treatment: <b>8 minutes</b>
Patients leaving the emergency department in four hours	<b>60 per cent</b>	<b>75 per cent</b>

<b>Elective surgery performance (January-March quarter)</b>		
	<b>2011</b>	<b>2015</b>
Urgent	<b>92 per cent on time</b>	<b>100 per cent on time</b>
Semi-urgent	<b>87 per cent on time</b>	<b>98 per cent on time</b>
Non-urgent	<b>92 per cent on time</b>	<b>97 per cent on time</b>
