

Paediatric Pathways in Practice

Paediatric Pathways in Practice (PaedPiP) is a structured approach to building paediatric nursing capability across NSW Health.

Whether you are new to paediatric care or already experienced, PaedPiP helps you refresh your knowledge, build skills and grow your confidence.

PaedPiP opportunities

Fundamentals of Paediatric Nursing program

Consists of a suite of flexible, self-paced learning modules aimed at supporting nurses to develop core knowledge, practical skills and confidence in caring for children, young people and their families across a range of clinical settings.

Learning can be applied directly in clinical practice and supports ongoing capability development as outlined in the [NSW Health Paediatric Nursing Education and Training Framework](#).

To access PaedPiP e-learning, search for '[Fundamentals of Paediatric Nursing](#)' or course code: 628229184 on My Health Learning.

Postgraduate scholarships

Explore options to support your learning with a postgraduate scholarship.

Study a graduate certificate through a fully funded [Contracted Postgraduate Course](#), or choose a [Postgraduate nursing and midwifery scholarship](#) that supports graduate certificate, graduate diploma or master's study at the university that best suits your needs.
