

Rethinking ED Processes to Facilitate Timely, Quality Care

A/Prof de Villiers Smit
Director Emergency & Trauma Centre Alfred Hospital
Director Emergency Services Alfred Health

The Alfred Emergency and Trauma Centre

- Alfred Hospital:
 - Adult Tertiary referral
 - One of two major trauma centres in Victoria
 - Other State Services
- E&TC:
 - > 63,000 emergency patients annually
 - > 1280 major trauma presentations annually
 - 52 treatment spaces
 - 8 Resuscitation and Trauma Bays
 - 6 rapid assessment cubicles
 - 13 fully monitored general cubicles
 - 6 Fast Track cubicles
 - 18 bed Emergency Short Stay Unit (ESSU)
 - 1 Behaviours of Concern (BOC) room

The Opportunity

To use the “4 hour rule” as an opportunity to
TRANSFORM our patient care.

The Challenges

Design and deliver a model of care
which delivers best patient care –

Where we don't worry about the targets.

National Emergency Access Target: Departure from ED < 4h

What is Timely Quality Care (TQC)?

Transforms the way we treat our patients to ensure they all receive timely, quality care consistent with their clinical needs

A whole of health service change that involves everyone (clinicians, managers and support staff)

Changes how we assess and treat our patients from the moment they arrive in the E&TC to the time they are discharged from hospital

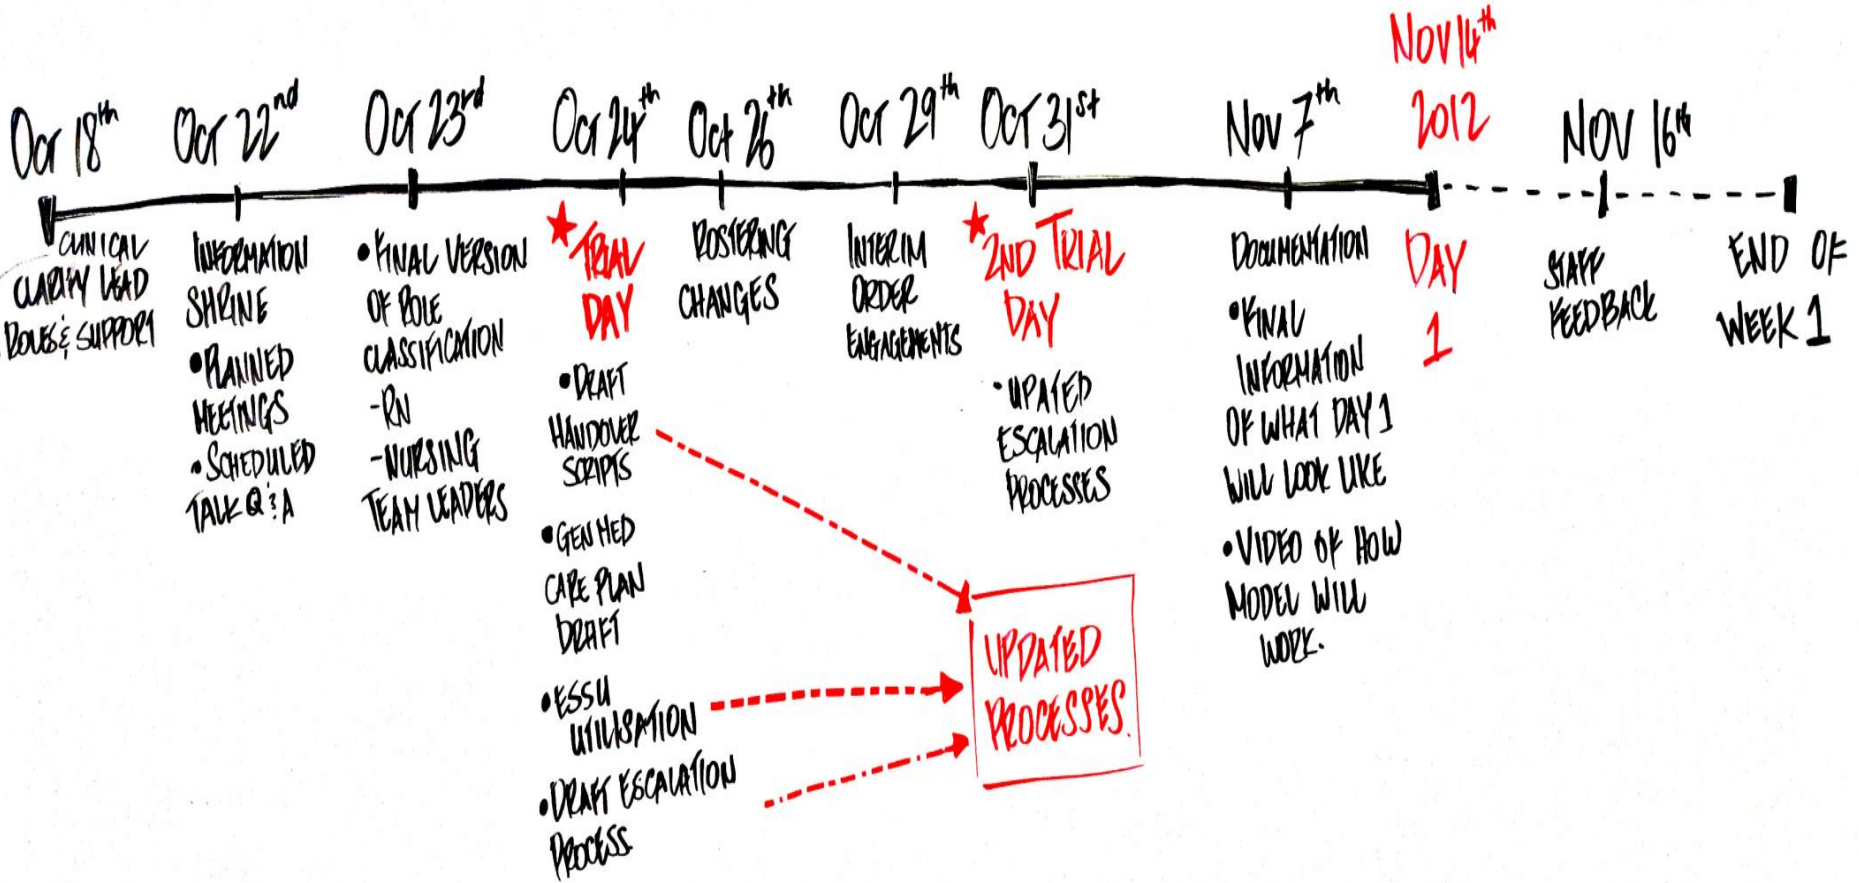

Developing the E&TC Model with TQC

- Research
- Site tour across UK, USA and WA
 - Inspired by the Royal London A&E model
- 2 years of discussion within the organisation
 - Driven by the executive
 - Owned by staff

Developing the E&TC Model

- What we needed:
 - Upfront **senior** decision making
 - Patients directed to the most appropriate treatment area based on their presenting condition and needs
 - Expedited processes for patients requiring admission to appropriate inpatient team

LEADING UP TO NOVEMBER 14...

Supporting Implementation of the E&TC Model

- Re-thinking and shifting old paradigms:
 - Triage
 - Patient journey through the E&TC modelling on Trauma
 - “ED” safest place for patient
 - Physical layout – incorporation of RITZ cubicles
 - Documentation
 - Handover
 - Culture and practice

THE 6 PRINCIPLES OF TIMELY QUALITY CARE

PRINCIPLE 1

Patients that present to the E&TC will be assessed, have treatment and investigations initiated and a management plan in place within 60 minutes of arrival.

PRINCIPLE 2

Patients will be discharged from E&TC or admitted to the hospital as decided by the E&TC consultant staff.

PRINCIPLE 3

Patients will be reviewed by the inpatient team within 2 hours of being referred for admission.

PRINCIPLE 4

Patients will be admitted to a bed in the most appropriate clinical place, the first time.

PRINCIPLE 5

Patients will have their investigations, consultations and interventions completed as soon as possible, in order of request and in no longer than 24 hours.

PRINCIPLE 6

Patients will be actively managed to ensure they are only in hospital for as long as is clinically necessary.

TIMELY QUALITY CARE

PRINCIPLE 1

Patients that present to the E&TC will be assessed, have treatment and investigations initiated and a management plan in place within 60 minutes of arrival.

PRINCIPLE 2

Patients will be discharged from E&TC or admitted to the hospital as decided by the E&TC consultant staff.

PRINCIPLE 3

Patients will be reviewed by the inpatient team within 2 hours of being referred for admission.

PRINCIPLE 4

Patients will be admitted to a bed in the most appropriate clinical place, the first time.

PRINCIPLE 5

Patients will have their investigations, consultations and interventions completed as soon as possible, in order of request and in no longer than 24 hours.

PRINCIPLE 6

Patients will be actively managed to ensure they are only in hospital for as long as is clinically necessary.

TIMELY QUALITY CARE

E&TC Admission Process

Decision to admit

- **Interns & Residents must discuss all patients requiring admission with the E&TC Consultant (Reg overnight) regarding:**
 - Decision to admit
 - Choice of unit
 - Interim orders
 - Actions that need to be completed prior to transfer

Admission phone call

- Hi thanks for calling back.
- I'm..... one of the Emergency.....
- I've got a patient who needs admission underunit, with.....
- **Clinical information – ISBAR format**
 - Treatment initiated
 - Pending investigations and results
- Patient will be transferred to ward bed once available if clinically safe

Interim orders

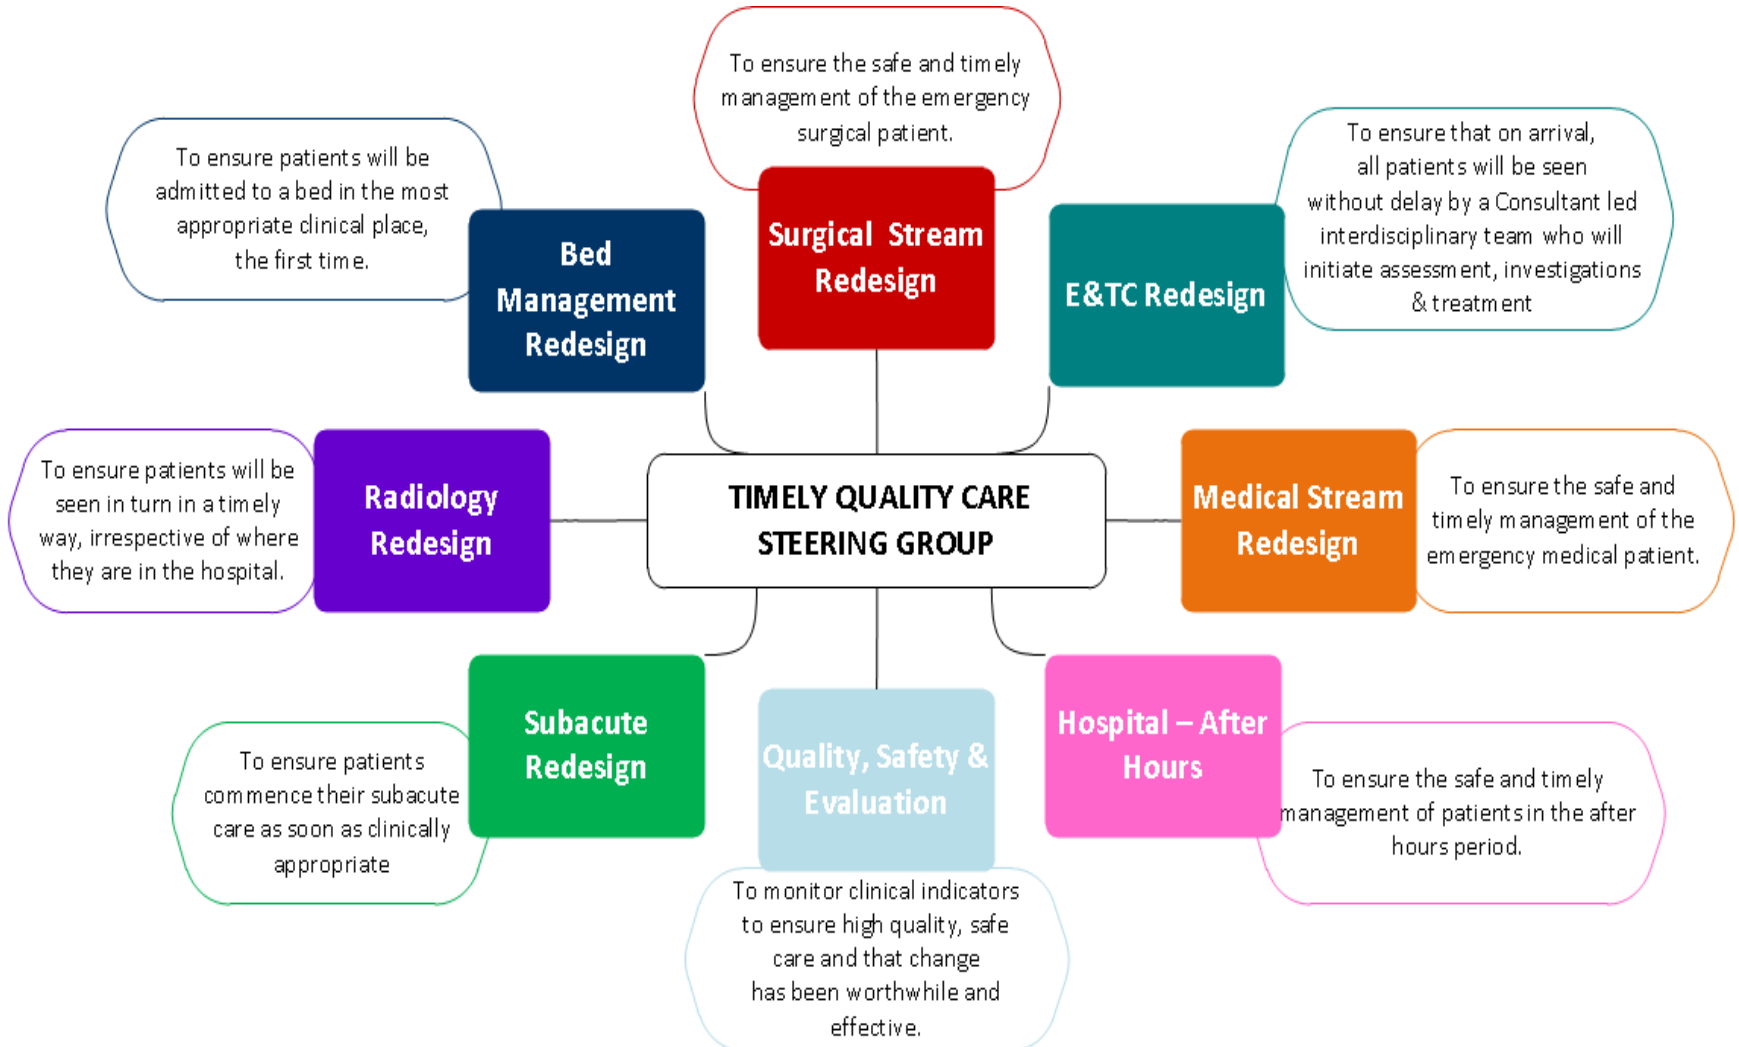

- **Complete E&TC Medical Record**
 - Document inpatient unit plan
- **Complete interim orders**
- **Commence medication record**
- **Patients meeting clinical review criteria:**
 - Inform E&TC Consultant (Reg overnight) to discuss plan
 - Does not necessarily preclude transfer to ward

Escalation

If resistance from inpatient unit

- **Remind that decision rests with E&TC Consultant**
- **Inpatient unit may refer on to another unit if they wish**
- **Inform that further escalation will occur to**
 - E&TC and Inpatient Consultants
 - E&TC Director
 - Hospital Executive

The TQC Programs

how
are we
DOING?

Occupancy
