Who we are

Patient Story

Project Background and Objectives

All RACF across
NSLHD

2015

5800
Calls to Ambulance

4000
Admitted to NSLHD
facilities

26,400 Bed days
~ \$38.94M

147
Calls to
Ambulance

141
Transported by
Ambulance to
NSLHD facilities

27
Discharged
from ED

114
Admitted to
NSLHD facilities

Average LOS
is 6.6 days
Cost: \$1475
/day
Cost of
ambulance
~\$400 per
response

752 Bed days
~ \$1.11M

+
A cost of ~ \$13,200
for the use of NSW
Ambulance where
transport could
have been avoided

TAC Facilities

2015

Objectives

- By June 2017, the number of TAC residents requiring transport via NSW Ambulance to Emergency Departments within NSLHD will be reduced by 25 % from 141 patients a year to 106 patients a year.
- By June 2017, the number of “000” calls received for TAC residents to NSW Ambulance will be reduced by 25%.
- By June 2017, all agreed identified treatable conditions will be managed within TAC 50% of the cases (low acuity).

In Scope

- Patients:
 - All residents from Twilight Aged Care (TAC)
- Process: Process of choosing right ambulance resource
 - Identifying resources or options to support residents (either to stay at facilities or upon hospital admission)
- Technology:
 - Access to documents
 - Exchange of information between the 3 x agencies to support an optimal decision
 - Telehealth

Out of Scope

- Patient:
 - Residents of all other Residential Aged Care Facilities (RACF) within the NSLHD
- Process:
 - Mental Health
 - Care undertaken in at the hospital
- Technology:
 - NSW Health / Ambulance Health Matrix
 - eHealth

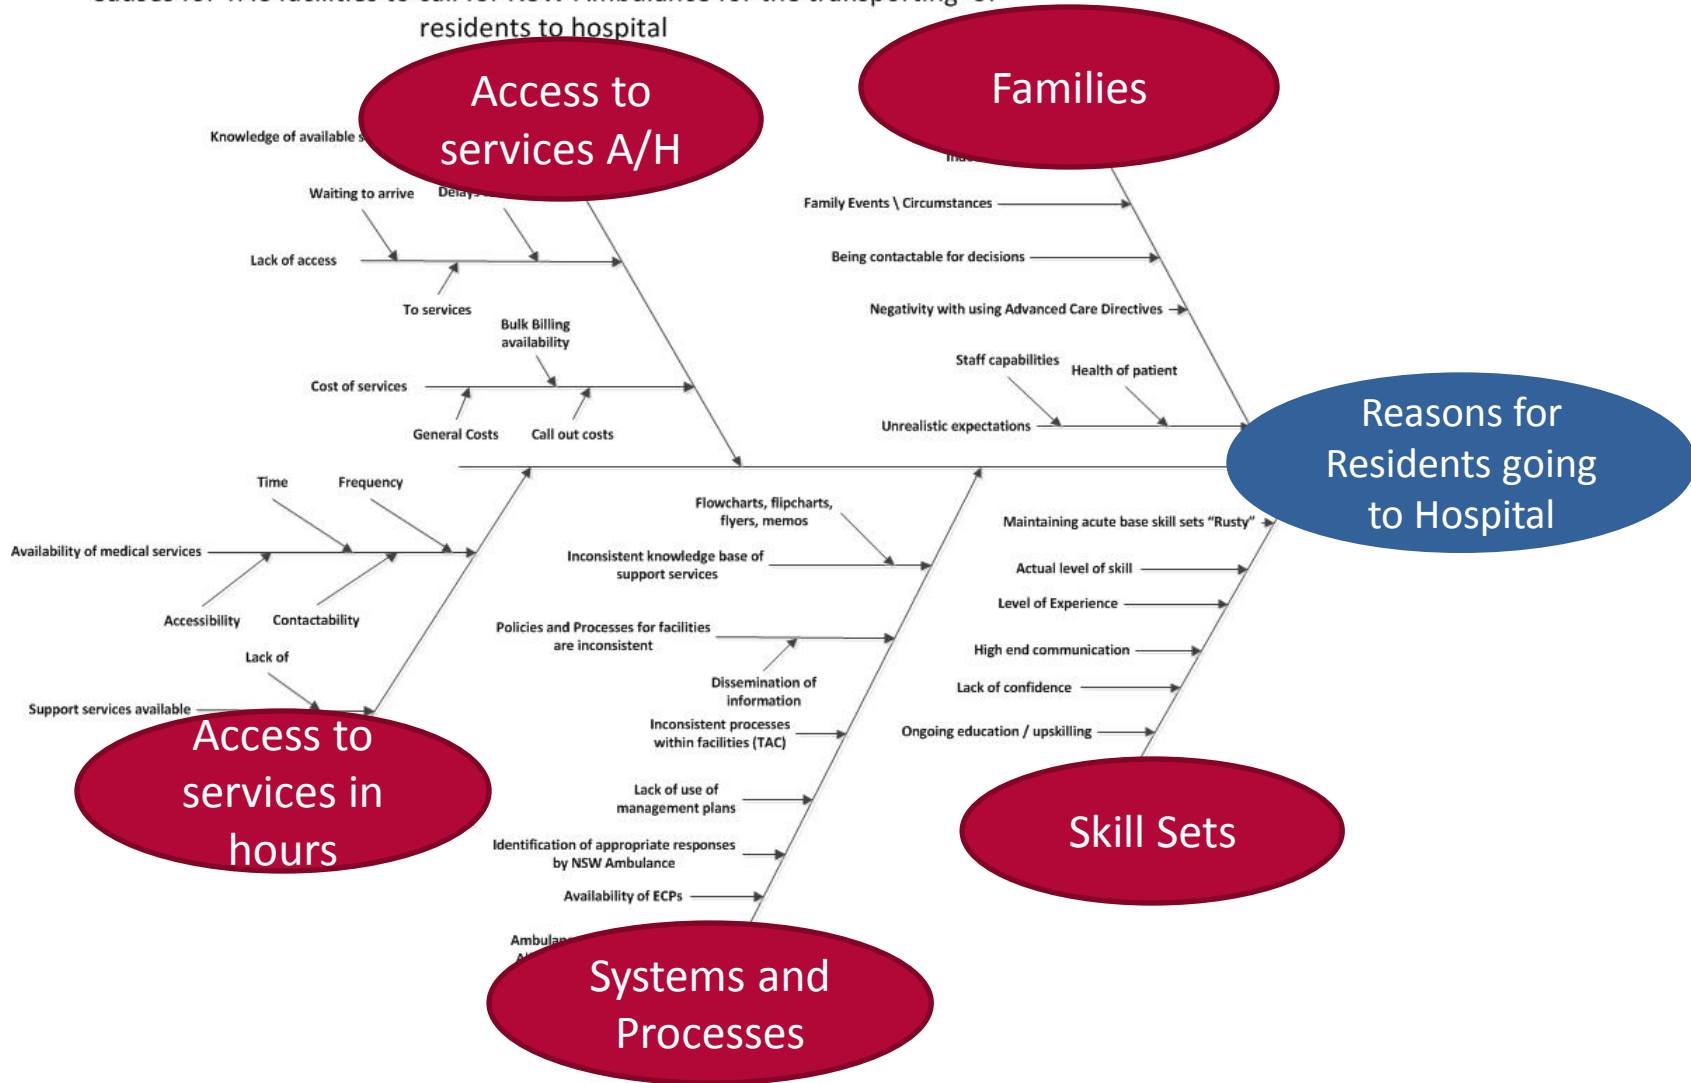

Stakeholders

Everyone is linked together when it comes to residents care

Analysis

Causes for TAC facilities to call for NSW Ambulance for the transporting of residents to hospital

Data Analysis – LHD and NSW Ambulance Data

Total Number of Calls to NSW Ambulance from TAC Facilities by Hour of Day

NSW Ambulance Response Type

n=368

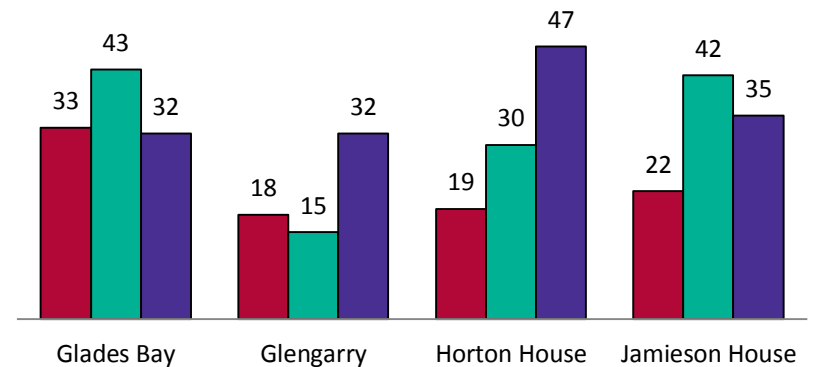

Calls to NSW Ambulance from TAC Facilities

■ Glades Bay ■ Horton House ■ Glengarry ■ Jamieson House

Calls to NSW Ambulance from Twilight Aged Care by Facility

■ 2013 ■ 2014 ■ 2015

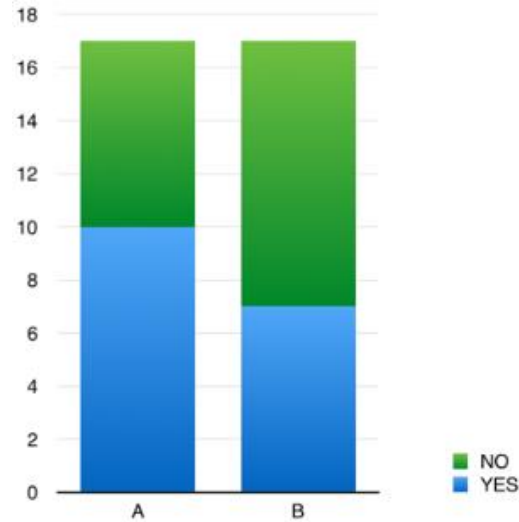

Data Analysis – TAC Surveys (n=33)

■ What event prompted you to call NSW Ambulance?

- A. The resident condition changed and they requested transfer to hospital.
- B. Staff observed a change in the residents condition.
- C. The On-call manager directed the resident be transferred to hospital.
- D. The GP reviewed and directed the resident be transferred to hospital.
- E. The resident's family requested the resident be transferred to hospital.
- F. Other

- A. Was the option of staying at the facility discussed with the resident/family?
- B. Would you be confident to care for the unwell resident, at the facility?

- A. Has your loved one / friend recently been to hospital?
- B. Would you have preferred your loved one / friend to be cared for at the facility?
- C. The staff discussed with me / my family about my loved one going to hospital?
- D. The GP discussed with me / my family about my loved one going to hospital?

Data Analysis – NSW Ambulance Surveys (n=30)

4) Do you feel that there was an adequate handover provided to you, to commence or continue treatment

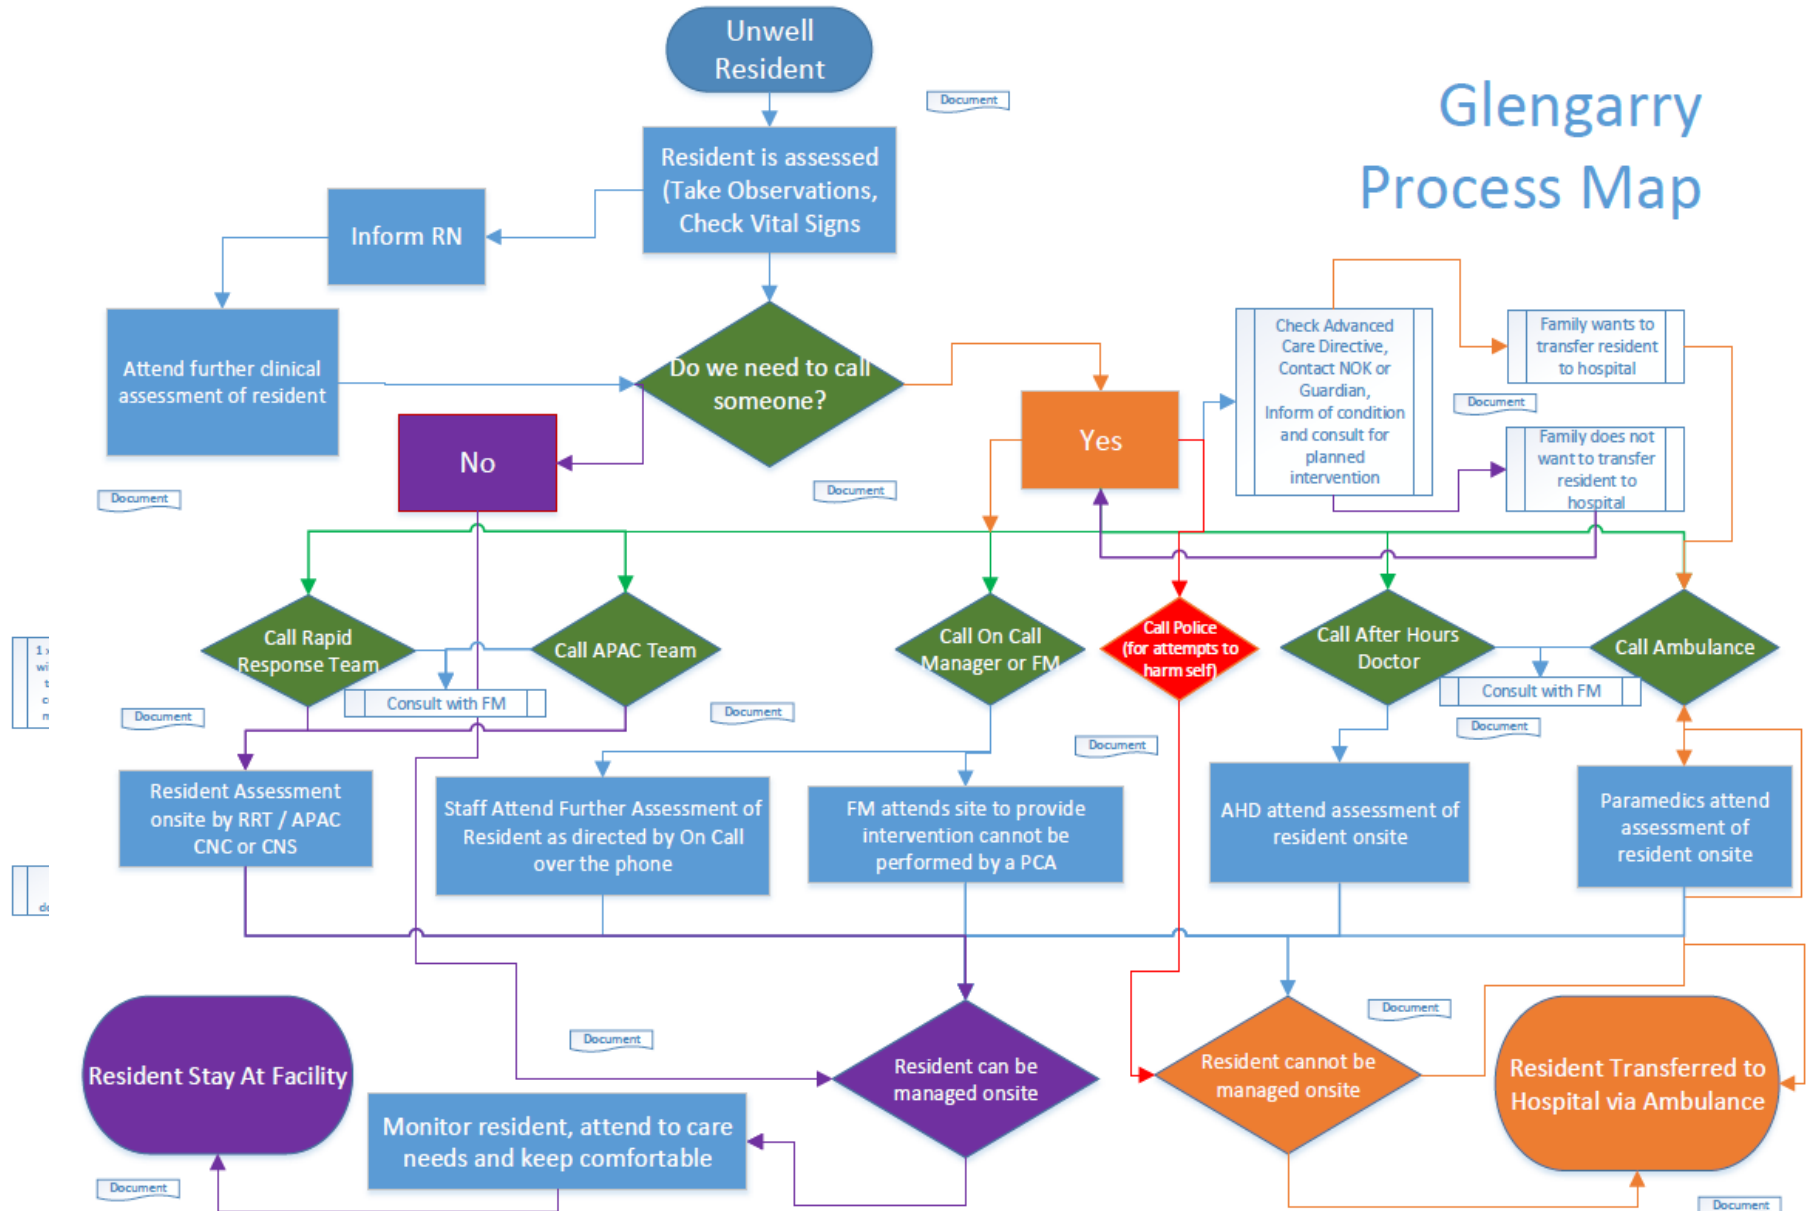

5) If NO to Q4: Explain your response

Data Analysis – process maps

Glengarry Process Map

The Patient Journey

Residents from Twilight Aged Care Facilities will receive the:

“Where am I going?”

It's not my resident

Why are they back here at the ED?

“What time is it, I'm sleeping. What's happening?”

I cant give you a handover, the paperwork is with the resident

**Right care,
Right time, with the
Right people,**

for their acute care needs,
through the systematic processes that provide a positive experience for residents, family and staff involved

The workshop

Summary of Key Issues

PAC4RAC Focus Area, Issues & Root Cause

No.	FOCUS AREA	ISSUE	Workshop Comments	ROOT CAUSE	Workshop Comments
	Understanding and Access to Care Management Plans		<ul style="list-style-type: none"> Are they in place? Are they just not done? Are they not there at all? 	1.1 Change in level of care within TAC and skill set of staff not changed accordingly	Agreed
				1.2 Engagement of medical staff	Agreed
				1.3 Family / Carer - lack of understanding and education of clinical management plans	Agreed
	Staff not confident with management of acute care conditions			2.1 Historical rostering practices based on level of resident activity	Agreed
				2.2 Change in level of care within TAC and skill set of staff not changed accordingly	Agreed (Resident activity)
				2.3 Opportunities to maintain acute base skill sets	Agreed
	Limited Access and Costs to Services		<ul style="list-style-type: none"> GP knowledge of available hospital avoidance services 	3.1 Availability and ability to contact for services	Agreed
				3.2 Different GPs for residents and use of contracted GPs	Agreed
				3.3 Base location of GPs	Agreed
	Lack of Structured Handovers		<ul style="list-style-type: none"> Availability of staff with skills and knowledge to provide effective handover 	4.1 Content / use of form not valued by staff	Agreed
				4.2 Lack of local / outgoing structured handover	Agreed
	Inconsistent Processes to Escalate Care Within Facilities		<ul style="list-style-type: none"> Extended hours coverage of hospital avoidance services 	5.1 Lack of consistency between sites for the requirements for calling an ambulance	Agreed
				5.2 Lack of knowledge of existing community service than can support	Agreed

Summary of Key Solutions

Acute Care plan as part of the RACF care plan. May be the Advanced Care Plan or ACD (if family agree)

Clinical models of care and care plans to match skill set

Training in the APAC flip chart for PCA's/
Empowering staff through this education

Edit RACF transfer sheet to add box indicating advance care directive/end of life wishes

ISBAR training for staff to introduce any news of health change/deterioration

GP engagement in the acute care planning process - new resident case conference and arrival review of this

Orientation. "Carer" Pack services used to manage patients clinical care needs within the facility.

All care plans lodged with My Health Record (need to have patient registered with My Health Record)

Aim to have an RN available 24 hrs/7 days. Remunerated appropriately and able to access records and care plans

Community Service provides education

Placement in APAC or ED for temporary secondments

GPs being aware of services available and their role within that service

Telehealth. Consistency with GPs. GP relationship building with resident and core staff

Implement link to My Health Record from Facilities to LHD

Saw Heard Assessment ISBAR Implementation into facilities

One page chart Implement into induction the placement of calling ambulance chart and decision making

Remote access to patient notes and script for triage guide for O/C RN to ask PCA when taking call

Remote access to patient notes and script for triage guide for O/C RN to ask PCA when taking call

Implementation of Solutions – ACD field added

Date & Time

* dd/mm/yyyy 00.00 (please use 24 hour time)

Reason for transfer

Attached

Resident Details (from iCare)
Medication Chart
GP's Letters
Copy of Care Plan
Other

Other

* if selected above

What is the usual mental status of the resident?

Orientated

What is the mental status of the resident at the time of the transfer?

Orientated

Belongings sent with the resident

* ie. dentures, walking frame etc.

Advanced Care Plan

-

Advanced Care Directive

-

Implementation of Solutions - Handovers

 ISBAND Handover Communications Tool	
Make sure that you have all of the resident's notes and observation charts with you. This makes using ISBAND more effective when communicating with another clinician

 ISBAND Handover Communications Tool	
Make sure that you have all of the resident's notes and observation charts with you. This makes using ISBAND more effective when communicating with another clinician	
What is ISBAND?	
ISBAND (an acronym for Introduction, Situation, Background, Assessment, Notification and Documentation) is a structured way of communicating information that requires a response from the receiver. ISBAND provides a framework to structure communication in a constant and reliable way. ISBAND also helps clinicians prioritising information, decreases the chance of forgetting relevant information and helps to prevent the use of assumptions, vagueness and helps to reduce any misunderstandings. As such, ISBAND can be used very effectively to escalate a clinical problem that requires immediate attention, or to facilitate efficient handover of Residents between clinicians and clinical teams	
Why ISBAND?	
Evidence shows that poor or inadequate verbal and written communication as being the most common root cause of serious errors. When a standardised approach is implemented, communication is more effective in teams. This is where ISBAND is important: <ol style="list-style-type: none"> ISBAND takes the uncertainty out of the important communications. It prevents the use of assumptions, vagueness that sometimes occur – particularly when staff is inexperienced or uncomfortable about their position in the hierarchy. In short, ISBAND prevents the hit and miss process of 'hinting and hoping'. ISBAND helps prevent breakdowns in verbal and written communication by creating a shared mental model around all Resident handovers and situations requiring escalation or critical exchange of information. ISBAND is easy to remember and encourages staff to think and prepare before communicating. ISBAND can make handovers quicker yet more effective, thereby releasing more time for clinical care. 	
INTRODUCTION	
<ul style="list-style-type: none"> State your Name, Position Title and Facility Name 	
SITUATION	
<ul style="list-style-type: none"> The reason I am calling is... Explain what has happened to trigger the conversation 	
BACKGROUND (CLINICAL)	
<ul style="list-style-type: none"> Provide details of residents normal cognitive and mobility status Have the resident's iCare Progress Notes open 	
ASSESSMENT (CLINICAL)	
<ul style="list-style-type: none"> Note clearly the trend in the resident's vital signs Explain what you think the problem is or say "I'm not sure what the problem is, but the resident's condition is deteriorating" You may be asked to expand upon your statement with specific signs & symptoms 	
NOTIFICATION	
<ul style="list-style-type: none"> Have key stakeholders such as GP or Family 	
Documentation	
<ul style="list-style-type: none"> Make sure you complete an Incident/ Injury Report if required Update Progress Notes as required Update Care Plan as required Have all original records available reporting to RN 	

Implementation of Solutions - Education

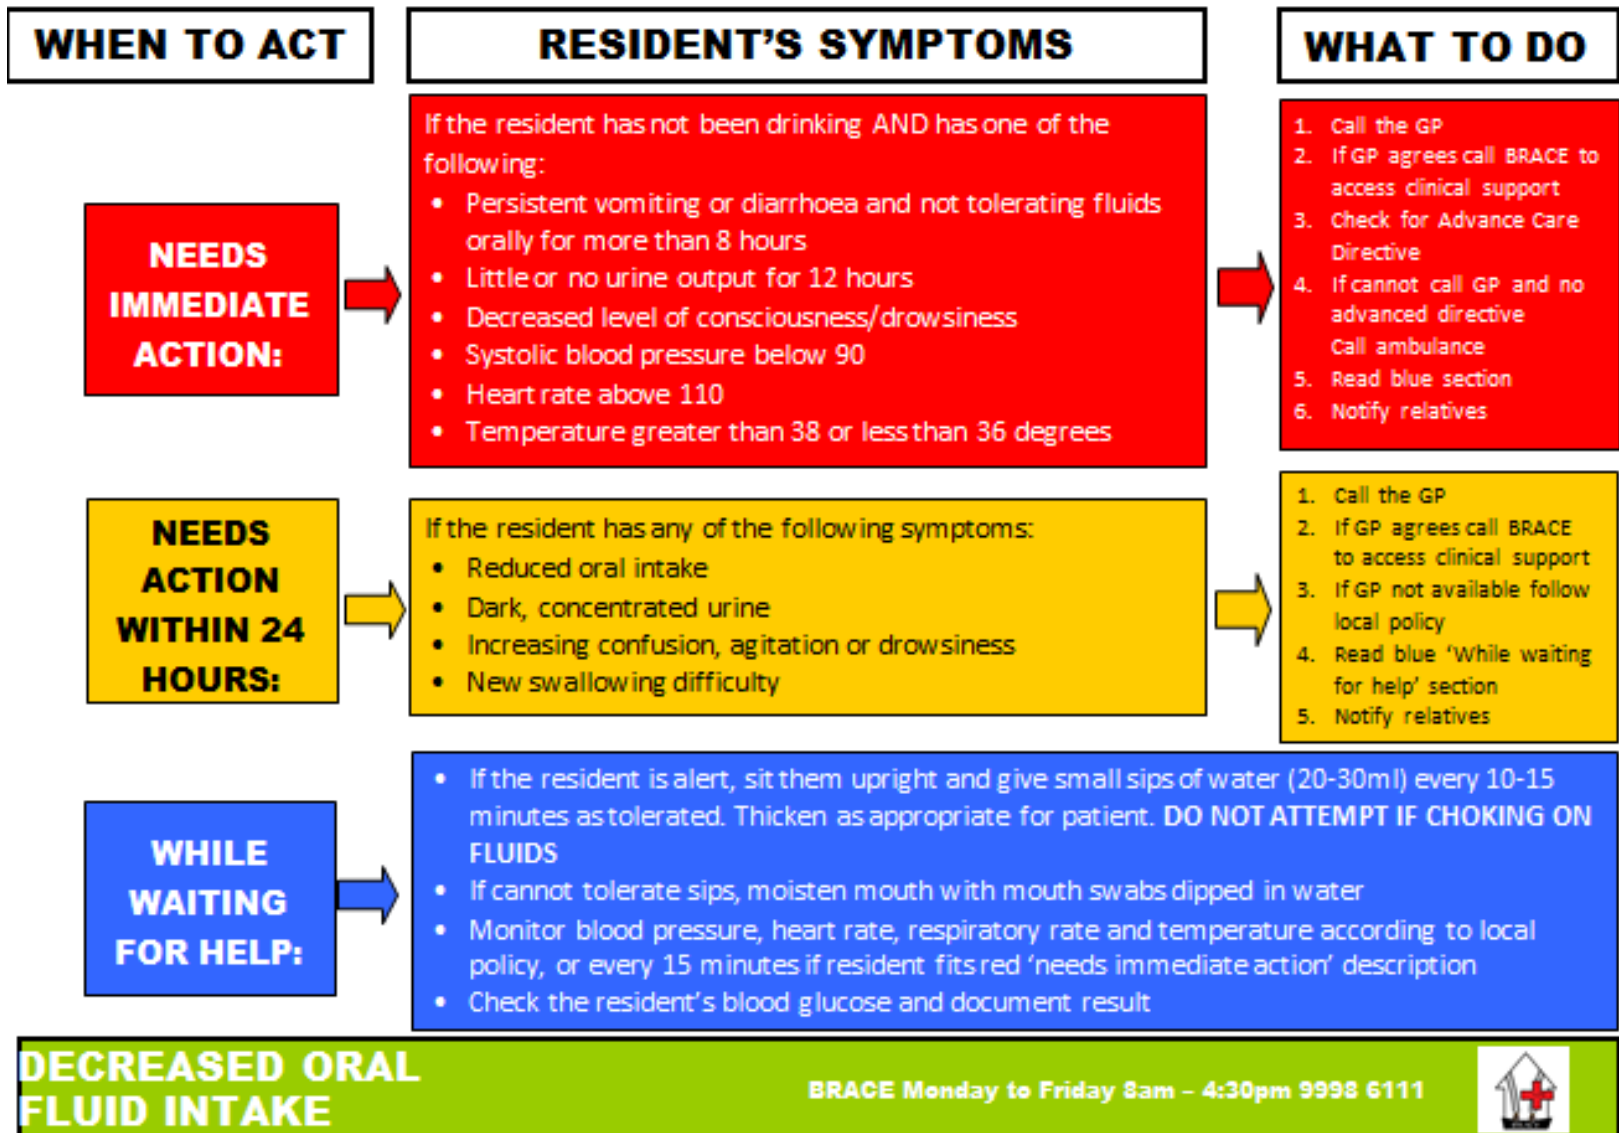

Training in the APAC flip chart for PCA's / Empowering staff through this education

Progress

- She had a fall 2 days ago and hit her chest off a chair. She has significant bruising and pain across her chest. She was sent to ED and found to have 2 fractured ribs, given endone (a strong painkiller) and sent back to the facility.
- You go to her room today and find that she is sitting up in her chair but is drowsy and unwell...

Implementation of Solutions - Education

Communication

- Newsletter/ fact sheet has been circulated to all TAC employees, residents and families on PAC4RAC
- Education for TAC staff has commenced
- Implementing staff recognition for those staff who embrace the project
- Ambulance sponsor sent out memo to all Ambulance staff within NSLHD to encourage the TAC employees to Handover in ISBAND
- Face to Face meeting with GP afterhours provider to TAC facilities to roll out Service Directory
- Surveys pre / post

Risks and the Challenges during implementation

- Time
 - Annual leave
 - Major
- Sponsorship
- Responsibility of one person rolling out the solutions in TAC
- Recruitment
- Increase in transports due to increase in knowledge
- Reliant on TAC managers as the change agents with external support to provide ongoing momentum and education to TAC staff / residents and families

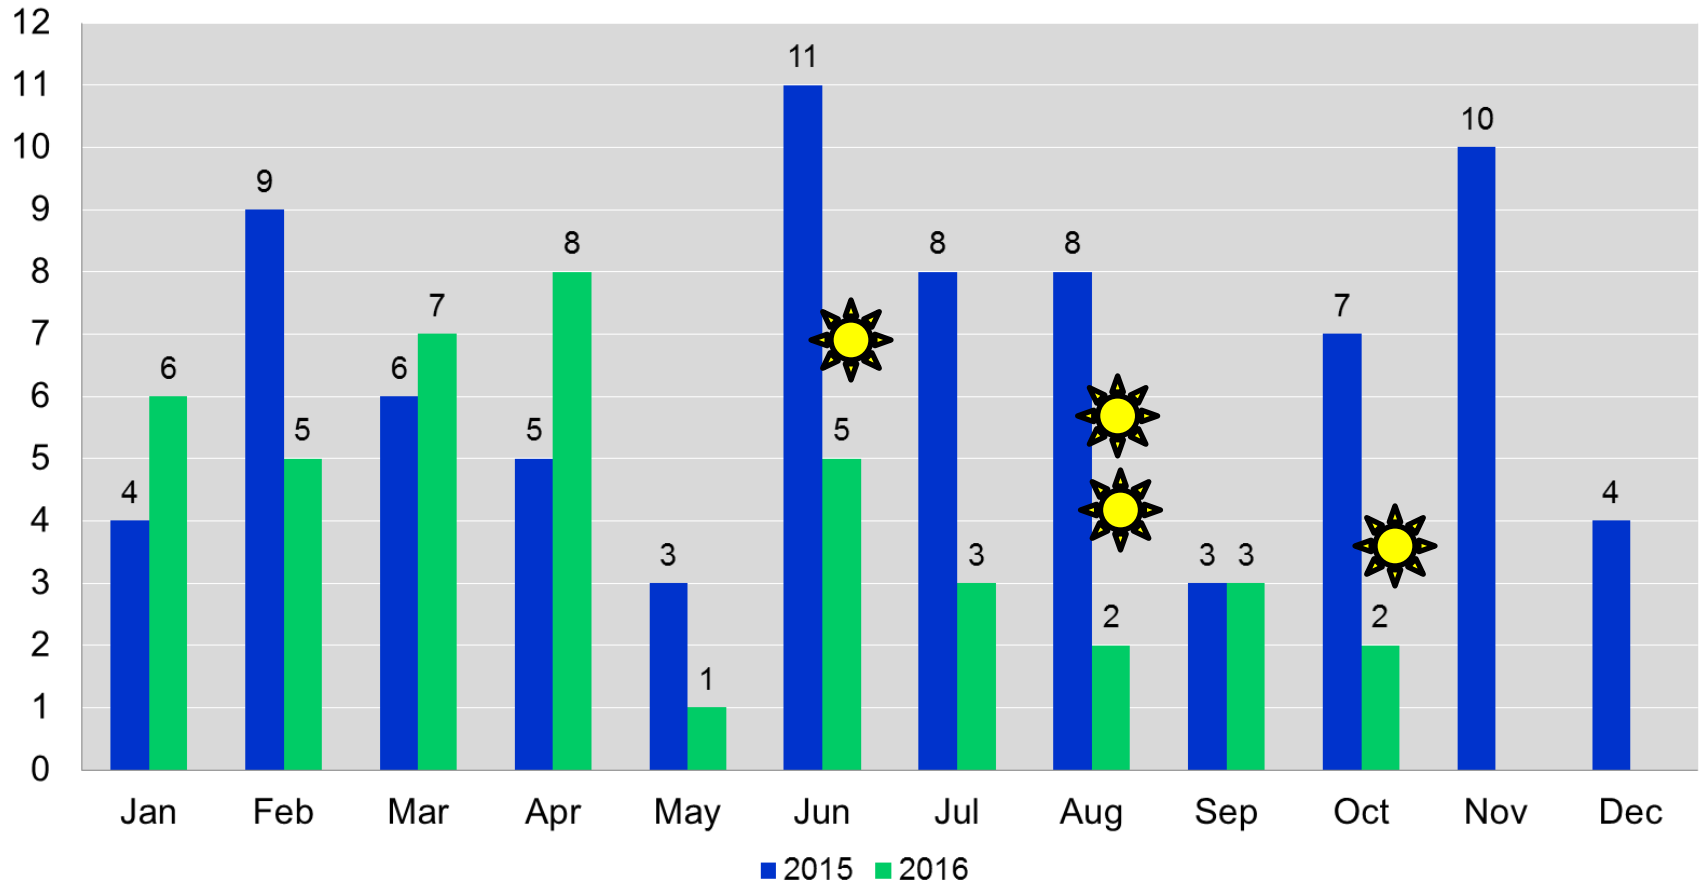

Initial evaluation

All NSW Ambulance Responses to Twilight Aged Care Facilities Period 2015/16

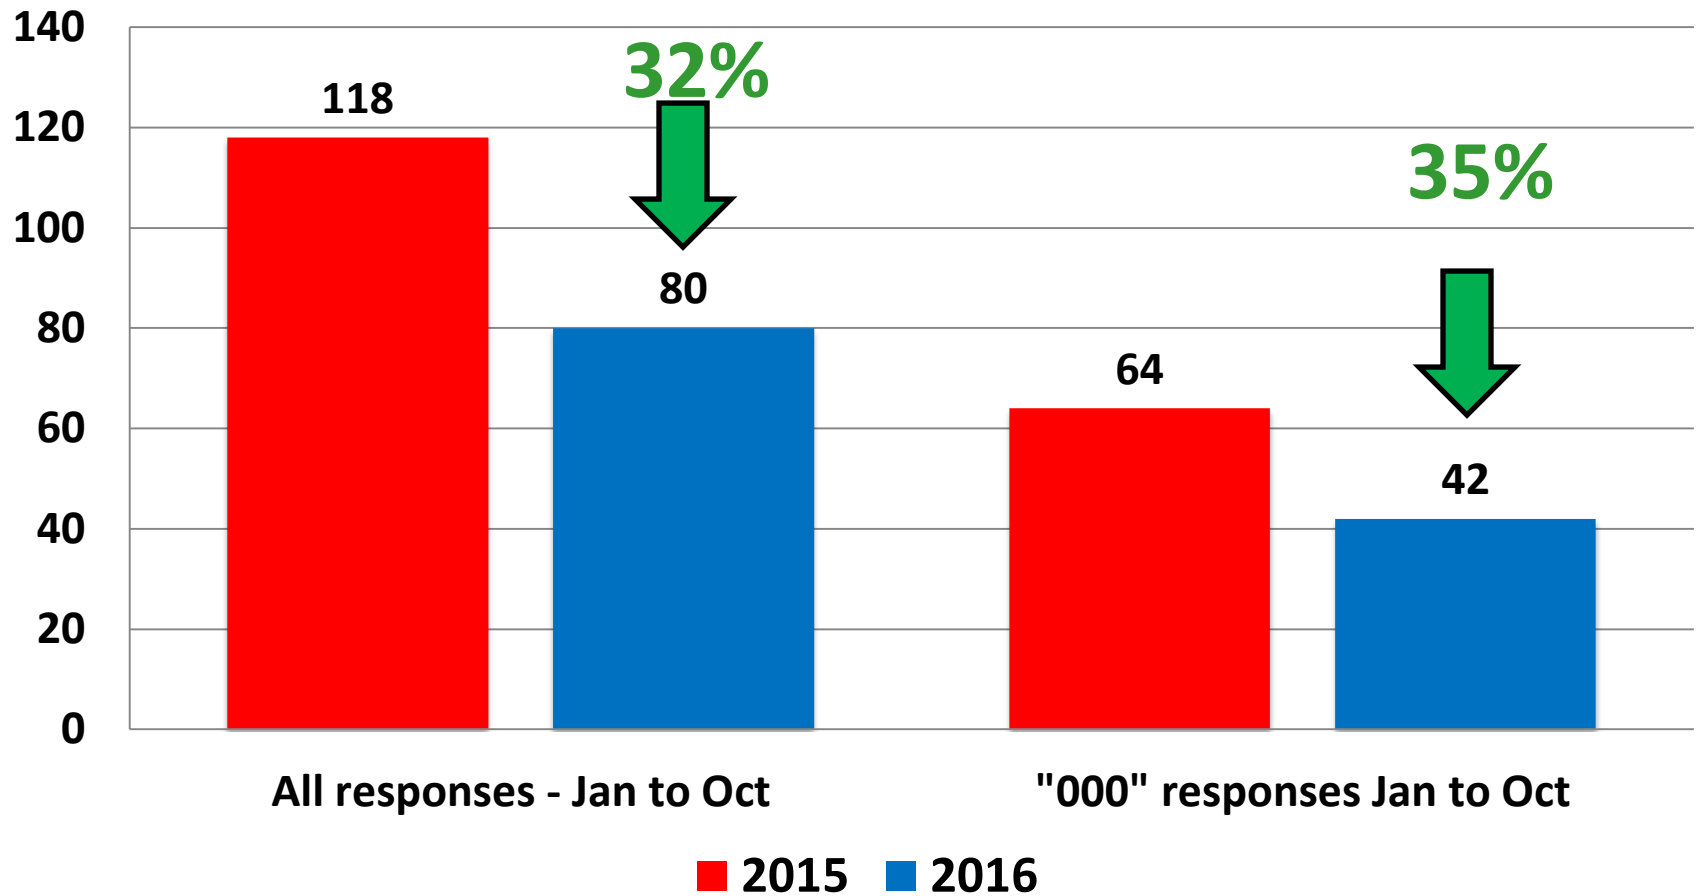

Initial evaluation

Number of "000" calls made from TAC facilities
Period 2015/16

Initial evaluation
